## Committee on Payment and Settlement Systems

# Statistics on payment and settlement systems in selected countries

Prepared by the Committee on Payment and Settlement Systems of the Group of Ten Countries

Figures for 2004

January 2006

Preliminary release

#### **Contents**

Country tables	1
Belgium	3
Canada	15
Euro area	27
France	29
Germany	39
Hong Kong SAR	49
Italy	57
Japan	71
Netherlands	83
Singapore	95
Sweden	107
Switzerland	117
United Kingdom	127
United States	139
Comparative tables	151
Annexes	209
Statistical methodology for the country tables	211
Statistical methodology for the comparative tables	221
Central bank officials involved in the preparation of this edition of the statistical update	237
Other BIS publications relating to payment and settlement systems	239

#### **Explanatory note**

This edition of *Statistics on payment and settlement systems in selected countries* includes a statistical methodology explaining what is included in the data in the country tables. It is important that the country tables are read in conjunction with this methodology. Where the data provided are an exception to the methodology, this is indicated by a footnote in the table concerned. A second statistical methodology is also provided, explaining which data have been taken from the country tables for the comparative tables.

This edition includes notation as follows:

nap not applicable nav not available nya not yet available

neg negligible (relative to other relevant data in the table concerned; country tables only)

i

0 exactly zero (not a very small number rounded to zero; country tables only)

Differences in totals are due to rounding.

**Country tables** 

Table 1
Basic statistical data

	2000	2001	2002	2003	2004
Population (thousands) <sup>1</sup>	10,246	10,281	10,330	10,374	10,418
GDP (EUR billions)	251.7	258.9	267.6	274.6	288.1
GDP per capita (EUR)	24,570	25,181	25,903	26,468	27,653
Consumer price inflation (in %) <sup>1</sup> Exchange rate (EUR/USD):	2.68	2.44	1.55	1.51	1.86
end of year	1.0747	1.1347	0.9536	0.7918	0.7342
average	1.0859	1.1175	1.0609	0.8858	0.8049
<sup>1</sup> Yearly average.					

## Table 2 Settlement media used by non-banks

(EUR billions, end of year)

	2000	2001	2002	2003	2004
Notes and coin in circulation outside banks <sup>1</sup>	11.87	7.10	nap	nap	nap
Value of transferable deposits <sup>2</sup>	58.96	61.99	62.94	67.99	79.00
Narrow money supply <sup>1, 3</sup>	70.84	69.09	nap	nap	nap
Memo:					
Transferable deposits in foreign currencies	5.74	5.05	4.46	3.79	4.39
Outstanding value on e-money storages	0.03	0.08	0.07	0.07	0.07
of which:					
on card-based products	0.03	0.08	0.07	0.07	0.07
on software-based products	nap	nap	nap	nap	nap

<sup>&</sup>lt;sup>1</sup> From 2002, due to banknote migration, data are available only at an aggregated euro area level (see Euro area, Table 2). <sup>2</sup> Value of overnight deposits held at Monetary Financial Institutions (MFIs) by non-MFIs (exclusive "Central government" and "Rest of the world"). <sup>3</sup> Corresponds to the ECB concept M1.

## Table 3 Settlement media used by banks

(EUR billions, average of last reserve maintenance period)

	2000	2001	2002	2003	2004
Transferable balances held at the central bank	7.25	7.62	7.30	7.57	8.32
of which:					
required reserves	7.25	7.62	7.30	7.57	8.32
free reserves	nav	nav	nav	nav	nav
Transferable balances held at other banks <sup>1</sup> <i>Memo:</i>	7.04	13.25	8.02	11.75	9.42
Institutions' borrowing from the central bank:					
intraday	nav	nav	nav	nav	4.21
overnight and longer <sup>2</sup>	14.32	6.40	12.24	14.37	21.78

<sup>&</sup>lt;sup>1</sup> Value of overnight deposit accounts held by Belgian credit institutions at other credit institutions (EUR and foreign currencies, in Belgium and abroad). <sup>2</sup> Non-intraday borrowing from the central bank.

#### Table 4 Banknotes and coin<sup>1</sup>

<sup>&</sup>lt;sup>1</sup>From the introduction of the euro on 1 January 1999, these figures are provided solely at an aggregated euro area level (see Euro area, Table 4).

Table 5 Institutions offering payment services to non-banks (end of year)

	2000	2001	2002	2003	2004	
Central bank						
Number of branches or offices <sup>1, 2</sup>	15	13	11	9	9

Memo:						
Electronic money institutions						
Number of institutions <sup>1</sup>	nap	nap	nap	nap	nap	
Outstanding value on e-money storages issued by						
e-money institutions	nap	nap	nap	nap	nap	
<sup>1</sup> Offering cashless payment services. <sup>2</sup> Head office, branches and agencies (bureaux). <sup>3</sup> Overnight deposits. <sup>4</sup> Postal institution.						

Table 6
Payment card functions and accepting devices (end of year)

	2000	2001	2002	2003	2004
Cards issued in the country (thousands)					
Cards with a cash function	13,930	13,987	14,902	15,619	15,727
Cards with a debit function	10,960	10,942	11,863	12,522	12,551
Cards with a delayed debit function <sup>1</sup>	2,970	3,045	3,039	3,097	3,176
Cards with a credit function	nav	nav	nav	nav	nav
Cards with an e-money function	7,931	7,998	8,271	8,803	8,979
of which: cards with an e-money function which					
have been loaded at least once	1,426	1,812	2,467	2,126	2,069
Total number of cards (irrespective of the number					
of functions on the card)	13,930	13,987	14,902	15,619	15,727
of which: cards with a combined debit, cash and e-					
money function	7,931	7,998	8,271	8,803	8,979
Memo:					
Retailer cards	nav	nav	nav	nav	nav
Terminals located in the country					
ATMs <sup>2</sup>	10,897	11,393	11,676	12,495	13,197
of which:					
ATMs with a cash withdrawal function	6,679	6,790	6,778	7,114	7,237
ATMs with a credit transfer function	nap	nap	nap	6,560	7,216
POS terminals	116,436	144,421	135,743	113,081	108,284
of which: EFTPOS terminals	12,719	28,885	19,386	15,921	8,282
E-money card terminals	190,750	271,614	312,693	321,241	328,379
of which:					
e-money card loading/unloading terminals	122,913	182,767	208,151	213,249	213,613
e-money card payment terminals	67,837	88,847	104,542	107,992	114,766

<sup>&</sup>lt;sup>1</sup> All major credit cards (Visa, American Express, Eurocard, etc) are issued as delayed debit cards. <sup>2</sup> All ATMs with limited access have a cash dispensing function as well as a giro transfer function.

Table 7
Indicators of the use of payment instruments and terminals by non-banks: volume of transactions (millions, total for the year)

	2000	2001	2002	2003	2004
Transactions per type of payment instrument					
Credit transfers	510.91	578.71	662.46	636.47	692.70
of which:					
paper based	281.00	310.13	343.49	317.85	321.00
non-paper based	229.91	268.58	318.97	318.62	371.70
Direct debits	166.17	176.93	168.79	192.35	211.35
Card payments with cards issued in the country	445.63	502.22	577.28	614.47	671.34
of which:					
payments by cards with a debit function <sup>1</sup>	379.92	<i>4</i> 32.78	506.79	544.07	597.31

<sup>&</sup>lt;sup>1</sup> Data have been revised over the whole period. <sup>2</sup> This is not equivalent to M1 in Canada. M1 consists of currency in circulation outside banks plus demand deposits at chartered banks. The figure for narrow money supply includes currency in circulation outside banks plus all deposits, notice or demand, that are held at any deposit-taking institution and which can be used to make payments.

0

<sup>&</sup>lt;sup>1</sup> Lower balances in 2003 were largely attributable to the introduction of next-day settlement in the Automated Clearing and Settlement System (ACSS). <sup>2</sup> Data for 2001–03 are revised. <sup>3</sup> Advances to the members of the Canadian Payments Association, made at the end of the day to facilitate settlement in Canada's large value payment system (LVTS) or retail payment system (ACSS); these advances are to be paid back on the following business day with interest. The decline in borrowing in 2003 was largely attributable to the introduction of next-day settlement in the ACSS. <sup>4</sup> Collateral associated with the operation of the LVTS (Canada's large-value payment system) is pledged to the Bank of Canada at the beginning of each day and is used to cover any participant's negative funds positions during the day. The Bank would provide the liquidity necessary (secured by this collateral) to allow the system to settle, in the event of a participant default.

<sup>&</sup>lt;sup>1</sup>There are five branches but only the head office offers payment services. <sup>2</sup>Some foreign bank subsidiaries (legally incorporated banks in Canada that are owned by a foreign bank parent but will only show up on the consolidated balance sheet of the foreign parent) and foreign bank branches (included in the parent bank's individual balance sheet) are associated with the same parent bank. In previous editions of these statistics, these separate entities were recorded as a single institution; from this edition forward, each entity will be recorded as a separate institution. This change has caused these figures to increase. <sup>3</sup>The data have been revised over the whole period. <sup>4</sup>Only a few operate nationwide. Those companies that are members of the Canadian Payments Association are included. <sup>5</sup>Prior to 2003, institutions operated in the provinces of Alberta and Ontario. Since 2003, only one institution has been operating, and is located in Alberta. <sup>6</sup>Data for 2003 have been revised.

<sup>&</sup>lt;sup>1</sup> Yearly average. <sup>2</sup> For 2004, provisional. <sup>3</sup> In 2004, the methodology for the calculation of GDP was revised. GDP data reflect this revision.

