Other BIS publications relating to payment and settlement systems	329

Note

It is important that the country tables are read in conjunction with the corresponding statistical methodology. Where the data provided are an exception to the methodology, this is indicated by in the table concerned. A second statistical methodology explains which data have been taken from the country tables for the comparative tables.

Notation used in this publication:

nap not applicable

- nav not available
- 0 exactly zero (not rounded to zero; country tables only)

Differences in totals are due to rounding.

Country tables

on software- or network-based products	nap	nap	nap	nap	nap

¹ Due to banknote migration, data are available only at an aggregated euro area level (see Euro area, Table 2). ² Value of overnight deposits held at Monetary Financial Institutions (MFIs) by non-MFIs (including "Central government" and "Rest of the world"). Due to a broader definition of counterparts, this indicator is not synonymous with the same term used in the ECB concept of narrow money supply M1.

Table 3

Settlement media used by banks

(EUR billions, average of last reserve maintenance period)

	2002	2003	2004	2005	2006

Memo:					
Transferable deposits in foreign currencies	30.62	35.10	35.57	35.78	35.92
Outstanding value on e-money storages ³	0	0	0	0	0

¹ Data have been revised from previous years. ² This is not equivalent to M1 in Canada. M1 consists of currency in circulation outside banks plus personal chequing accounts and current accounts at chartered banks. The figure for narrow money supply includes currency in circulation outside banks plus all deposits, notice or demand, that are held at any deposit-taking institution and which can be used to make payments. ³ E-money products have not been widely adopted in Canada. In this reporting period, values of e-money outstanding are negligible relative to other forms of settlement media.

Table 3

Settlement media used by banks

(CAD billions, average for December)

	2002	2003	2004	2005	2006
Transferable balances held at the central bank ¹	0.645	0.143	0.100	0.054	0.025
required reserves	nap	nap	nap	nap	nap
free reserves	0.645	0.143	0.100	0.054	0.025
Transferable balances held at other banks ² <i>Memo:</i>	5.166	6.133	7.161	7.815	8.720
Credit extended by the central bank: ³					
intraday ⁴	0	0	0	0	0
overnight	0.596	0.003	0	0.004	0.025
longer refinancing operations	0	0	0	0	0

¹ Lower balances in 2003 were largely attributable to the introduction of next-day settlement in the Automated Clearing and Settlement System (ACSS). ² Data have been revised from previous years. ³ Advances to the members of the Canadian Payments Association (CPA), made at the end of the day to facilitate settlement in Canada's large value payment system (LVTS) or ACSS; these advances are to be paid back on the following business day with interest. The decline in borrowing in 2003 was largely attributable to the introduction of next-day settlement in the ACSS. ⁴ Collateral associated with the operation of the LVTS is pledged to the Bank of Canada at the beginning of each day and is used to cover any participant's negative funds positions during the day. The Bank would provide the liquidity necessary (secured by this collateral) to allow the system to settle, in the event of a participant default.

¹ There are five branches but only the head office offers payment services. ² Figures represent accounts held at the Bank of Canada by CPA members for the settlement of the ACSS and LVTS. ³ Lower balances in 2003 were largely attributable to the introduction of next-day settlement in the ACSS. ⁴ Some foreign bank subsidiaries (legally incorporated banks in Canada that are owned by a foreign bank parent but will only show up on the consolidated balance sheet of the foreign parent) and foreign bank branches (included in the parent bank's individual balance sheet) are associated with the same parent bank. For the purposes of this table, each institution is recorded separately. ⁵ Data for 2004–05 have been revised. ⁶ Only a few operate nationwide; those companies that are members of the CPA are included.

Payment card functions and accepting devices¹

(thousands, end of year)

	2002	2003	2004	2005	2006

e-money card payment terminals	nav	nav	nav	nav	nav

¹ All figures are estimates. ² Data not available since 2000. ³ Data not available since 2003. E-money products have not been widely adopted in Canada. In this reporting period, the number of e-money cards and terminals is estimated to be negligible relative to other payment cards and terminals. ⁴ Credit transfer functions are, for the most part, limited to proprietary ATMs. Access to the credit transfer functions on these ATMs is restricted to the clients of the associated proprietary institution. ⁵ Figures represent those terminals with at least a debit function, and do not include terminals that only have a credit function; includes both shared and proprietary networks.

Indicators of the use of payment instruments and terminals by non-banks: volume of transactions¹ (millions, total for the year)

¹ The Canadian Derivatives Clearing Corporation (CDCC) is the issuer, central counterparty and guarantor of equity, index and interest rate financial derivative contracts traded on the Montreal Exchange. Transaction data is reported on a post-novation basis. ² Natural Gas Exchange Inc (NGX) is Canada's leading energy exchange and North America's largest physical clearing and settlement facility. Its operations allow the trading and clearing of natural gas and electricity contracts. NGX is based in Calgary, Alberta and is wholly owned by TSX Group Inc. All transaction data is reported on a post-novation basis. NGX also operates a centralised electronic trading platform for the North American energy market. All natural gas and electricity transactions are cleared by NGX. NGX is a service provider only and does not trade or take positions in the energy market. ³ Winnipeg Commodity Exchange Inc (WCE) trades agricultural commodity futures contracts and options on futures contracts which include canola, feed wheat and western barley. The WCE Clearing Corporation acts as clearing house and guarantor to all exchange-traded derivatives contracts traded on the WCE.

¹ CDS is the owner and operator of CDSX which replaced SSS and DCS in 2003. Full implementation of CDSX was completed in October 2003. Data prior to 2004 reflect SSS/DCS operations. A system change in 2005 affected value and volume calculations for non-exchange and debt transactions for 2004; as a result of this change, 2004 figures for the value of transactions are not available. Where transactions were denominated in US dollars, the average annual exchange rate was used in converting to Canadian dollars.

¹ The Federal Reserve Board of Governors is the central bank. The Board of Governors is located in Washington DC and there are 12 district banks located in Atlanta, Boston, Chicago, Cleveland, Dallas, Kansas City, Minneapolis, New York, Philadelphia, Richmond, St Louis and San Francisco. ² Includes 12 Reserve Bank head offices. Some branches no longer provide payment services. A small number of additional regional offices provide cheque or cash services to depository institutions. ³ Banks in this table include depository institutions which are similar in meaning to deposit-taking institutions. ⁴ For 2002, data does not include the number of credit union branches or offices. ⁵ Does not include head offices. ⁶ Note that this definition differs from the definition of transferable deposits reported in Table 2. ⁷ Includes state and federal savings banks, savings and loan associations and cooperative and industrial banks. ⁸ US branches and agencies of foreign banks. ⁹ Includes credit balances as well as total transaction accounts.

Sources: Federal Reserve; Office of Thrift Supervision; US Treasury.

¹ Includes payments by banks for their own account. ² Includes an estimate of the number of on-us payments. A study conducted by the Federal Reserve estimated that the number of on-us ACH credit payments amounted to 493 million in 2003 and 821 million in 2006. Other figures are derived from that estimate. ³ Includes an estimate of the number of on-us payments. A study conducted by the Federal Reserve estimated that the number of on-us ACH debit payments was 768 million in 2003 and 1,460 million in 2006. Other figures are derived from that estimate. ⁴ Payments made in the United States using cards issued inside and outside the United States. ⁵ Excludes cash back. Studies conducted by the Federal Reserve estimated that the number of debit card payments amounted to 15,600 million in 2003 and 25,300 million in 2006. The figures in the table differ from the Federal Reserve estimates, but are provided to allow a consistent time series. ⁶ Excludes cash advances. Total of Visa, MasterCard, Discover, American Express, Diners Club and retailer cards. Studies conducted by the Federal Reserve estimated that the number of credit card payments amounted to 19,000 million in 2003 and 21,700 million in 2006. The figures in the table differ from the Federal Reserve estimates, but are provided to allow a consistent time series. ⁷ E-money products have not been widely adopted in the United States. In this reporting period, e-money transaction terminals, volume and value are negligible relative to other card instruments. ⁸ Annualised number of paid cheques including commercial cheques, US Treasury cheques and postal money orders. Studies conducted by the Federal Reserve estimated the number of paid cheques in 1995, 2000, 2003 and 2006. Other figures are derived from those estimates. ⁹ Annualised projection based on March data for each year. Includes cash withdrawals, deposits, transfers between individuals' own accounts and other types of transactions. ¹⁰ A study conducted by the Federal Reserve estimated that the number of on-us ATM withdrawals, meaning they involved only one depository institution, amounted to about 60% and 62% of number of ATM cash withdrawals in 2003 and 2006, respectively.

¹ Number of originations; data do not include non-value messages. ² CHIPS, the Clearing House Interbank Payments System is owned by the Clearing House. ³ Fedwire is operated by the Federal Reserve. ⁴ Studies conducted by the Federal Reserve estimated the number of cheques paid in 1995, 2000, 2003 and 2006. The number of on-us cheques for those years was also estimated. Total paid cheques = Federal Reserve + private clearing houses and direct exchanges + on-us. Figures for other years are derived from those estimates. ⁵ Calculated as total cheque volume less Federal Reserve cheque clearings and estimated on-us cheques. ⁶ Number originated using private automated clearing house (ACH) operators. Includes transfers sent by private ACH operators to the Federal Reserve for transmission to the receiving depository institution. In 2002 through 2006, these transfers sent by the Federal Reserve to private ACH for transmission to the receiving depository institution. In 2002 through 2006, these transfers amounted to 524.3, 567.8, 612.8, 896.6 and 936.7 million. ⁸ A study conducted by the Federal Reserve estimated that the number of on-us ACH payments (processed by only one depository institution) was 1,261 million in 2003 and 2,281 million in 2006. Figures for other years are derived from these estimates.

¹ Number of originations. ² CHIPS, the Clearing House Interbank Payments System is owned by the Clearing House. ³ Fedwire is operated by the Federal Reserve. ⁴ Studies conducted by the Federal Reserve estimated the value of cheques paid in 2000, 2003 and 2006. The value of on-us cheques for those years was also estimated. Total paid cheques = Federal Reserve + private clearing houses and direct exchanges + on-us. Figures for other years are derived from those estimates. ⁵ Calculated as total cheque value less value of Federal Reserve cheque clearing and value of on-us cheques. ⁶ Value originated using private ACH operators. Includes transfers sent by private ACH to the Federal Reserve for transmission to the receiving depository institution. In 2002 through 2006, these transfers sent by the Federal Reserve to private ACH for transmission to the receiving depository institution. In 2002 through 2006, these transfers sent by the Federal Reserve to private ACH for transmission to the receiving depository institution. In 2002 through 2006, these transfers amounted to USD 2,088.8, 1,965.2, 1,408.3, 1,675.9 and 1,552.0 billion. ⁸ A study conducted by the Federal Reserve estimated that the value of on-us ACH payments (processed by only one depository institution) was USD 3,413 billion in 2003 and USD 4,578 billion in 2006. Figures for other years are derived from those estimates. Sources: Clearing House Interbank Payments System; Federal Reserve; National Automated Clearing House Association.

¹ In March 2006, the privately held NYSE merged with Archipelago Holdings, Inc. to form the publicly traded NYSE Group, Inc. (consisting of NYSE and NYSE Arca). In April 2007, NYSE Group, Inc. merged with Euronext to become NYSE Euronext, Inc. ² In preparation for the merger, member seat sales ended in 2005 and were replaced by the sale of annual trading licences. The 2006 figure is equal to the number of initial licences in place at the completion of the merger. The number of active licences has declined since that time.

Please refer to the individual country tables for a detailed explanation.

¹ Converted at yearly average exchange rates, except as noted. ² Total value of transactions in domestic currency deflated by yearly average CPI inflation. For the CPSS area, in US dollar terms. ³ For the most part, data refer to total transactions during the fiscal year ending March of the following year (see Japan, Table 8). As a consequence, they are converted at average fiscal-year exchange rates. ⁴ Sum or average excluding those countries for which data are not available. For France (prior to 2005), Switzerland and the United Kingdom, includes interbank transactions in credit transfers. Since the value of these transactions is relatively large, cross-country comparison and the CPSS figures should be treated with caution. ⁵ For Italy, as a ratio to deposits held only at banks.

¹ Sum or average excluding those countries for which data are not available. For credit transfers, data for France (prior to 2005), Switzerland and the United Kingdom include interbank transactions. Since the value of these transactions is relatively large, cross-country comparison should be treated with caution; consequently, CPSS figures for credit transfers have not been calculated. The CPSS figures calculated ignore credit transfer data throughout.

Please refer to the individual country tables for a detailed explanation.

¹ Value of transactions in domestic currency deflated by yearly average CPI inflation. For the CPSS area, in US dollar terms. ² Sum or average excluding those countries for which data are not available. For credit transfers, data for France (prior to 2005), Switzerland and the United Kingdom include interbank transactions. Since the value of these transactions is relatively large, cross-country comparison should be treated with caution; consequently, CPSS figures for credit transfers have not been calculated.