#### Table 2 Settlement media used by non-banks

(CHF billions, end of year)

	2000	2001	2002	2003	2004
Notes and coin in circulation outside banks	32.0	36.0	35.4	35.7	36.2
Transferable deposits <sup>1</sup>	97.0	104.7	121.3	162.3	147.6
Other <sup>2</sup>	73.7	79.5	83.7	92.5	91.5
Narrow money supply (M1) <sup>3</sup>	202.7	220.2	240.4	290.5	275.3
Memo:					
Transferable deposits in foreign currencies	23.9	26.6	25.1	29.5	31.4
Outstanding value on e-money storages	nav	nav	nav	nav	nav
of which:					
on card-based products	nav	nav	nav	nav	nav
on software-based products	nap	nap	nap	nap	nap

<sup>&</sup>lt;sup>1</sup> Sight deposits. <sup>2</sup> Transaction accounts also used for payment purposes. <sup>3</sup> Notes and coin in circulation plus sight and other transaction deposits.

Table 3
Settlement media used by banks

(CHF billions, average for December)<sup>1</sup>

	2000	2001	2002	2003	2004
Transferable balances held at the central bank <sup>2</sup>	3.4	3.4	3.0	5.5	5.4
of which:					
required reserves	nap	nap	nap	nap	nap
free reserves	nap	nap	nap	nap	nap
Transferable balances held at other banks	50.3	46.0	40.0	66.3	72.1
Memo:					
Institutions' borrowing from the central bank	6.5	6.6	11.2	10.9	10.3
of which:					
intraday	2.8	2.5	7.5	6.4	6.2
overnight and longer	3.7	4.1	3.7	4.5	4.1

<sup>&</sup>lt;sup>1</sup> Except for transferable balances held at other banks, which are at end of year. <sup>2</sup> Banks have to meet certain liquidity requirements, but the amount concerned has to be held in the form of vault cash, balances at PostFinance or balances at the central bank. Therefore the distinction between required reserves and free reserves is not meaningful.

Table 4
Banknotes and coin
(CHF millions, end of year)

	2000	2001	2002	2003	2004

<sup>1</sup> Does not equal the sum of the two previous items. 2 There is no fully operational electronic money scheme currently in place.

### Table 3 Settlement media used by banks

(GBP billions, average of last reserve maintenance period)

	2000	2001	2002	2003	2004
Transferable balances held at the central bank	1.56	1.71	1.85	1.96	2.07
of which:					
required reserves <sup>1</sup>	1.42	1.55	1.68	1.82	2.00
free reserves	0.14	0.15	0.17	0.15	0.07
Transferable balances held at other banks <sup>2</sup> <i>Memo:</i>	255.87	297.58	361.61	408.02	497.10
Institutions' borrowing from the central bank <sup>3</sup> of which:	nav	nav	21.93	26.40	35.29
intraday	nav	nav	8.95	9.02	12.16
overnight and longer	11.93	14.39	12.98	17.38	23.13

<sup>&</sup>lt;sup>1</sup> On 1 June 1998 a statutory scheme came into effect whereby both banks and building societies with average eligible liabilities of GBP 400 million or more are required to hold non-interest-bearing deposits with the Bank of 0.15% of their eligible liabilities in excess of GBP 400 million. <sup>2</sup> Includes some time deposits. <sup>3</sup> Banks borrow from the Bank of England mainly through two-week repo transactions in gilts, Treasury bills and eligible euro securities. Funds obtained in this way may be used for payment purposes.

This table contains all customer transactions. It also, for a number of instruments, includes banks' own account transactions where these cannot be identified separately (see further footnotes). Includes Northern Ireland (estimated) and Scotland; also includes some data and/or estimates of inter-branch and in-house processed items. Includes inter-branch paper credit transfers plus some in-house automated transactions (including some transactions on banks' own accounts). Customer transactions only. Does not include data for cards with a "credit and charge" facility. This data is included in the cards with a "delayed debit function" category. Includes inter-branch cheques and estimates of in-house processed cheques; this will also include some own account items. Includes foreign issued cards used in the United Kingdom. Includes all ATM transactions; a further breakdown is not available.

The Federal Reserve Board of Governors is the central bank. The Board of Governors is located in Washington DC and there are 12 district banks located in Atlanta, Boston, Chicago, Cleveland, Dallas, Kansas City, Minneapolis, New York, Philadelphia, Richmond, St. Louis and San Francisco. <sup>2</sup> Includes 12 Reserve Bank head offices. Some branches no longer provide payment services. A small number of additional regional offices provide check or cash services to depository institutions. <sup>3</sup> Banks in this table include depository institutions which are similar in meaning to deposit-taking institutions. <sup>4</sup> Prior to 2003, does not include the number of credit union branches or offices. <sup>5</sup> Does not include head offices. <sup>6</sup> Note that this definition differs from the definition of transferable deposits reported in Table 2. <sup>7</sup> Includes state and federal savings banks, savings and loan associations and cooperative and industrial banks. <sup>8</sup> Includes credit balances as well as total transaction accounts.

Sources: Federal Reserve; Office of Thrift Supervision; US Treasury.

Cheques <sup>9</sup>	41,900.0	40,130.0	38,370.0	36,600.0	34,830.0

<sup>&</sup>lt;sup>1</sup> Includes payments by banks for their own account. <sup>2</sup> Volume of Fedwire funds transfers. Does not include securities transfers over Fedwire. <sup>3</sup> Includes an estimate of the number of "on us" payments. A study conducted by the Federal Reserve estimated that the number of "on us" ACH credit payments was 635 million in 2003; other figures are deduced from this estimate. <sup>4</sup> Includes an estimate of the number of "on us" payments. A study conducted by the Federal Reserve estimated that the number of "on us" ACH debit payments was 781 million in 2003; other figures are deduced from this estimate. <sup>5</sup> Includes payments within the United States using cards issued inside and outside the United States. <sup>6</sup> Includes PIN-based (online) and signature-based (offline) transactions. Studies conducted by the Federal Reserve estimated that the number of debit card payments were 8,300

2000 and 15,600 million in 2003. The figures in the table differ from the Federal Reserve estimates, but are provided to allow a consistent time series.

7 Includes figures for Visa, MasterCard, Discover, American Express, Diners Club and retailer and oil company cards. Studies conducted by the Federal Reserve estimated that the number of credit card payments were 15,600 million in 2000 and 19,000 million in 2003. The figures in the table differ from the Federal Reserve estimates, but are provided to allow a consistent time series.

8 E-money products have not been widely adopted in the United States. In this reporting period, e-money transaction terminals, volume and value are negligible relative to other card instruments.

9 Annual number of paid cheques including commercial cheques, US Treasury cheques and postal money orders. Studies conducted by the Federal Reserve estimated the number of paid cheques in 1995, 2000 and 2003; other figures are derived from these estimates.

#### Footnotes for Tables PS1-4a

Canada: <sup>1</sup> Final settlement occurs at 19:30. However, due to the risk controls in place, the LVTS provides intraday settlement finality. <sup>2</sup> No standard hours.

**Germany:** <sup>1</sup> 07:00 for credit transfers; 09:00 for direct debits and electronic cheque transfer. <sup>2</sup> Introduction of RTGS<sup>plus</sup> on 5 November 2001 and close down of ELS and EAF. ELS serves, along with SWIFT, as a means of communication to RTGS<sup>plus</sup> only.

Hong Kong SAR: 1 Central Monetary Authority.

Japan: <sup>1</sup> Obligations between participants are replaced with those between participants and Tokyo Bankers Association, which are subject to bilateral netting. <sup>2</sup> Prices are set on the principle that the institutions that are to benefit from online processing should pay the relevant fees. <sup>3</sup> Closing time is 19:00 for participants who have applied for access to the extended hours, and 17:00 for others. <sup>4</sup> With the consent of the receiving bank, third party orders may be entered for same day settlement until the closing time of the system. <sup>5</sup> Bills and checks for sorting at the clearing house must be submitted by 21:00 of the day before the value date. <sup>6</sup> Number of online participants. <sup>7</sup> Includes CLS Bank, which participates only in gross settlement mode, and which is counted as a direct participant in this table. <sup>8</sup> Securities firms, securities finance companies, money market brokers, and government-affiliated financial institutions.

Netherlands: 1 In principle; sometimes less.

**Singapore:** <sup>1</sup> Where they differ, times for Saturdays are shown in brackets. <sup>2</sup> MEPS does not impose a cut-off time for third-party/international correspondents' payments, but the Association of Banks in Singapore (ABS) bye-laws on MEPS require all such payments to be made by 17:30 on Mondays-Fridays and 12:30 on Saturdays. <sup>3</sup> On weekend transaction submissions, settlement occurs on the following Monday.

**Sweden:** <sup>1</sup> No same day transaction. <sup>2</sup> Payments become final on completion of settlement, which occurs throughout the day. <sup>3</sup> The settlement points for the different flows are spread out between 07:15 and 16:20. <sup>4</sup> The settlement points for the different flows are spread out between 07:15 and 15:20.

Switzerland: <sup>1</sup> R for remote members. <sup>2</sup> The system is open for input 24 hours a day. Settlement services are limited by the indicated opening and closing times. A value day starts at 17:00 local time on the previous business day and ends at 16:15 on the value day. Third-party payments may be entered for same day settlement until 15:00. Between 15:00 (cutoff 1) and 16:00 (cutoff 2) only cover (bank-to bank) payments are accepted for same day settlement. From 16:00 to 16:15 transactions are restricted to the processing of lombard credits (collateralised loans from the Swiss National Bank at a penalty rate).

**United Kingdom:** <sup>1</sup> In net settlement, the payment becomes final and irrevocable when the payment has had an effect on the bilateral net position.

**United States:** <sup>1</sup> Local times are Eastern time. <sup>2</sup> CHIPS, the Clearing House Interbank Payments System, is operated by CHIPCo, which is owned by the Clearing House (formerly known as the New York Clearing House Association). <sup>3</sup> Any depository institution, including a US branch or agency of a foreign bank, may maintain an account with a Federal Reserve Bank. To obtain an account, an institution must execute an account agreement pursuant to Operating Circular 1 (Account Relationships), which outlines the terms and conditions for a master account. An institution with an account at a Federal Reserve Bank may access Fedwire subject to the conditions detailed in Federal Reserve Operating Circular 6 and the Federal Reserve Board's Policy Statement on Payment System Risk. <sup>4</sup> Payments over CHIPS become final on completion of settlement, which occurs throughout the day. <sup>5</sup> Trading occurs among dealers for funds on deposit at Federal Reserve Banks (ie federal funds) as early as 06:30. <sup>6</sup> Number of depository institutions that used the Fedwire Funds Transfer Service in 2004. Other Fedwire Funds Transfer participants not included here are: the US Treasury and any entity specifically authorised by federal statute to use the Reserve Banks as fiscal agents or depositories; entities designated by the Secretary of the Treasury; foreign central banks, foreign monetary authorities, foreign governments and certain international organisations. <sup>7</sup> Data prior to 2003 are revised to correspond to the 2004 figure.

**European Union**: <sup>1</sup> STEP2 payments are settled in EURO1 at 07.30 CET. <sup>2</sup> Sum of the participants to the national payment systems that are part of TARGET.

#### Footnotes for Tables SSS1-4

Germany: 1 Introduction of a central counterparty (Eurex Clearing (Equities)) in April 2003. 2 Mixture of DVP 2 and DVP3 (securities disposition on a gross basis without finality until final settlement of net cash position). <sup>3</sup> For DVP (delivery versus payment) transactions. For FOP (free of payment) transactions.

Japan: 1 Commercial paper, convertible bonds, preferred equity securities, investment securities and beneficiary certificates of investment trusts. <sup>2</sup> Cash leg of exchange transactions is settled via a network of cash settlement banks consisting of commercial banks and the Bank of Japan, while that of other transactions is settled at the Bank of Japan.

**Netherlands:** <sup>1</sup> For DVP (delivery versus payment) transactions. <sup>2</sup> For FOP (free of payment) transactions.

**Singapore:** <sup>1</sup> By mutual agreement between counterparties.

**United States:** <sup>1</sup> NBES is the Federal Reserve's National Book-Entry System. <sup>2</sup> Eastern time.

**Annexes** 

#### Statistical methodology for the country tables

General

Exceptions Data in the tables conform to this methodology unless indicated otherwise

in the table concerned.

However, it should be noted that varying methods of collecting data can

also complicate cross-country comparisons.

Breaks in series Where these occur, they are indicated by a footnote.

Sources of data These are indicated under the table concerned where it is felt appropriate.

Definitions Definitions in the tables which are not given in this methodology are based on "A glossary of terms used in payments and settlement systems",

revised version, January 2001 (http://www.bis.org/publ/cpss00b.htm).

Where necessary, footnotes to individual tables explain the country-specific definitions, eg of "banks". (Note that in general the term "banks" should be broadly construed according to local regulations so as to include all relevant financial institutions, eg "credit institutions" in EU countries.)

Intrabank items These are included as appropriate except where indicated.

Foreign currencies are not included in the figures unless otherwise

indicated.

Time period Each table indicates the period (eg year) or point of time (eg end-year) for

which the data are presented. These data are the total for that period

unless the table explicitly indicates otherwise (eg a daily average).

Estimated data Where data are broadly estimated and thus only indicative, this is indicated

in a footnote (except for population and GDP in Table 1 and data in Tables

7 and 8, where it is taken for granted that the data are estimated).

Seasonal adjustment Figures are not seasonally adjusted unless otherwise indicated.

"nap", "nav", "nya", "neg"

and "0"

Where data are not applicable, this is indicated by "nap". Where data are not available, this is indicated by "nav". Where data are not yet available, this is indicated by "nya". Where data are very small (relative to other relevant data in the table concerned), this is indicated by "neg". Where data mean exactly zero or none, rather than being a small number rounded

to zero, this is indicated by "0".

#### Table 1: Basic statistical data

Population Figures are averages for the year (computed as the average of two point

values at the start and end of the year, or otherwise).

GDP Figures are nominal (not real).

GDP per capita This figure equals the GDP figure divided by the population figure.

CPI inflation Changes in the price of consumer goods and sevices (yearly averages of

monthly values), in per cent.

Exchange rate (domestic currency vis-à-vis USD) Provided both as a year-end value and as an average for the year.

#### Table 2: Settlement media used by non-banks

Notes and coin (or currency) in circulation outside banks

Notes and coin represent the value of cash in circulation in the economy. This excludes the value of banknotes and coins kept in vaults at central banks or at banks (see Table 4) but includes the value held by non-residents. This also excludes commemorative coins that are not used for payments. When included, this is mentioned in a footnote.

Transferable deposits

These are transferable deposits which are convertible into currency and/or can be used to make cashless payments using one of the instruments mentioned in Tables 7 and 8. They include, when relevant, the overnight overdrafts on these accounts. They also include deposits in foreign currencies when these are included in M1. If they are not included in M1, they are included under the separate item *transferable deposits in foreign currencies*.

Other

Filled in only if narrow money supply (M1) includes items other than notes and coin and transferable deposits.

Narrow money supply (M1)

Cash in circulation and transferable deposits held by non-banks including non-residents. This line has not been filled in by countries which no longer calculate this aggregate. When the national definitions of narrow money supply and/or of M1 differ, a footnote is included.

Outstanding value on e-money storages

The difference between the value of cash loaded onto a card, a personal or central computer or server and the value spent. This value is issued against a payment to the issuer in advance and is widely accepted as a means of payment by parties other than the issuer. The value of electronic money held by credit institutions other than the issuer is included, unless otherwise specified.

#### Table 3: Settlement media used by banks

Transferable balances held at the central bank

Deposits held by banks at the central bank which can be used for payment purposes, regardless of the type of account (eg current account, reserve account, settlement account, clearing account).

of which: required reserves

free reserves

Funds that banks are required to hold at the central bank. If only part of the required reserves can be used for payment purposes, that amount is indicated here.

Funds held voluntarily at the central bank that can be used for payment purposes.

Transferable balances held at other banks Deposits held at other banks in the country (not at the central bank) which are convertible into currency and/or can be used for payment purposes.

Institution' borrowing from the central bank: intraday

Credit extended by the central bank for a period of less than one business day. It is calculated as the average of the daily maximum value of simultaneous intraday overdraft positions or drawings on intraday credit facilities during the day for the aggregate of all banks, over the opening days of the interbank payment system.

overnight and longer

Credit extended by the central bank (in the forms defined in a footnote by the respective country) which can be used for payment purposes, excluding intraday credit. It is calculated as the average of the daily total value for the aggregate of all banks, over the opening days of the interbank payment system.

#### Table 4: Banknotes and coin

Total banknotes and coin in circulation

Value of banknotes and coin excluding those kept in vaults at central banks or at treasury departments (but including those held at banks). Commemorative coins that are not commonly used to make payments are excluded.

Total banknotes in circulation

Value of banknotes which are part of the liabilities of the central bank; a breakdown by denomination is provided.

Total coin in circulation

Value of coin; a breakdown by denomination is provided.

Banknotes and coin in circulation held by banks

Banknotes and coin in banks' vaults and thus not in circulation among the public.

Banknotes and coin in circulation outside banks

Total banknotes and coin in circulation less banknotes and coin held by banks (identical to notes and coin in Table 2).

## Table 5: Institutions offering payment services to non-banks

Categories

Categories of institutions are based on the individual countries' own financial systems. Particular categories are explained in a footnote where this is felt to be necessary. As a rule, subsidiaries of foreign banks with legal personality in the reporting country are counted alongside domestic banks. The same holds for the post office when it is recognised as a bank by the national jurisdiction.

Branches of foreign banks

All places of business located in the reporting country of banks located in other countries, which have no legal personality, and which carry out all or some of the transactions inherent in the business of banking.

Banks which are foreign-owned or are subsidiaries of foreign banks are not included here, but together with domestic banks.

Other institutions offering payment services

Non-banking institutions offering payment services to non-banks, such as the post office (when it is not considered as a bank), money remitters, card schemes or public authorities when they offer such services. Whenever possible, the type of institutions included are mentioned.

In some countries, information for some or all of these institutions is not available, or is restricted to transaction data (which is shown in Tables 6 to 8). In such cases, Tables 6 to 8 may include information from a larger range of service providers than those mentioned in Table 5; if required, an explanatory footnote is given.

Number of institutions

Any institution which offers payment services is mentioned even if it does not hold deposits for customers (eg since the money transferred is given in cash by the customer to the institution, or debited from a sight account held at another institution). Each institution is counted once, irrespective of the number of branches or offices it holds in the country.

Number of branches or offices

All places of business of an institution that offer cashless payment services to non-banks. The head office of the institution is counted as an office if it offers such services. Mobile offices are excluded.