Please refer to the individual country tables for a detailed explanation.

¹ Converted at yearly average exchange rates, except as noted. ² For credit transfers, total for the fiscal year ending March of the following year, converted at average fiscal year exchange rates. ³ Sum or average excluding those countries for which data are not available. For credit transfers, data for France (prior to 2005), Switzerland and the United Kingdom include interbank transactions. Since the value of these transactions is relatively large, cross-country comparison should be treated with caution; consequently, CPSS figures for credit transfers have not been calculated.

Footnotes for Tables PS1-4

Canada: ¹ Final settlement occurs at 18:30. However, due to the risk controls in place, the LVTS provides intraday settlement finality. ² No standard hours.

Germany: ¹ Payments are processed in several windows. Payment orders submitted between 07:00 and 20:00 (domestic credit transfers as well as STEP2 credit transfers) and between 09:00 and 21:00 (direct debits and payments arising from the paperless cheque collection procedure) are processed in the evening processing. The equivalent values of credit transfers are blocked in the submitter's Bundesbank account on the submission day from 19.00 and transformed into account debit entries on the next business day. The value of cheques and direct debits is credited on the business day following submission ("subject to collection"). Payment orders which are submitted exclusively by data telecommunication between 20:00 and 07:00 (credit transfers) and 21:00 and 09:00 (direct debits and payments arising from the paperless cheque collection procedure) are processed in the morning processing. The payments are booked and delivered directly in the morning of the processing day. During the morning processing, delivery and booking of cross-border transfers received from EBA/STEP2 and the data delivery and booking of GSE items and BSE cheques (only paper-based submission by public authorities) submitted in a paper-based form on the previous day also take place.

Hong Kong SAR: ¹ Hong Kong Interbank Clearing Limited, the system operator of HKD CHATS, USD CHATS and EUR CHATS in Hong Kong. It is jointly owned by the Hong Kong Monetary Authority and the Hong Kong Association of Banks. ² The money market in Hong Kong can operate any time in a day but for same day settlement in Hong Kong, a transaction has to be submitted to one of the CHATS for processing between 09:00 and 17:30.

Italy: ¹ Transfer orders are legally enforceable and binding on third parties when the system completes the gathering of the transfer orders or the bilateral balances stemming from the two BI-COMP subsystems ("Local Clearing" and "Retail").

Japan: ¹ Processing costs of transfer orders are recovered from the participants, but development and maintenance costs are covered by the Bank of Japan. ² Cut-off time is extended to 19:00 only for participants approved by the Bank of Japan for the use of extended operating hours. ³ Cut-off time for bills and cheques sorted by banks. Bills and cheques for sorting at TCH must be submitted by 21:00 of the day before the value date. ⁴ With the consent of the receiving bank, third party orders may be entered for same day settlement until the cut-off time of the system. ⁵ 19:00 for market participants with access to the extended operating hours of BOJ-NET.

Netherlands: ¹ In principle; sometimes less.

Singapore: ¹ Where they differ, times for Saturdays are shown in brackets. ² MEPS does not impose a cut-off time for third-party/international correspondents' payments, but the Association of Banks in Singapore (ABS) bye-laws on MEPS require all such payments to be made by 17:30 on Mondays-Fridays and 12:30 on Saturdays. ³ On weekend transaction submissions, settlement occurs on the following Monday.

Sweden: ¹ No same day transaction. ² Payments become final on completion of settlement, which occurs throughout the day. ³ The settlement points for the different flows are spread out between 07:15 and 16:20. ⁴ The settlement points for the different flows are spread out between 07:15 and 16:20.

Switzerland: ¹ R for remote members. ² The system is open for input 24 hours a day. Settlement services are limited by the indicated opening and closing times. A value day starts at 17:00 local time on the previous business day and ends at 16:15 on the value day. Third-party payments may be entered for same day settlement until 15:00. Between 15:00 (cutoff 1) and 16:00 (cutoff 2) only cover (bank-to-bank) payments are accepted for same day settlement. From 16:00 to 16:15 transactions are restricted to the processing of Liquidity-Shortage Financing Facility (Special-Rate Repo Transactions, collateralised loans from the Swiss National Bank at a penalty rate).

United Kingdom: ¹ In net settlement, the payment becomes final and irrevocable once details of the payment have been entered into the Interbank Data Exchange (IBDE). ² In net settlement, the payment becomes final when the payment has had an effect on the bilateral net position.

United States: ¹ Local times are Eastern time. ² CHIPS, the Clearing House Interbank Payments System, is owned by the Clearing House. ³ Any depository institution, including a US branch or agency of a foreign bank, may maintain an account with a Federal Reserve Bank. ⁴ Payments over CHIPS become final on completion of settlement, which occurs throughout the day. ⁵ Trading occurs among dealers for funds on deposit at Federal Reserve Banks (ie federal funds) as early as 06:30. 6 Number of depository institutions that used the Fedwire Funds Transfer Service in 2004. Other Fedwire Funds Transfer participants not included here are: the US Treasury and any entity specifically authorised by federal statute to use the Reserve Banks as fiscal agents or depositories; entities designated by the Secretary of the Treasury; foreign central banks, foreign monetary authorities, foreign governments and certain international organisations. 7 Data prior to 2004 have been revised.

European Union: ¹ All times are Central European Time (CET). ² STEP2 payments are settled in EURO1 at 07:30 CET. ³ STEP2 commenced settlement transactions on 29 April 2003. ⁴ Using euro area consumer price (HICP) inflation and GDP respectively.

CLS: ¹ Includes some non-bank financial institutions. ² Central European Time (CET). ³ Each side of the transaction is counted separately. Spot and forward transactions have two sides, while swaps have four.

Belgium: ¹ Rentefonds.

Canada: ¹ Pending regulatory filing/approval, TSX Group and Montréal Exchange Inc. will merge to create TMX Group in 2008. ² Market hours vary for individual product classes.

France: ¹ Euronext has a credit institution's status.

Germany: ¹ Deutsche Börse AG. ² Deutsche Börse AG (50%) and SWX Swiss Exchange (50%). ³ Depending on instruments.

Hong Kong SAR: ¹ Equities include ordinary shares, preference shares, registered warrants, provisional allotment letters representing nil paid rights; structured products include derivative warrants, equity linked instruments, callable bull/bear contracts; bonds include Exchange Fund notes, Hong Kong SAR retail bonds and Hong Kong SAR Link Retail Bonds; unit trust funds includes Exchange Traded Funds. ² Before 10:00, auction session; after 10:00, continuous trading session. ³ For iShares only.

Singapore: ¹ SGX has a pre-opening routine where orders entered from 08:30 to 08:59 are matched between 08:59 to 09:00 before trading commences at 09:00. Similarly there is another closing routine where all orders entered between 17:00 and 17:05 are matched between 17:05 and 17:06 and the prices established in the closing routine will be the closing price for the day.

Sweden: ¹ OMX Derivatives Markets, which is a secondary legal name for the OMX Nordic Exchange Stockholm AB.

United States: ¹ Local times are Eastern time.

France: ¹ LCH.Clearnet SA is located in France but serves Amsterdam, Brussels and Paris Euronext markets. ² Euroclear France, Euroclear Netherlands, Euroclear Belgium and Euroclear Bank.

Germany: ¹ Clearstream Banking Frankfurt. ² Clearstream Banking Luxembourg. ³ SIS SegaInterSettle. ⁴ Euroclear Bank. ⁵ Euroclear UK & Ireland.

Japan: ¹ Includes TSE, OSE and other regional exchanges. ² For equities. ³ For derivatives.

Sweden: ¹ OMX Derivatives Markets, which is a secondary legal name for the OMX Nordic Exchange Stockholm AB. ² The currency area description of OMX DM's links is very misleading. OMX DM has a link to the London market and specifically to LCH.Clearnet Ltd to facilitate the clearing of Nordic derivatives traded in London. The derivatives settled through the link are denominated in DKK, EUR, NOK and SEK. **Switzerland:** ¹ SIS SegaInterSettle. ² Euroclear Bank. ³ Euroclear UK.

Annexes

General comments

- Exceptions Data in the tables conform to this methodology unless indicated otherwise in the table concerned. However, it should be noted that varying methods of collecting data can also complicate cross-country comparisons. Breaks in series Where these occur, they are indicated by a footnote. These are indicated under the table concerned where appropriate. Sources of data Definitions Definitions in the tables which are not given in this methodology are based on "A glossary of terms used in payments and settlement systems", revised version, March 2003 (http://www.bis.org/publ/cpss00b.htm). Where necessary, footnotes to individual tables explain the countryspecific definitions, eg of "banks". (Note that in general the term "banks" should be broadly construed according to local regulations so as to include all relevant financial institutions, eg "credit institutions" in EU countries.) Intrabank items These are included as appropriate except where indicated. Foreign currency Foreign currencies are not included in the figures unless otherwise indicated. Each table indicates the period (eg year) or point in time (eg end-year) for Time period which the data are presented. The data are totals unless the table explicitly indicates otherwise (eg a daily average). Estimated data Where data are broadly estimated and thus only indicative, this is indicated in a footnote (except for population and GDP in Table 1 and data in Country Tables 7 and 8, where it is taken for granted that the data are estimated).
- Seasonal adjustment Figures are not seasonally adjusted unless otherwise indicated.
- *"nap", "nav" and "0"* Where data are not applicable (ie the category does not exist in the reporting country), this is indicated by "nap". Where data are not available (ie the category exists, but data are not available), this is indicated by "nav". Where data are exactly zero or none this is indicated by "0".

Statistical methodology for the country tables

General

Stock data are collected at annual frequency with reference date end-December, except when specified otherwise. Transaction data cover the whole calendar year.

Note that definitions are only provided once. The items only appear on the left-hand side of this methodology when they appear for the first time in the tables, in which case a definition is given, or when there are some specific methodological issues in the table concerned.

Basic information: banknotes and coin; institutions; transferable deposits

Table 1: Basic statistical data

Population	Average for the year (computed as the average of two point values at the start and end of the year, or otherwise).
GDP	Nominal (not real) GDP.
GDP per capita	GDP divided by population.
CPI inflation	Changes in the price of consumer goods and services (yearly averages of monthly values), in per cent.
Exchange rate (domestic currency vis-à-vis USD)	Provided both as a year-end value and as an average for the year.

Table 2: Settlement media used by non-banks

	•
Notes and coin (or currency) in circulation outside banks	The value of cash in circulation in the economy. The figure excludes notes and coin kept in vaults at central banks or at banks (see Table 4) but includes holdings by non-residents. It also excludes commemorative coins that are not used for payments, unless otherwise indicated.
Transferable deposits	Deposits which are convertible into currency and/or can be used to make cashless payments using one of the instruments mentioned in Tables 7 and 8, as included in the national definition of M1. They include, when relevant, overnight overdrafts on these accounts. In addition, they include deposits in foreign currencies and outstanding values on e-money storages if these are also included in M1.
Other	Items other than notes and coin and transferable deposits included in M1.
Narrow money supply (M1)	Cash in circulation and transferable deposits held by non-banks including non-residents, unless otherwise indicated.
E-money storages	Instruments for storing e-money funds, eg cards (card-based, see cards with an e-money function in Table 6), personal computers or servers (computer-based, of which software- or network-based) or other devices like mobile phones (mobile-based, with the funds stored locally on a mobile phone).
Software-based	Electronic money products which employ specialised software on a personal computer and which can typically be used to transfer electronic value via telecommunications networks such as the internet.
Network-based	Electronic money products which allow consumers to store monetary value

on a centrally located server. This value can subsequently be used for making payments on the internet.

Outstanding value on e-money storages The difference between the value of cash loaded onto an e-money storage and the value spent. The value loaded is issued against a payment to the issuer in advance and is widely accepted as a means of payment by parties other than the issuer. The value of electronic money held by banks other than the issuer is included, unless otherwise specified.

Table 3: Settlement media used by banks

Transferable balances held at the central bank beld at the central bank beld at the central bank purposes, regardless of the type of account (eg current account, reserve account, settlement account, clearing account).

Required reserves Funds that banks are required to hold at the central bank. If only part of the required reserves can be used for payment purposes, that amount is indicated here.

Free reserves Funds held voluntarily at the central bank that can be used for payment purposes.

Transferable balances Deposits held at other banks in the country (not at the central bank) which are convertible into currency and/or can be used for payment purposes.

Credit extended by the central bank lntraday: credit extended by the central bank for a period of less than one business day. It is calculated as the average of the daily maximum value of simultaneous intraday overdraft positions or drawings on intraday credit facilities during the day for the aggregate of all banks, over the opening days of the interbank payment system.