Number of accounts

The number of accounts on which payments (see definitions in Tables 7 and 8) can be made. This excludes savings accounts; it may include time deposits if they can be debited directly.

The only accounts mentioned here are those which:

- are held by deposit-taking institutions for non-deposit-taking institutions and individuals; and
- can be debited directly using one of the instruments mentioned in Tables 7 and 8.

offering payment services.

This amount differs from Table 2, as that table also contains deposits held at institutions which do not offer payment services (eg money market

funds).

Electronic money institutions

An undertaking or any other legal person, other than a bank, which issues means of payment in the form of electronic money.

Outstanding value on e-money storages

The value of e-money issued by electronic money institutions and held by entities other than the issuer, including banks other than the issuer.

This figure differs from that in Table 2, as that table also contains outstanding value on e-money storages issued by banks.

### Table 6: Payment card functions and accepting devices

Methodological clarifications with respect to cards:

A card which has several functions is counted in each relevant line. Therefore, in general, these figures should not be added for risk of double-counting.

Cards are counted on the issuing side. Each country reports the number of cards that have been issued in the country (and used for transactions within and outside the country of issue) and not the number of cards used in the country.

All valid cards are included, irrespective of when they were issued and how actively they are used. Expired or withdrawn cards are not included. Cards issues by three-party schemes, eg American Express or Diners, are included. Cards issued by merchants are not included in the standard categories, unless they have been issued in cooperation with a bank. When relevant, they can be included under the memorandum item "Retailer cards".

Cards with a cash function

Cards enabling the holder to withdraw cash from a cash dispenser or to deposit cash.

Cards with a debit function

Cards which enable the holder to have its purchases directly charged to funds on its account at a deposit-taking institution (may sometimes be combined with another function, such as that of a cash card or cheque guarantee card). The number of cards with a debit function presents the total number of cards in circulation, not the number of accounts to which the cards are linked.

If it is not possible to distinguish between cards with a debit function and cards with a delayed debit function, they are reported under the category *Card with a debit or a delayed debit function*.

Cards with a delayed debit function

Cards making it possible for its user to charge his account up to an authorised limit. These cards allow holders to make purchases, but do not offer extended credit, the full amount of the debt incurred having to be settled at the end of a specified period.

If it is not possible to distinguish between cards with a delayed debit function and cards with a debit function or cards with a credit function, they are respectively reported under the categories Card with a debit or a delayed debit function and Card with a credit or a delayed debit function.

Cards with a credit function

Cards indicating that the holder has been granted a line of credit. They enable the holder to make purchases and/or draw cash up to a prearranged ceiling. The credit granted may be settled in full by the end of a specific period, or may be settled in part, with the balance taken as extended credit. Interest is charged on the amount of extended credit and the holder is sometimes charged an annual fee.

214

If it is not possible to distinguish between cards with a credit function and cards with a delayed debit function, they are reported under the category *Card with a credit or a delayed debit function.* 

Cards with an e-money function

Reloadable multipurpose prepaid cards which can be used at the sites of several service providers for a wide range of purposes and which have the potential to be used on a national or an international scale, but may sometimes be restricted to a certain area.

Cards with an e-money function which have been loaded at least once These cards can be considered as activated. The loading may be interpreted as an indicator of the intention to use the e-money function.

Retailer cards

Cards issued by non-banking institutions (merchants) for use at specified retail outlets. May function as cards with a debit, delayed debit or credit function.

If the retailer cards have been issued in cooperation with a bank (cobranding) they are included according to the function(s) available on the card; whenever possible these cards are specified as a sub-item.

Non-co-branded cards can be included as a memorandum item or as a footnote.

#### Methodological clarifications with respect to terminals:

ATMs with several functions (eg cash dispensing and credit transfer function) are counted in each relevant line. Therefore, in general, these figures should not be added for risk of double-counting.

For some countries, there may be a double-counting if the number of ATMs when the data are reported per card issuer or per card scheme, and the same ATM is reported under several schemes; if required, an explanatory footnote is given.

ATMs (Automated Teller Machines)

Electromechanical devices allowing authorised users, by using a payment card, to withdraw cash from their account and in some cases to access a range of other services, such as balance enquiries, transfers of funds and acceptance of deposits. The ATM may be operated online (with real-time reference to an authorisation database) or offline.

ATMs with a cash withdrawal function

ATMs allowing their users, by using a card with a cash function, to withdraw cash from their accounts.

ATMs with a credit transfer function

ATMs allowing their users, using a payment card, to make credit transfers.

POS (Point-of-Sale)

This term refers to the use of payment cards at a retail location. The payment information is captured either by paper vouchers or by electronic terminals. Each single terminal is counted separately, independent of the existence of several terminals within one merchant location. Countries reporting each merchant location as one terminal will specify this in a footnote.

EFTPOS (Electronic Funds Transfers at Point-Of-Sale) A terminal at a retail location which is designed to capture, and in some cases also transmit, debit card transactions by electronic means. Each single terminal is counted separately, independent of the existence of several terminals within one merchant location. Countries reporting each merchant location as one terminal will specify this in a footnote.

E-money card terminals

Terminals allowing the transfer of e-money between the issuer of e-money and the holder of an e-money card, or between the holder of an e-money card and a beneficiary.

E-money card loading/unloading terminals Terminals allowing the transfer of electronic value from an issuer of electronic money to the holder of a card with an e-money function and vice-versa (unloading).

## E-money card payment terminals

Terminals located at point of sale that permit the holder of e-money to transfer e-money value from his e-money card to the balance of the merchant or other beneficiary. Each single e-money accepting terminal is counted separately, independent of the existence of several terminals within one merchant location. Countries reporting each merchant location as one terminal will specify this in a footnote.

# Tables 7 and 8: Indicators of the use of payment instruments and terminals by non-banks (volume and value of transactions)

The objective of these tables is to estimate the volume and the value of cashless payment instruments used in the country concerned. Figures concerning only a sample of banks or customers should be extrapolated to provide figures covering the whole volume and value of cashless payment instruments used in the country. Only customer transactions are included; interbank and bank's own transactions are excluded.

Transfers between accounts in the same name are only included when these accounts are at different banks. Transfers between accounts in the same name at the same bank are not included, unless indicated otherwise.

In the case of cross-border payments, there is a need to avoid double-counting (ie in the country of the originator and in that of the beneficiary). Cross-border cashless payments are accordingly counted in the country of the originator. Card payments and e-money payment transactions are counted at the issuing side. Only transactions with cards or e-money storages issued in the country are counted. For these cards and storages all transactions, within and outside the country, are reported.

#### Methodological clarifications with regard to payment instruments:

#### Credit transfers

A payment order or possibly a sequence of payment orders made for the purpose of placing funds at the disposal of the beneficiary. Both the payment order and the funds move from the payer's bank to the payee's bank, possibly via several other banks as intermediaries and/or one or more interbank funds transfer system. Payment are counted at the payer's side.

Credit transfers performed via ATMs with a credit transfer function are included. Credit transfers which have cash at one or both ends of the payment transaction, eg money and postal orders, are also included. Credit transfers used to settle balances of cards with a credit or a delayed debit function are included, as these are separate payments from the card holder to the card issuer. Credit to the account of a customer by simple book-entry without the use of the credit transfer instrument (eg dividend or interest payments by the account-holding bank) are included.

Cash payments into the account using a bank form are not included under credit transfers, but can be shown in a memorandum item *OTC cash deposits*.

In the case of standing orders and in the case of bulk or batch payment orders, each individual transaction is counted as one transaction.

The categories *paper based* and *non-paper based* are mutually exclusive.

## paper based

Credit transfers which are submitted on paper-based forms. Includes sumission by telefax if they require manual intervention to be transformed into electronic payments.

#### non-paper based

Credit transfers which are submitted without the use of paper-based forms, eg electronically or via telephone. Includes submission by telefax if they do not require manual intervention to be transformed into electronic payments. Includes standing orders which are originally submitted in paper-based form, but then executed electronically. Includes credit transfers initiated at an ATM.

#### Direct debits

Preauthorised debits, possibly recurrent, of the payer's account by the payee. Both one-off and recurrent direct debits are included. In the case of recurrent direct debits, each individual payment is counted as one transaction. Direct debits used to settle balances of cards with a credit or delayed debit functions are included, as they are separate payments from the card holder to the card issuer. Direct debits resulting from the settlement of an individual card transaction should not be reported for risk of double-counting.

Payments are counted at the payee's side. Debits from the account of a customer by simple book-entry transfer without the use of the direct debit instrument (eg banking fees or loan repayments to the account-holding bank) are included, since they also represent payments.

Cash payments out of the account using a bank form are not included, but may be shown under the memorandum item *OTC cash withdrawals*.

Card payments with cards issued in the country

Payment transactions performed with cards with a debit, credit or delayed debit function at a terminal or via other channels. E-money transactions and mobile payments are not included. For the breakdown of cards by category, see Table 6. These sub-categories are mutually exclusive. Only payments are included. Cash withdrawals/deposits at ATMs or credit transfers at ATMs are not included. Cash advances at POS terminals are also excluded, when it is possible to distinguish them. Payments by phone and over the internet using a card are included. Payments with retailer cards are excluded, except when the retailer card was issued in cooperation with a credit institution. For countries with significant business with retailer cards, a memorandum item or a footnote can be included.

E-money payment transactions

Transactions where the holder of e-money transfers e-money value from his balance to the balance of the merchant, either by an e-money card or through other e-money storages.

Cheques

A written order from one party (the drawer) to another (the drawee, normally a bank) requiring the drawee to pay a specified sum on demand to the drawer or to a third party specified by the drawer. Cheques may be used for settling debts and withdrawing money from banks. Traveller's cheques, eurocheques, promissory notes and banker's drafts are included under cheques. Commercial bills are included if funds transfers can be made on the basis of these, without using another medium.

Cash withdrawals using bank forms are not included.

Cheques are counted on the payee's side when submitted for cheque clearing. Cheques issued but not submitted for clearing are not included.

Other payment instruments

Includes payment instruments that exist in some countries and cannot be included in any of the other categories. These could be, for example, bills of exchange, included truncated bills of exchange. Mobile payments are not included, unless specified otherwise. A footnote states which payment instruments are included.

Total The sum of the above items.

## Methodological clarifications with regard to terminals:

Transactions at ATM, POS and e-money loading/unloading terminals are reported in three dimensions according to the location of the terminal and the country of issue of the card used.

ATM cash withdrawals

Cash withdrawals performed at ATMs using a card with a cash function. Cash advances at POS terminals using a debit, credit or delayed debit card are not included, but are reported under *POS transactions*. If it is possible to distinguish them, they are, in addition, reported as a memorandum item *Cash advances at POS terminals*.

ATM cash deposits Cash deposits performed at ATMs using a card with a cash function.

POS transactions Transactions performed through POS terminals using a card with a debit,

delayed debit or credit function. Cash advances at POS terminals are included. If it is possible to distinguish them, they are, in addition, reported

in a memorandum item Cash advances at POS terminals.

e-money card loading/unloading transactions Transactions allowing the transfer of e-money value from an issuer of electronic money to a holder's card with an e-money function and vice versa. Both loading and unloading transactions are included.

# Tables 9 and 10: Payments processed by selected interbank funds transfer systems (volume and value of transactions)

With regard to the volume and value of transactions, each payment instruction is counted once (not twice, ie the debit from the payer's account and the credit to the payee's account are not counted separately).

Funds transfer systems (FTS)

Formal arrangements based on private contract or statute law with multiple membership, common rules and standardised arrangements for the transition and settlement of money obligations arising between the members.

Interbank Funds Transfer Systems (IFTS) Transfer systems in which most (or all) direct participants are credit institutions and which are used primarily to process cashless payments.

As a rule, all IFTSs with significant business for the country are mentioned here, both those managed by the central bank and those managed by private operators.

Figures are provided system by system, with categories of various payment instruments when relevant (such as cheques, direct debits, credit transfers, ATM transactions, card payments, e-money transactions etc) as sub-items.

Concentration ratio

Market share of the five largest senders of payment messages in each system. This may include the central bank.

in terms of volume/value

The five largest senders of transactions in terms of volume may differ from the five largest senders in terms of value. Each participant which has individual access to the system is counted separately, irrespective of whether there is a legal link (eg merger) between two or more participants.

Card payments

All card payments processed in the IFTS are reported, irrespective of where the card was actually issued or used.

Cross-border transactions are counted in the country where the transaction originates in order to avoid double-counting (this differs from Tables 7 and 8, where card payments are reported in the acquiring country). Whenever received transactions are available, they can be reported as a memorandum item.

# Tables 11a and 11b: Instructions handled by trading platforms, clearing houses and securities settlement systems (volume and value of transactions)

Figures are provided separately for each trading platform, clearing house and securities settlement system, with categories of various securities (such as government securities, bonds, shares, certificates of deposit (CDs), futures and options) as sub-items.

Transfer instructions comprise all transfer instructions entered into the trading platform, clearing house or securities settlement system (including deliveries free of payment). As regards options, all contracts are included.

As far as CDs are concerned, transactions should be considered regardless of their issuers (banks, central bank, mortgage institutions).

Each transaction is counted once (not twice for sale and purchase). It is the transaction itself that is counted and not the double message notifications.

Trading platform An infrastructure or mechanism aimed at facilitating securities transactions

between those who wish to buy and sell. A trading platform could be a legal entity recognised as an exchange or an integrated part of a stock

exchange.

Clearing houses A department of an exchange or a separate legal entity which provides a

range of services related to the clearing and settlement of transactions and payments and to the management of risks associated with the resulting contracts. In many cases, the clearing house acts as the central

counterparty.

Securities settlement systems (SSS)

Transfer systems which settle transfer instructions for both securities and funds. As a rule all SSS are mentioned here, not only those managed by

the central bank, but also those managed by private operators.

# Table 11c: Number of participants in trading platforms, clearing houses and securities settlement systems

Figures are provided separately for each trading platform, clearing house and securities settlement system, with categories of various participants (such as banks and stockbrokers) as sub-items.

### **Table 11d: Outstanding securities**

Volume and value of securities which have been issued; volume and value of securities which have been registered.

#### Table 12: Participation in SWIFT by domestic institutions

These figures are provided by SWIFT. Totals and their components (members, sub-members, participants) refer to "legal" users, ie users who have been approved by SWIFT's Board via the monthly Board Paper. "Live" users are those that have cutover and are connected on SWIFT.

Sub-members Domestic users sponsored by members abroad.

Participants Participants are not shareholders of SWIFT and their message traffic over

the network is restricted.

## Table 13: SWIFT message flows to/from domestic users

These figures are provided by SWIFT.

Category I Messages used by banks to transfer funds to an account of a customer

(ie messages relating to payments that are category I messages,

eg MT100 messages).

Category II Messages used by banks to transfer funds to an account of another bank

(ie messages relating to payments that are category II messages,

eg MT200 messages).

Domestic traffic Messages sent to/received from domestic users.

## Statistical methodology for the comparative tables

#### General

The Comparative tables are fully based on the Country tables, with the exception, to a certain extent, of the payment systems (PS) and securities settlement systems (SSS) tables. In this methodology, references to both Country and other Comparative tables are made in brackets, where [CT 1] indicates that the figures used in the Comparative table under consideration have been calculated with data from Country table 1. When figures can either be derived from a Country or from a Comparative table, only the reference to the Country table appears, as the figures presented there are considered to be the source of the Comparative tables. In some cases, however, reference is also made to other Comparative tables, because of repeated identical calculations. When calculations are identical for all or most items of a table, the full formula is only given once, while repetitions are indicated by "idem".

In all tables, figures are given for individual CPSS countries. A figure for the euro area is added to the individual countries' figure in Table 2. A figure for all CPSS countries is also calculated in Tables 1–15 (where this is statistically not relevant, this is indicated by "nap"). Where applicable, these totals or averages are expressed in or based on USD terms.

Henceforth, Comparative tables are simply referred to as Tables.

## Basic information: Banknotes and coin; institutions; transferable deposits

#### Table 1: Basic statistical data

Based on CT 1.

GDP Nominal figures, expressed in USD by dividing GDP in domestic currency

[CT 1] by the average exchange rate of the domestic currency vis-à-vis the

USD [CT 1].

Population Population [CT 1].

GDP per capita GDP in USD [Table 1] divided by population [CT 1].

Consumer price inflation CPI inflation [CT 1].

Exchange rate (domestic currency

Average and end-of-year exchange rates (domestic currency vis-à-vis USD) [CT 1].

(domestic currency vis-à-vis USD)

## Table 2: Banknotes and coin in circulation

Based on CT 4.

Total value Banknotes and coin (including banknotes and coin held at banks) [CT 4],

converted to USD by using the end-of-year exchange rate of the domestic

currency vis-à-vis USD [CT 1].

Value per inhabitant Total value in USD [Table 2] divided by population [CT 1].

Value as a percentage

of GDP

Total value [CT 4] divided by GDP [CT 1].

Value as a percentage

of narrow money

Total value [CT 4] divided by narrow money [CT 2].

#### Table 3: Transferable deposits held by banks

Based on CT 3.

Transferable balances held at the central bank

Total value Value of transferable balances held at the central bank [CT 3], converted to

USD by using the end-of-year exchange rate of the domestic currency

vis-à-vis USD [CT 1].

Value as a percentage

Value of transferable balances held at the central bank [CT 3], divided by

of GDP

GDP [CT 1].

Transferable balances held at other banks

Total value Value of transferable balances held at other banks [CT 3], converted to

USD by using the end-of-year exchange rate of the domestic currency

vis-à-vis USD [CT 1].

Value as a percentage

Value of transferable balances held at other banks [CT 3], divided by GDP

of GDP

[CT 1].

### Table 4: Institutions offering payment services to non-banks

Based on CT 5.

Number of institutions

Total number of institutions offering payment services to non-banks [CT 5].

Number per 1 million

inhabitants

Total number of institutions [CT 5] divided by population [CT 1].

Number of branches or offices

Total number of branches or offices [CT 5].

Number per 1 million

inhabitants

Total number of branches or offices [CT 5] divided by population [CT 1].

#### Table 5: Transferable deposits held by non-banks

Based on CT 5.

Total number of

Total number of accounts [CT 5].

accounts

Number of accounts per

inhabitant

Number of accounts [CT 5] divided by population [CT 1].

Total value of accounts [CT 5], converted to USD using the end-of-year

exchange rate [CT 1].

Value per inhabitant Total value of accounts in USD [Table 5] divided by population [CT1].

Value as a percentage

of GDP

Total value of accounts [CT 5] divided by GDP [CT 1].

## Payment instruments used by non-banks

## Table 6: Payment transactions by non-banks: Total number of transactions

Based on CT 7.