Overnight: credit extended by the central bank (in the forms specified by the respective country) at the end of the day, in order to cover any (unexpected) overdrafts caused by banks' payment activities. This includes discount window facilities in the United States and marginal lending facilities in the euro area countries. It is calculated as the average of the daily total value for the aggregate of all banks, over the opening days of the interbank payment system.

Longer-term refinancing operations: credit of varying maturities extended by the central bank (in the forms specified by the respective country) through its monetary policy operations. Although banks' borrowing of these funds is not determined by their payment activities, the funds are made available in the payment system and therefore contribute to the liquidity of the system.

Table 4: Banknotes and coin

Total banknotes and coin issued	Value of banknotes and coin excluding those kept in vaults at central banks or at treasury departments (but including those held at banks). Commemorative coins that are not commonly used to make payments are excluded.
Total banknotes issued	Value of banknotes which are part of the liabilities of the central bank; a breakdown by denomination is provided.
Total coin issued	Value of coin; a breakdown by denomination is provided.
Banknotes and coin held by banks	Banknotes and coin in banks' vaults and thus not in circulation among the public.
Banknotes and coin in circulation outside banks	Total banknotes and coin in circulation less banknotes and coin held by banks (identical to notes and coin in Table 2).

Table 5: Institutions offering payment services to non-banks

Categories	Categories of institutions are based on the individual countries' own financial systems. Particular categories are explained where this is felt to be necessary. As a rule, subsidiaries of foreign banks with legal personality in the reporting country are counted alongside domestic banks. The same holds for the post office when it is recognised as a bank by the national jurisdiction.
Branches of foreign banks	All places of business located in the reporting country of banks headquartered in other countries, which have no legal personality, and which carry out all or some of the transactions inherent in the business of banking.
	Foreign-owned banks or subsidiaries of foreign banks are included with domestic banks.
Other institutions offering payment services	Non-banking institutions offering payment services to non-banks, such as the post office (when it is not considered as a bank), money remitters, card schemes or public authorities offering such services. Whenever possible, the types of institutions included are indicated.
	In some countries, information for some or all of these institutions is not available, or is restricted to transaction data (which is shown in Tables 6 to 8). In such cases, Tables 6 to 8 may include information from a larger range of service providers than those included in Table 5; if required, an explanatory footnote is given.
Number of institutions	Any institution which offers payment services is included even if it does not hold deposits for customers (eg because the money transferred is given in cash by the customer to the institution, or debited from a sight account held at another institution). Each institution is counted once, irrespective of the number of branches or offices it holds in the country.
Number of branches or offices	All places of business of an institution that offer cashless payment services to non-banks. The head office of the institution is counted as an office if it offers such services. Mobile offices are excluded.
Number of accounts	The number of accounts held by banks for non-banks (including the government) and individuals, which can be debited directly using one of the instruments mentioned in Tables 7 and 8. This excludes savings accounts; it may include time deposits.
Value of accounts	The aggregate amount of deposits held by non-banks at institutions offering payment services.
	This amount differs from Table 2, as that table also contains deposits held at institutions which do not offer payment services (eg money market funds).
Electronic money institutions	An undertaking or any other legal person, other than a bank, which issues means of payment in the form of electronic money.
Outstanding value on e-money storages	The value of e-money issued by electronic money institutions and held by entities other than the issuer, including banks other than the issuer.
	This figure differs from that in Table 2, as that table also contains outstanding value on e-money storages issued by banks.

Retail payment instruments

Table 6: Payment card functions and accepting devices

A. Cards

A card which has several functions is counted in each relevant line. Therefore, in general, these figures should not be added because of the risk of double-counting. In cases where certain functions are not indicated separately but grouped together, this is indicated in the table concerned.

Cards are counted on the issuing side. Each country reports the number of cards that have been issued in the country (and used for transactions within and outside the country of issue) and not the number of cards used in the country.

All valid cards are included, irrespective of when they were issued and how actively they are used. Expired or withdrawn cards are not included. Cards issues by three-party schemes, eg American Express or Diners, are included. Cards issued by merchants are not included in the standard categories, unless they have been issued in cooperation with a bank. When relevant, they can be included under the memorandum item *Retailer cards*.

Cards with a cash function	Cards enabling the holder to withdraw cash from a cash dispenser and/or to deposit cash.
Cards with a debit function	Cards which enable the holder to have purchases directly charged to funds on his/her account at a bank (may sometimes be combined with another function, such as that of a cash card or cheque guarantee card). The total represents the number of cards in circulation, not the number of accounts to which the cards are linked.
Cards with a delayed debit function	Cards enabling the holder to charge his/her account up to an authorised limit. These cards allow holders to make purchases, but do not offer extended credit, the full amount of the debt incurred having to be settled at the end of a specified period.
Cards with a credit function	Cards indicating that the holder has been granted a line of credit. They enable him/her to make purchases and/or draw cash up to a prearranged ceiling. The credit granted may be settled in full by the end of a specific period, or may be settled in part, with the balance taken as extended credit. Interest is charged on the amount of extended credit and the holder is sometimes charged an annual fee.
Cards with an e-money function	Reloadable multipurpose prepaid cards which can be used at the sites of several service providers for a wide range of purposes and which have the
	potential to be used on a national or an international scale, but may sometimes be restricted to a certain area.
Cards with an e-money function which have been loaded at least once	
function which have been loaded at least	sometimes be restricted to a certain area. These cards can be considered as activated: the loading may be
function which have been loaded at least once	sometimes be restricted to a certain area. These cards can be considered as activated: the loading may be interpreted as indicating the intention to use the e-money function. Cards issued by non-banking institutions (merchants) for use at specified retail outlets. May function as cards with a debit, delayed debit or credit
function which have been loaded at least once	sometimes be restricted to a certain area. These cards can be considered as activated: the loading may be interpreted as indicating the intention to use the e-money function. Cards issued by non-banking institutions (merchants) for use at specified retail outlets. May function as cards with a debit, delayed debit or credit function. If the retailer cards have been issued in cooperation with a bank (co- branding) they are included according to the function(s) available on the

B. Terminals

ATMs with several functions (eg cash dispensing and credit transfer function) are counted in each relevant line. Therefore, in general, these figures should not be added because of the risk of double-counting.

For some countries, there may be double-counting of the number of ATMs when the data are reported per card issuer or per card scheme, and the same ATM is reported under several schemes; if required, an explanatory footnote is given.