Total number of Total number of transactions with payment instruments [CT 7]. This is

transactions equal to the sum of the sub-items of Table 7.

Increase in the number Difference between total number of transactions with payment instruments of transactions

[CT 7] in the current and previous year, divided by that number for the

previous year, in per cent.

Total number of transactions with payment instruments [CT 7] divided by Number per inhabitant

population [CT 1]. This is equal to the sum of the sub-items of Table 7c.

Number per deposit account held by non-

Total number of transactions with payment instruments [CT 7] divided by transferable deposits [CT 2].

banks

#### Table 7: Use of payment instruments by non-banks: Number of transactions per payment instrument

Tables 7 and 7a-c are based on CT 7. The objective of these tables is to compare the volume of cashless payment instruments used in the countries concerned.

Credit transfers Credit transfers [CT 7]. Direct debits Direct debits [CT 7]. Cheques [CT 7].

Cheques

E-money payment transactions

E-money payment transactions [CT 7].

Card payments Card payments with cards issued in the country [CT 7].

... by cards with a debit

function

Payments by card with a debit function [CT 7].

... by cards with a delayed debit function Payments by card with a delayed debit function [CT 7].

... by cards with a credit

Payments by card with a credit function [CT 7].

function

### Table 7a: Use of payment instruments by non-banks: Relative importance of payment instruments

This table is based on CT 7 or on Table 7, in that it takes the figures concerning the use of payment instruments, in volume terms, and expresses them as a percentage of the total volume of payment instruments used by non-banks.

Credit transfers Credit transfers [CT 7] expressed as a percentage of total number of

transactions with payment instruments [CT 7].

Direct debits Idem for direct debits [CT 7]. Cheques Idem for cheques [CT 7].

E-money payment transactions

Idem for e-money payment transactions [CT 7].

Card payments Idem for card payments with cards issued in the country [CT 7]. ... by cards with a debit

Idem for payments by card with a debit function [CT 7].

function

... by cards with a delayed debit function

Idem for payments by card with a delayed debit function [CT 7].

... by cards with a credit

Idem for payments by card with a credit function [CT 7].

function

#### Table 7b: Use of payment instruments by non-banks: Increase in the number of transactions

This table is based on CT 7 or on Table 7, in that it takes the figures concerning the use of payment instruments, in volume terms, and calculates the year-on-year growth rate.

Credit transfers Difference between the volume of credit transfers [CT 7] in the current and

previous year, divided by that number for the previous year, in per cent.

Direct debits Idem for direct debits [CT 7].

Cheques Idem for cheques [CT 7].

E-money payment transactions

Idem for e-money payment transactions [CT 7].

... by cards with a debit

function

Idem for payments by card with a debit function [CT 7].

... by cards with a Idem for payments by card with a delayed debit function [CT 7]. delayed debit function

.... by cards with a credit function

Idem for payments by card with a credit function [CT 7].

### Table 7c: Use of payment instruments by non-banks: Number of transactions per inhabitant

This table is based on CT 7 or on Table 7, in that it takes the figures concerning the use of payment instruments, in volume terms, and expresses them as the number of transactions per inhabitant.

Direct debits Idem for direct debits [CT 7].

Cheques Idem for cheques [CT 7].

E-money payment transactions

Idem for e-money payment transactions [CT 7].

Card payments Idem for card payments with cards issued in the country [CT 7].

... by cards with a debit function

Idem for payments by card with a debit function [CT 7].

... by cards with a delayed debit function

Idem for payments by card with a delayed debit function [CT 7].

... by cards with a credit

Idem for payments by card with a credit function [CT 7].

function

#### Table 8: Payment transactions by non-banks: Total value of transactions

Based on CT 8.

Total value of Total value of transactions with payment instruments [CT 8], converted to transactions

USD using the average exchange rate [CT 1]. This is equal to the sum of

the sub-items of Table 9.

Increase in the real Difference between total value of transactions with payment instruments [CT 8] in the current and previous year, divided by that number for the value of transactions

previous year, deflated by CPI inflation in the current year [CT 1], in per

cent.

Average value per

transaction

Total value of transactions with payment instruments in USD [Table 8] divided by total number of transactions with payment instruments [CT 7].

Average value per

inhabitant

Total value of transactions with payment instruments in USD [Table 8]

divided by population [CT 1].

Value as a ratio to GDP Total value of transactions [CT 8] divided by GDP [CT 1].

Value as a ratio to deposits held by non-

banks

Total value of transactions [CT 8] divided by total value of deposit accounts

[CT 5].

### Table 9: Use of payment instruments by non-banks: Value of transactions per payment instrument

Tables 9 and 9a-e are based on CT 8. The objective of these tables is to compare the value of cashless payment instruments used in the countries concerned. These tables are based on the same general methodological guidance as Tables 7 and 7a-c.

Credit transfers Credit transfers [CT 8], converted to USD using the average exchange rate

[CT 1].

Direct debits Direct debits [CT 8]. Cheques Cheques [CT 8].

E-money payment transactions

E-money payment transactions [CT 8].

Card payments Card payments with cards issued in the country [CT 8].

... by cards with a debit

function

Payments by card with a debit function [CT 8].

... by cards with a delayed debit function Payments by card with a delayed debit function [CT 8].

Payments by card with a credit function [CT 8].

function

#### Table 9a: Use of payment instruments by non-banks: Relative importance of payment instruments

This table is based on CT 8 or on Table 9, in that it takes the figures concerning the use of payment instruments, in value terms, and expresses them as a percentage of the total value of payment instruments used by non-banks.

Credit transfers Value of credit transfers [CT 8] expressed as a percentage of total value of

transactions with payment instruments [CT 8].

Direct debits Idem for direct debits [CT 8]. Cheques Idem for cheques [CT 8].

E-money payment

transactions

Idem for e-money payment transactions [CT 8].

... by cards with a debit

function

Idem for payments by card with a debit function [CT 8].

... by cards with a delayed debit function

Idem for payments by card with a delayed debit function [CT 8].

... by cards with a credit

Idem for payments by card with a credit function [CT 8].

function

### Table 9b: Use of payment instruments by non-banks: Increase in the real value of transactions

This table is based on CT 8 or on Table 9, in that it takes the figures concerning the use of payment instruments, in value terms and in domestic currency, and calculates the year-on-year growth rate, deflated by CPI inflation.

Credit transfers Difference between the value of credit transfers [CT 8] in the current and

previous year, divided by that number for the previous year, deflated by

CPI inflation in the current year [CT 1], in per cent.

Direct debits Idem for direct debits [CT 8].

Cheques Idem for cheques [CT 8].

E-money payment

transactions

Idem for e-money payment transactions [CT 8].

Card payments Idem for card payments with cards issued in the country [CT 8].

... by cards with a debit

function

Idem for payments by card with a debit function [CT 8].

... by cards with a delayed debit function

Idem for payments by card with a delayed debit function [CT 8].

... by cards with a credit

function

Idem for payments by card with a credit function [CT 8].

## Table 9c: Use of payment instruments by non-banks: Average value per transaction

This table is based on CTs 7 and 8 or on Tables 7 and 9, in that it takes the figures concerning the use of payment instruments, in value terms, and divides them by the volume of this use.

Credit transfers Value of credit transfers [CT 8], converted to USD using the average

exchange rate [CT 1], divided by the volume of credit transfers [CT 7].

Direct debits Idem for direct debits [CT 8].

Cheques Idem for cheques [CT 8].

E-money payment transactions

Idem for e-money payment transactions [CT 8].

Card payments Idem for card payments with cards issued in the country [CT 8].

... by cards with a debit

function

Idem for payments by card with a debit function [CT 8].

... by cards with a Idem for payments by card with a delayed debit function [CT 8].

delayed debit function
... by cards with a credit

Idem for payments by card with a credit function [CT 8].

function

### Table 9d: Use of payment instruments by non-banks: Value of transactions per inhabitant

This table is based on CT 8 or on Table 9, in that it takes the figures concerning the use of payment instruments, in value terms, and expresses them as a value of transactions per inhabitant.

Credit transfers Value of credit transfers [CT 8], converted to USD using the average

exchange rate [CT 1], divided by population [CT 1].

Direct debits Idem for direct debits [CT 8].

Cheques Idem for cheques [CT 8].

E-money payment transactions

Idem for e-money payment transactions [CT 8].

... by cards with a debit

function

Idem for payments by card with a debit function [CT 8].

... by cards with a delayed debit function

Idem for payments by card with a delayed debit function [CT 8].

Based on CT 6.

Cards with a cash

function

Cards with a cash function [CT 6].

Cards with an e-money function which have

been loaded at least

once

Cards with an e-money function which have been loaded at least once

[CT 6].

Cards with a payment

function

Sum of cards with a debit function, cards with a delayed debit function and

cards with a credit function [CT 6].

Cards with a debit function [CT 6]. ... debit function

... delayed debit

function

Cards with a delayed debit function [CT 6].

If some countries cannot distinguish between cards with a credit and/or debit function and those with a delayed debit function, they are presented

under this item.

Cards with a credit function [CT 6]. ... credit function

### Table 10a: Cards issued in the country: Increase in the number of cards

This table is based on CT 6, in that it takes the figures concerning the number of cards and calculates the year-on-year growth rate.

Cards with a cash

function

Difference between cards with a cash function [CT 6] in the current and previous year, divided by that number for the previous year, in per cent.

Cards with an e-money function which have

been loaded at least

once

Idem for cards with an e-money function which have been loaded at least once [CT 6].