ATMs (automated teller machines)	Electromechanical devices allowing authorised users, by using a payment card, to withdraw cash from their account and in some cases to access a range of other services, such as balance enquiries, transfers of funds and acceptance of deposits. ATMs may be operated online (with real-time reference to an authorisation database) or offline.
ATMs with a cash withdrawal function	ATMs allowing their users, by using a card with a cash function, to withdraw cash from their accounts.
ATMs with a credit transfer function	ATMs allowing their users, using a payment card, to make credit transfers.
POS (point of sale)	This term refers to the use of payment cards at a retail location. The payment information is captured either by paper vouchers or by electronic terminals. Each single terminal is counted separately, independent of the existence of several terminals within one merchant location. Countries reporting each merchant location as one terminal will specify this in a footnote.
EFTPOS (electronic funds transfers at the point of sale)	A terminal at a retail location which is designed to capture, and in some cases also transmit, debit card transactions by electronic means. Each single terminal is counted separately, independent of the existence of several terminals within one merchant location. Countries reporting each merchant location as one terminal will specify this in a footnote.
E-money card terminals	Terminals allowing the transfer of e-money between the issuer of e-money and the holder of an e-money card, or between the holder of an e-money card and a beneficiary.
E-money card loading/unloading terminals	Terminals allowing the transfer of electronic value from an issuer of electronic money to the holder of a card with an e-money function and vice versa (unloading).
E-money card payment terminals	Terminals located at the point of sale that permit the holder of e-money to transfer e-money value from his/her e-money card to the balance of the merchant or other beneficiary. Each single e-money accepting terminal is counted separately, independent of the existence of several terminals within one merchant location. Countries reporting each merchant location as one terminal will specify this in a footnote.

Tables 7 and 8: Indicators of the use of payment instruments and terminals by non-banks (volume and value of transactions)

The objective of the upper part of these tables is to estimate the volume and value of transactions effected with cashless payment instruments issued in the country concerned, irrespective of where the transactions were effected. Thus payments with cards issued in the country will include both domestic payments and payments executed abroad. The lower part of each table distinguishes between cashless payments effected in the reporting country with instruments issued in the reporting country and abroad, and payments effected abroad with instruments issued in the reporting country.

Figures concerning only a sample of banks or customers should be extrapolated to provide figures covering the whole volume and value of cashless payment instruments used in the country. Only customer transactions are included. Transactions initiated by banks are excluded, unless they are related to the bank's own retail payments (utility bills, salaries etc). Transfers between accounts in the same name are only included when these accounts are at different banks. Transfers between accounts in the same name at the same bank are not included, unless indicated otherwise.

In the case of cross-border payments, there is a need to avoid double-counting (ie in the country of the originator and in that of the beneficiary). Cross-border cashless payments are accordingly counted in the country of the originator. Card payments and e-money payment transactions are counted on the issuing side. Only transactions with cards or e-money storages issued in the country are counted in the upper part of each table. For these cards and storages all transactions, within and outside the country, are reported.

A. Payment instruments

Credit transfers	Payment orders or possibly sequences of payment orders made for the purpose of placing funds at the disposal of the beneficiary. Both the payment orders and the funds move from the payer's bank to the payee's bank, possibly via several other banks as intermediaries and/or one or more interbank funds transfer systems. Payments are counted on the payer's side.
	Credit transfers performed via ATMs with a credit transfer function are included. Credit transfers which have cash at one or both ends of the payment transaction, eg money and postal orders, are also included. Credit transfers used to settle balances of cards with a credit or a delayed debit function are included, as these are separate payments from the card holder to the card issuer. Cross-border credit transfers (sent) are included.
	Cash payments into the account using a bank form are not included under credit transfers, but can be shown in a memorandum item <i>OTC cash deposits</i> .
	In the case of standing orders and in the case of bulk or batch payment orders, each individual transaction is counted as one transaction.
	The categories paper-based and non-paper-based are mutually exclusive.
Paper-based	Credit transfers which are submitted on paper forms. Includes submissions by telefax if they require manual intervention to be transformed into electronic payments.
Non-paper-based	Credit transfers which are submitted without the use of paper forms, eg electronically or via telephone. Includes submissions by telefax if they do not require manual intervention to be transformed into electronic payments. Includes standing orders which are originally submitted on paper forms, but then executed electronically. Includes credit transfers initiated at an ATM.
Direct debits	Preauthorised debits, possibly recurrent, of the payer's account by the payee. Both one-off and recurrent direct debits are included. In the case of recurrent direct debits, each individual payment is counted as one transaction. Direct debits used to settle balances of cards with a credit or delayed debit functions are included, as they are separate payments from the card holder to the card issuer. Direct debits resulting from the settlement of an individual card transaction should not be reported because

of the risk of double-counting. Payments are counted on the payee's side.

Cash payments out of the account using a bank form are not included, but may be shown under the memorandum item *OTC cash withdrawals*.

- Card payments with Payment transactions performed with cards with a debit, credit or delayed cards issued in the debit function issued in the reporting country, at a terminal or via other country channels. Payments can have been made in the reporting country or abroad. E-money transactions and mobile payments are not included. For the breakdown of cards by category, see Table 6. These sub-categories are mutually exclusive. Only payments are included. Cash withdrawals/deposits at ATMs or credit transfers at ATMs are not included. Cash advances at POS terminals are also excluded, when it is possible to distinguish them. Payments by phone and over the internet using a card are included. Payments with retailer cards are excluded, except when the retailer card was issued in cooperation with a credit institution. For countries with significant business with retailer cards, a memorandum item or a footnote can be included.
- *E-money payment transactions* Transactions where the holder of e-money transfers e-money value from his/her balance to the balance of the merchant. This can be done either with an e-money card or through other e-money storages.
- Cheques A written order from one party (the drawer) to another (the drawee, normally a bank) requiring the drawee to pay a specified sum on demand to the drawer or to a third party specified by the drawer. Cheques may be used for settling debts and withdrawing money from banks. Traveller's cheques, promissory notes and banker's drafts are included under cheques. Commercial bills are included if funds transfers can be made on the basis of these, without using another medium.

Cash withdrawals using bank forms are not included.

Cheques are counted on the payee's side when submitted for cheque clearing. Cheques issued but not submitted for clearing are not included.

Other payment instruments Includes payment instruments that exist in some countries and cannot be included in any of the other categories. These could be, for example, bills of exchange, included truncated bills of exchange. Mobile payments are not included, unless specified otherwise. A footnote states which payment instruments are included.

B. Terminals

Transactions at ATM, POS and e-money card payment and loading/unloading terminals are reported according to the location of the terminal and the country of issue of the card used.