Cards with a payment

function

Idem for the sum of cards with a debit function, cards with a delayed debit

function and cards with a credit function [CT 6].

... debit function

Idem for cards with a debit function [CT 6].

... delayed debit

function

Idem for cards with a delayed debit function [CT 6].

... credit function Idem for cards with a credit function [CT 6].

## Table 10b: Cards issued in the country: Number of cards per inhabitant

This table is based on CT 6, in that it takes the number of cards and divides them by the country's population. It gives an indication of the penetration of cards in the population of different countries.

Cards with a cash

function

Cards with a cash function [CT 6] divided by population [CT 1].

Cards with an e-money function which have

been loaded at least

Idem for cards with an e-money function which have been loaded at least once [CT 6].

once

Cards with a payment

Idem for the sum of cards with a debit function, cards with a delayed debit

function

function and cards with a credit function [CT 6].

... debit function

Idem for cards with a debit function [CT 6].

... delayed debit function

Idem for cards with a delayed debit function [CT 6].

... credit function

Idem for cards with a credit function [CT 6].

## Table 11: Terminals located in the country: Number of terminals

Based on CT 6.

**ATMs** ATMs [CT 6].

POS terminals POS terminals [CT 6].

E-money E-money loading/unloading terminals [CT 6].

loading/unloading

terminals

E-money card payment

E-money card payment terminals [CT 6].

terminals

#### Table 11a: Terminals located in the country: Increase in the number of terminals

This table is based on CT 6, in that it takes the figures concerning the number of terminals and calculates the year-on-year growth rate.

Difference between ATMs [CT 6] in the current and previous year, divided **ATMs** 

by that number for the previous year, in per cent.

POS terminals Idem for POS terminals [CT 6].

Idem for e-money loading/unloading terminals [CT 6]. E-money

loading/unloading

terminals

E-money card payment Idem for e-money card payment terminals [CT 6].

terminals

#### Table 11b: Terminals located in the country: Number of terminals per 1 million inhabitants

This table is based on CT 6, in that it takes the number of terminals and divides them by the country's population. It shows the density of terminals, expressed in terms of population, in the different countries.

**ATMs** ATMs [CT 6] divided by population.

POS terminals Idem for POS terminals [CT 6].

E-money Idem for e-money loading/unloading terminals [CT 6].

loading/unloading

terminals

E-money card payment

terminals

Idem for e-money card payment terminals [CT 6].

#### Table 12: Transactions at terminals: Number of cash withdrawals and loading transactions

This table is based on CT 7. It gives an indication of the number of transactions conducted both at terminals located in and outside the country with cards issued in and outside the country.

Cash withdrawals at ATMs located in the country

with cards issued outside the country

Transactions at terminals in the country by cards issued outside the country: ATM cash withdrawals [CT 7].

with cards issued in the country

Transactions at terminals in the country by cards issued in the country: ATM cash withdrawals [CT 7].

ry ATM cash withdrawals [CT7]

Cash withdrawals at ATMs located outside the country

with cards issued in the country

Transactions at terminals outside the country by cards issued in the country: ATM cash withdrawals [CT 7].

E-money loading/unloading transactions at terminals in the country

with cards issued in the country

Transactions at terminals in the country by cards issued in the country: e-money loading/unloading transactions [CT 7].

## Table 12a: Transactions at terminals: Increase in the number of cash withdrawals and loading transactions

This table is based on CT 7 or on Table 12, in that it takes the figures concerning the use of cards, in volume terms, and calculates the year-on-year growth rate.

Cash withdrawals at ATMs located in the country

with cards issued outside the country

Difference between the number of *transactions at terminals in the country* by cards issued outside the country: ATM cash withdrawals [CT 7] in the current and previous year, divided by that number for the previous year, in per cent.

with cards issued in the country

Idem for transactions at terminals in the country by cards issued in the country: ATM cash withdrawals [CT 7].

Cash withdrawals at ATMs located outside the country

with cards issued in the country

Idem for transactions at terminals outside the country by cards issued in the country: ATM cash withdrawals [CT 7].

E-money loading/unloading transactions at terminals in the country

with cards issued in the country

Idem for transactions at terminals in the country by cards issued in the country: e-money loading/unloading transactions [CT 7].

#### Table 13: Transactions at terminals: Value of cash withdrawals and loading transactions

This table is based on CT 8 (the amounts have been converted to USD using the *average exchange rate* [CT 1]). It gives an indication of the value of card transactions conducted at terminals located in the country, either with cards issued in the country or with cards issued outside the country.

Cash withdrawals at ATMs located in the country

with cards issued outside the country

Transactions at terminals in the country by cards issued outside the country: ATM cash withdrawals [CT 8].

with cards issued in the country

Transactions at terminals in the country by cards issued in the country: ATM cash withdrawals [CT 8].

Cash withdrawals at ATMs located outside the country

with cards issued in the country

Transactions at terminals outside the country by cards issued in the country: ATM cash withdrawals [CT 8].

E-money loading/unloading transactions at terminals in the country

with cards issued in the country

Transactions at terminals in the country by cards issued in the country:

e-money loading/unloading transactions [CT 8].

## Table 13a: Transactions at terminals: Increase in the real value of cash withdrawals and loading transactions

This table is based on CT 8 or on Table 13, in that it takes the figures concerning the use of cards, in value terms, and calculates the year-on-year growth rate, deflated by CPI inflation.

Cash withdrawals at ATMs located in the country

with cards issued outside the country

Difference between the value of transactions at terminals in the country by cards issued outside the country: ATM cash withdrawals [CT 8] in the current and previous year, divided by that number for the previous year, deflated by CPI inflation in the current year [CT 1], in per cent.

with cards issued in the country

Idem for transactions at terminals in the country by cards issued in the country: ATM cash withdrawals [CT 8].

Cash withdrawals at ATMs located outside the country

with cards issued in the country

Idem for transactions at terminals outside the country by cards issued in the country: ATM cash withdrawals [CT 8].

E-money loading/unloading transactions at terminals in the country

with cards issued in the country

Idem for transactions at terminals in the country by cards issued in the country: e-money loading/unloading transactions [CT 8].

#### Table 14: Transactions at terminals: Number of payment transactions

This table is based on CT 7. It gives an indication of card payments conducted at terminals located in the country, either with cards issued in the country or with cards issued outside the country.

POS transactions at terminals located in the country

with cards issued outside the country Transactions at terminals in the country by cards issued outside the country: POS payment transactions [CT 7].

with cards issued in the country

Transactions at terminals in the country by cards issued in the country: POS payment transactions [CT 7].

POS transactions at terminals located outside the country

with cards issued in the country

Transactions at terminals outside the country by cards issued in the country: POS payment transactions [CT 7].

E-money payment transactions at terminals in the country

with cards issued in the country

E-money payment transactions by cards with an e-money function [CT 7].

## Table 14a: Transactions at terminals: Increase in the number of payment transactions

This table is based on CT 7 or on Table 14, in that it takes the figures concerning the use of payment and e-money cards, in volume terms, and calculates the year-on-year growth rate.

POS transactions at terminals located in the country

with cards issued outside the country

Difference between the number of transactions at terminals in the country by cards issued outside the country: POS payment transactions [CT 7] in the current and previous year, divided by that number for the previous year, in per cent.

with cards issued in the country

Idem for transactions at terminals in the country by cards issued in the

country: POS payment transactions [CT 7].

POS transactions at terminals located outside the country

with cards issued in the country

Idem for transactions at terminals outside the country by cards issued in the country: POS payment transactions [CT 7].

E-money payment transactions at terminals in the country

with cards issued in the country

Idem for transactions e-money payment transactions by cards with an

e-money function [CT 7].

#### Table 15: Transactions at terminals: Value of payment transactions

This table is based on CT 8 (the amounts have been converted to USD using the *average exchange rate* [CT 1]). It gives an indication of the value of card payments conducted at terminals located in the country, either with cards issued in the country or with cards issued outside the country.

POS transactions at terminals located in the country

with cards issued outside the country

Transactions at terminals in the country by cards issued outside the

country: POS payment transactions [CT 8].

with cards issued in the country

Transactions at terminals in the country by cards issued in the country:

POS payment transactions [CT 8].

POS transactions at terminals located outside the country

with cards issued in the country

Transactions at terminals outside the country by cards issued in the

country: POS payment transactions [CT 8].

E-money payment transactions at terminals in the country

with cards issued in the

E-money payment transactions by cards with an e-money function [CT 8].

country

#### Table 15a: Transactions at terminals: Increase in the real value of payment transactions

This table is based on CT 8 or on Table 15, in that it takes the figures concerning the use of payment and e-money cards, in value terms, and calculates the year-on-year growth rate, deflated by CPI inflation.

POS transactions at terminals located in the country

with cards issued outside the country

Difference between the value of transactions at terminals in the country by cards issued outside the country: POS payment transactions [CT 7] in the current and previous year, divided by that number for the previous year,

deflated by CPI inflation in the current year [CT 1], in per cent.

with cards issued in the country

Idem for transactions at terminals in the country by cards issued in the country: POS payment transactions [CT 7].

POS transactions at terminals located outside the country

with cards issued in the country

Idem for transactions at terminals outside the country by cards issued in the country: POS payment transactions [CT 7].

E-money payment transactions at terminals in the country

with cards issued in the country

Idem for e-money payment transactions by cards with an e-money function [CT 8].

### Interbank funds transfer systems (IFTS) and securities settlement systems (SSS)

## Table PS1: Features of selected interbank funds transfer systems

Figures are new and are not presented in the CTs. The first category, system, is presented in all PS

tables.