ATM cash withdrawals	Cash withdrawals performed at ATMs using a card with a cash function. Cash advances at POS terminals using a debit, credit or delayed debit card are not included, but are reported under <i>POS transactions</i> . If it is possible to distinguish them, they are, in addition, reported as a memorandum item <i>Cash advances at POS terminals</i> .
ATM cash deposits	Cash deposits performed at ATMs using a card with a cash function.
POS payment transactions	Transactions performed through POS terminals using a card with a debit, delayed debit or credit function. Cash advances at POS terminals are included. If it is possible to distinguish them, they are, in addition, reported in a memorandum item <i>Cash advances at POS terminals</i> .
E-money card loading/unloading transactions	Transactions allowing the transfer of e-money value from an issuer of electronic money to a holder's card with an e-money function and vice versa. Both loading and unloading transactions are included.
E-money card payment transactions	E-money payment transactions with e-money cards.

Interbank funds transfer systems (IFTSs)

Table 9: Participation in selected interbank funds transfer systems

lable et l'alterpatien in	
Total number of participants	Any institution that is identified/recognised by the system and which is allowed to send transfer orders to and receive transfer orders from the system, either directly (as a direct participant) or indirectly (as an indirect participant).
	For CLS: settlement members and user members.
Direct participants	Any participant in a system that directly exchanges transfer orders with other participants in the system, without an intermediary, and is directly responsible for settling them. In some systems, direct participants also exchange orders on behalf of indirect participants.
	For CLS: settlement members only.
Banks	Any institution recognised as a bank by the national jurisdiction which is a direct participant in the system.
Central bank	The central bank is a direct participant in the system when it directly exchanges transfer orders with other participants in the system.
General government	Central, regional or local government, government agencies and other (semi-) public institutions which are direct participants in the system.
Postal institution	The postal institution is only counted separately when it i) participates directly in the system and ii) is not considered (and supervised) as a bank (if this is the case, it is counted together with other banks).
Clearing and settlement organisations	All clearing and settlement organisations which are direct participants in the system. Generally, retail and securities clearing and/or settlement organisations directly participate in the large-value funds transfer system in which the respective retail or securities transactions are finally settled. When the relevant settlement organisations are considered as banks, they can be counted either under "banks" or under "clearing and settlement organisations"; a footnote explains the choice made.
	When CLS is recognised as a direct participant in the system, it should be reported as a clearing and settlement organisation.
Other financial institutions	All other financial institutions that are under the supervision of the relevant authorities (either the central bank or the prudential supervisor), but are not considered as banks.
Other	All other entities directly participating in the system.

Tables 10 and 11: Payments processed by selected interbank funds transfer systems (volume and value of transactions)

With regard to the volume and value of transactions, each payment instruction is counted once (not twice, ie the debit from the payer's account and the credit to the payee's account are not counted separately).

Funds transfer systems (FTSs)	Formal arrangements based on private contract or statute law with multiple membership, common rules and standardised arrangements for the transition and settlement of money obligations arising between the members.
Interbank funds transfer systems (IFTSs)	Transfer systems in which most (or all) direct participants are banks and which are used primarily to process cashless payments.
	As a rule, all IFTSs with significant business for the country are mentioned here, both those managed by the central bank and those managed by

private operators.

Figures are provided system by system, with categories of various payment instruments when relevant (cheques, direct debits, credit transfers, ATM transactions, card payments, e-money transactions etc) as sub-items.

- *Concentration ratio in terms of volume/value* Market share of the five largest senders of payment messages in each system (this may include the central bank). The five largest senders of transactions in terms of volume may differ from the five largest senders in terms of value. Each participant which has individual access to the system is counted separately, irrespective of whether there is a legal link (eg merger) between two or more participants.
- *Card payments* All card payments processed in the IFTSs are reported, irrespective of where the card was actually issued or used.

Cross-border transactions are counted in the country where the transaction originates in order to avoid double-counting (this differs from Tables 7 and 8, where card payments are reported in the acquiring country). Whenever received transactions are available, they can be reported as a memorandum item.

For other payment instruments settled in these systems (credit transfers, direct debits, cheques etc), see the definitions given for Country tables 7 and 8.

Table 12: Participation in SWIFT by domestic institutions

These figures are provided by SWIFT. Totals and their components (members, sub-members, participants) refer to "legal" users, ie users who have been approved by SWIFT's Board via the monthly Board Paper. *Live* users are those that have cutover and are connected on SWIFT.

Sub-members Domestic users sponsored by members abroad.

Participants Participants are not shareholders of SWIFT and their message traffic over the network is restricted.

Table 13: SWIFT message flows to/from domestic users

These figures are provided by SWIFT. All traffic for domestic and international Market Infrastructures is allocated to the country of the SWIFT destination making the payment. The traffic exchanged between Market Infrastructures and their participants is excluded from the domestic traffic.

Category I	Messages used by banks to transfer funds to an account of a customer (ie messages relating to payments that are category I messages, eg MT100 messages).
Category II	Messages used by banks to transfer funds to an account of another bank (ie messages relating to payments that are category II messages, eg MT200 messages).
Domestic traffic	Messages sent to/received from domestic users

Domestic traffic Messages sent to/received from domestic users.

Securities and derivatives trading, clearing and settlement

Exchanges and trading systems

Table 14: Number of participants in exchanges and trading systems

Figures are provided separately for each trading system, with categories of various participants as sub-items. When countries are unable to provide a breakdown, only the total number of participants is reported.

Trading system	An infrastructure or mechanism aimed at facilitating securities or derivatives transactions between those who wish to buy and sell. A trading system can be a legal entity recognised as an exchange or an integrated part of a stock exchange; it can also be a multilateral trading facility or an OTC trading platform.
	Only recognised and/or supervised exchanges and trading systems are reported; only the exchanges and systems that the reporting central banks consider to be relevant for this publication are reported. Reporting is done by entity; if available, more detailed figures can be provided for each or some of the markets serviced by the entity.
Participant	A participant is a legal entity that can submit (buy and sell) orders to the trading system on its own behalf or on behalf of its customers.
Domestic vs foreign participants	Any participant that is located in the country of incorporation of the trading system (which is also the reporting country) is considered as a domestic participant.
	In the European Union, branches of foreign entities located in the reporting country, and participants in systems that are part of an international group, located in one of the participating countries, are considered as domestic participants. Other countries specify in a footnote how participants are classified.
	When it is not possible to distinguish between the location of the participants in the system, the categories of participants appear as sub- items under <i>Total number of participants</i> , instead of under the two sub- categories <i>Number of domestic participants</i> and <i>Number of foreign</i> <i>participants</i> .
Central counterparty (CCP)	An entity that interposes itself between counterparties to contracts traded in one or more financial markets, becoming the buyer to every seller and the seller to every buyer.
	A CCP may at the same time be a bank. In that case, it is classified as a CCP (ie according to its function) and not as a bank.
Banks	See Country Table 5.
	If a bank is at the same time a CCP, the institution is classified as a CCP and not as a bank.
Other	Other counterparties, for example dealers and brokers.