System All systems presented in CT 9.

Type Large-value payment system (L); retail payment system (R).

If the IFTS processes both types of payments, it is characterised as L+R.

Settlement Real-Time Gross Settlement (RTGS).

Net (N), of which multilateral netting (MN) and bilateral netting (BN).

*Gross* (*G*): other gross settlement.

Batch settlement (BA): settlement of batches in gross value without netting.

Owner/manager Central bank (CB), commercial banks (B) or a payment association (PA).

Processing Manual (M), automated clearing house (offline; ACH) or real-time

transmission (RTT).

Membership Open (any bank can apply; 0) or restricted (subject to criteria; R).

processed; C) or decentralised (more than one processing centre; D).

Pricing Costs passed on to payment system participants: full cost (F), including

investments with a view on cost recovery, *variable cost* (*V*), with a view on recovering the costs of transactions, *symbolic cost* (*S*), below variable cost,

or no cost(0).

Closing time for

same-day transactions

Latest time of the day at which transactions can be sent to the system for

settlement on the same day; in local time.

Settlement finality Real time in RTGS systems, intraday in prefunded net systems, or at

specific times of the day (in local time) in other net and gross systems.

Cut-off third-party orders Latest time of the day at which transactions can be sent by third party or

indirect participants to the system for settlement on the same day; in local

time.

Standard money market

hours

Opening and closing expressed in local time.

# Table PS2: Payments processed by selected interbank funds transfer systems: Number of transactions

Based on CT 9.

Number of transactions Total number of transactions per system [CT 9].

Increase in the number

of transactions

Difference between the *total number of transactions* per system [CT 9], for the current and previous year, divided by that number for the previous

year, in per cent.

#### Table PS3: Payments processed by selected interbank funds transfer systems: Value of transactions

Based on CTs 9 and 10.

Value of transactions Total value of transactions per system [CT 10], converted to USD using the

average exchange rate [CT 1].

Average value per

transaction

Total value of transactions per system [CT 10], converted to USD using the average exchange rate [CT 1], divided by total number of transactions per

system [CT 9].

Increase in the real value of transactions Difference between the total value of transactions per system [CT 9] in the current and previous year, divided by that number for the previous year, deflated by *CPI inflation* in the current year [CT 1], in per cent.

Value of transactions as a percentage of GDP

Total value of transactions per system [CT 10], divided by GDP [CT 1], in

per cent.

### Table PS4: Participation in selected interbank funds transfer systems

Concentration ratios come from CTs 9 and 10. Figures concerning participation in payment systems are new and are not presented in the CTs.

Total number of participants

Any institution that is identified/recognised by the system and which is allowed to send transfer orders to and to receive transfer orders from the system, either directly (as a direct participant) or indirectly (as an indirect participant).

... of which: direct participants

Any participant in a system that directly exchanges transfer orders with other participants in the system, without an intermediary. In some systems, direct participants also exchange orders on behalf of indirect participants.

Concentration ratio in terms of volume

Concentration ratio in terms of volume [CT 9], in per cent.

Concentration ratio in terms of value

Concentration ratio in terms of value [CT 10], in per cent.

#### Table PS4a: Participation in selected interbank funds transfer systems: Direct participants

Figures are new and are not presented in the CTs.

The central bank is a direct participant in the system when it directly Central bank

exchanges transfer orders with other participants in the system.

Banks Any institution recognised as a bank by the national jurisdiction, which is a

direct participant in the system.

Central, regional or local government, government agencies and other Public administration

(semi-) public institutions, which are direct participants in the system.

The postal institution is only counted separately when it i) participates Postal institution

directly in the system and ii) is not considered (and supervised) as a bank

(if this is the case, it is counted together with with other banks).

Clearing and settlement organisations

All clearing and settlement organisations which are direct participants in the system. Generally, retail and securities clearing and/or settlement organisations directly participate in the large-value funds transfer system in which the respective retail or securities transactions are finally settled. When the relevant settlement organisations are considered as banks, they can be counted either under "banks" or under "clearing and settlement organisations"; a footnote explains the choice made.

Other financial institutions

All other financial institutions that are under the supervision of the relevant authorities (either the central bank or the prudential supervisor), but are not

considered as banks.

Other

All other entities directly participating in the system.

#### Table SSS1: Features of selected securities settlement systems

Figures are new and are not presented in the CTs. The first category, *system*, is presented in all SSS tables.

System All SSS presented in CT 11a.

Type of securities Bonds (B), certificates of deposit (C), government securities (G), equity (E)

and/or other (O).

Owner/manager Central bank (CB), commercial banks (B), the stock exchange (SE) or

other (O).

Delivery lag (T+n) Time lag between entering into a trade/bargain and its discharge by the

final exchange of a financial asset for payment.

Settlement of cash leg Gross (G), net (N) or real-time gross settlement (RTGS).

Securities settlement

(delivery)

Final transfer of a security or financial instrument: it can either be gross

(G), net (N) or real-time gross settlement (RTGS).

DVP (Delivery Versus Payment) mechanism

A link between a securities transfer system and a funds transfer system that ensures that delivery occurs if, and only if, payment occurs.

In *DVP model 1*, transfer instructions for both securities and funds are settled on a trade-by-trade basis, with final transfer of securities from the seller to the buyer (delivery) occurring at the same time as final transfer of the funds from the buyer to the seller (payment).

In *DVP model 2*, securities transfer instructions are settled on a gross basis, with final transfer of securities from the seller to the buyer (delivery) occurring throughout the processing cycle, but funds transfer instructions are settled on a net basis, with final transfer of the funds from the buyer to the seller (payment) occurring at the end of the processing cycle.

In *DVP model 3*, transfer instructions for both securities and funds are settled on a net basis, with final transfer of both securities and funds occurring at the end of the processing cycle.

Intraday finality

Settlement finality achieved continuously or several times throughout the settlement day. Intraday finality can be provided through real-time settlement procedures and/or the settlement of the results of multiple batch processing during the settlement day (yes if the system offers intraday finality; no otherwise).

Closing time for same-day transactions

Latest time of the day at which transactions can be sent to the system for settlement on the same day; in local time.

Central Securities Depository Name of the Central Securities Depository (CSD).

A CSD is a facility (or an institution) for holding securities, which enables securities transactions to be processed by book entry. Physical securities may be immobilised by the depository or securities may be dematerialised (ie so that they exist only as electronic records). In addition to safekeeping, a central securities depository may incorporate comparison, clearing and settlement functions.

Cash settlement agent

The cash settlement agent, the *central bank* (*CB*), *commercial banks* (*B*), the *stock exchange* (*SE*) or *other* (*O*), settles the cash leg of the securities transaction.

#### Table SSS2: Transactions processed by selected securities settlement systems: Number of transactions

Based on CT 11a.

Number of transactions Total number of transactions per system [CT 11a].

Increase in the number of transactions

Difference between the *total number of transactions* [CT 11a] per system in the current and previous year, divided by that number for the previous

year, in per cent.

#### Table SSS3: Transactions processed by selected securities settlement systems: Value of transactions

Based on CTs 11a and b.

Value of transactions Total value of transactions per system [CT 11b], converted to USD using

the average exchange rate [CT 1].

Average value per

transaction

Total value of transactions per system [CT 11b], converted to USD using the average exchange rate [CT 1], divided by total number of transactions

per system [CT 11a].

Increase in the real value of transactions Difference between the total value of transactions per system [CT 11b] in the current and the previous year, divided by the total value of transactions [CT 11b] in the previous year, deflated by CPI inflation in the current year

[CT 1], in per cent.

Value of transactions as a percentage of GDP

Total value of transactions per system [CT 11b], divided by GDP [CT 1], in

per cent.

## Table SSS4: Participation in selected securities settlement systems

Based on CT 11c.

Total number of participants

Number of participants in securities settlement systems – total [CT 11c].

# Central bank officials involved in the preparation of this edition of the statistical update

National Bank of Belgium Mr Patrick Van den Eynde

Bank of Canada Mr Devin Ball

Mr Fred Daniel

European Central Bank Ms Rita Choudbury

Mr Javier Huerga

Ms Hundjy Preud'homme Mr Heiko Schmiedel Mr Jens Tapking Ms Anca Zimmermann

Bank of France Mr Frédéric Hervo

Ms Nelly Noulin Ms Chantal Guédé

Deutsche Bundesbank Mr Christian Stark

Ms Sylvia Tyroler

Hong Kong Monetary Authority Mr Esmond K Y Lee

Ms Esther Y M Pang

Bank of Italy Mr Luca Arciero

Mr Paolemilio Feleppa Ms Daniela Laudonia

Bank of Japan Mr Takeshi Shirakami

Mr Tomohiro Usui Ms Akiko Kobayashi Ms Megumi Takei

Netherlands Bank Mr Thijs Kettenis

Mrs Odette Min-Verlee

Mr Gwan Tjia

Monetary Authority of Singapore Mr Peng Hwee Terry Goh

Mr Wai Hoe Derek Chan Mr Eugene Tze Min Goh

Sveriges Riksbank Ms Gabriela Guibourg

Mr Anders Bjällskog

Swiss National Bank Mr Francesco Re

Bank of England Mr Roy Clive

Mr Chris Becher

Board of Governors of the Ms Samia Husain Federal Reserve System Mr Geoffrey Gerdes

Bank for International Settlements

Ms Elisabeth Ledrut

Mr Stephan Arthur

Ms Tiana Moren Jefferies