Table 15: Number of listed securities

Total number of securities admitted to trading The number of securities admitted to trading on the reported trading system. Securities are distinguished according to their ISIN code, or any other national code used in the reporting country. The ISIN (International Securities Identification Number) code system is an international standard on many financial markets that facilitates the identification of securities, particularly in cross-border transactions, since ISIN assigns each security a single number used in all countries.

When countries are only able to provide the number of companies that are listed (and not the number of different codes), this is specified in a footnote.

Debt securities A debt security is a promise on the part of the issuer (the borrower) to make one or more payment(s) to the holder (the lender) on a specified future date or dates. Such securities usually carry a specific rate of interest (the coupon) and/or are sold at a discount to the amount that will be repaid at maturity. Includes bonds and short-term paper.

The number of securities can be approximated by the number of codes listed.

Equity Securities representing ownership of a stake in a corporation, ie shares traded on a stock exchange (quoted or listed shares), unquoted or unlisted shares and other forms of equity. Equities usually produce income in the form of dividends. Equity includes investment fund shares and depository receipts.

The number of companies whose shares are listed is reported. A company or investment fund with several classes of shares is counted only once.

Other Other instruments, for example warrants.

Table 16: Market capitalisation of listed companies

Total market The market value of companies, calculated as the total number of a capitalisation The market value of company's shares outstanding multiplied by the current market price per share. Only domestic equities are included; foreign listings and investment fund shares/units are excluded. If shares are listed on several exchanges they are only taken into account for the calculation of the market capitalisation on the exchange where the shares have been issued. For exchanges that are part of an international group, all securities listed in one of the participating countries are considered.

Tables 17 and 18: Number and value of executed trades

Total number of executed securities trades	Each transaction is counted once, regardless of whether the transaction has been executed on an order-driven or on a quote-driven system (even when exchanges count transactions executed on a quote-driven system twice, once for the buyer and once for the seller).
Total value of executed securities trades	Transactions in debt securities, ie bonds and short-term papers, are valued at nominal value. Transactions in equity securities are valued at market value. The monthly average securities price can be used as market value.
	The value of transactions denominated in other than the reporting currency are converted to the reporting currency taking the exchange rate on the day when the transaction takes place (transactions) or the exchange rate of the last business day of the year (stocks). The monthly exchange rate can also be used as a proxy.
Total number of executed derivatives trades	Number of derivatives contracts entered into in the reporting period.
Total value of executed derivatives trades	Gross nominal or notional value of all contracts entered into in the reporting period.

Central counterparties (CCPs) or clearing houses

A CCP is an entity that interposes itself between counterparties to contracts traded in one or more financial markets, becoming the buyer to every seller and the seller to every buyer. A clearing house is a central location or central processing mechanism reconciling and, in some cases, confirming payment orders or securities transfer instructions prior to settlement, possibly including the netting of instructions and the establishment of final positions for settlement. Only entities that do not novate transactions and assume the role of CCP are reported as clearing houses.

The name of the entity is followed, in brackets, by a mention of its function (either CCP or clearing house). When deemed necessary, a footnote provides additional information. When a single entity performs the functions of both clearing house or CCP and central securities depository, Tables 19 to 21 are completed, when relevant, with data on its clearing house or CCP activities.

Table 19: Number of clearing members

Figures are provided separately for each CCP or clearing house with categories of various participants as sub-items. When countries are unable to provide a breakdown, only the total number of participants is reported.

Number of clearing members	All members of the clearing house or CCP. Includes direct clearing members (participants that are able to clear only their own obligations) and general clearing members (participants that are able to clear their own obligations as well as those of clients).
Domestic vs foreign clearing members	Any clearing member that is located in the country of incorporation of the CCP or clearing house (which is also the reporting country) is considered as a domestic clearing member. A footnote specifies whether participants located in some other countries are also counted as domestic. A clearing member who is registered outside the reporting country, but has a branch in this country, is also reported as a domestic clearing member.
	When it is not possible to distinguish between the location of the clearing members, then the categories of clearing members appear as sub-items under <i>Total number of clearing members</i> , instead of under the two sub-categories <i>Number of domestic clearing members</i> and <i>Number of foreign clearing members</i> .
Central counterparty (CCP)	CCPs which are clearing members of the reporting CCP or clearing house, and which are also banks, are classified as CCPs and not as banks.
Banks	See Country Table 5. If a bank is at the same time a CCP, the institution is classified as a CCP and not as a bank.
Other	Other counterparties, for example dealers and brokers.

Tables 20 and 21: Number and value of contracts and transactions cleared

Contracts/transactions denominated in another currency than the reported currency are converted to the reporting currency using the exchange rate on the day at which the transaction takes place. As a proxy, the monthly average exchange rate can be used.

Securities transactions cleared	Includes both repurchase transactions and outright securities transactions.
Number of securities transactions cleared	For CCPs, the number and value of securities transactions is reported on a post-novation basis (counting the transactions with the CCP as it interposes itself as buyer to every seller and seller to every buyer).
Value of securities transactions cleared	Transactions in debt instruments and equity securities are valued at transaction values. When the transactions cleared are free-of-payment, the securities are valued at market value. The monthly average price may be

derivatives

used as a proxy for the market value of transactions. When market value is not available, the latest available price is used.

- *Derivatives contracts* Financial contracts whose value depends on the value of one or more underlying reference assets, rates or indices.
- *OTC derivatives* Derivatives transactions that have not been executed on trading platforms of recognised and/or supervised exchanges or trading systems.
- *Financial futures* Standardised contracts, traded on an exchange, that obligate one party to buy, and the other to sell, an underlying asset at a specific price and date in the future. In the case of financial futures, the underlying can be a financial instrument (eg securities) or an index (eg interest rates).
- *Financial options* Contracts that give the buyer the right, but not the obligation, to buy or sell an underlying asset by (or on) a specific date for a specific price. For this right the purchaser pays a premium. In the case of financial options, the underlying asset is a financial instrument (eg securities).

Other financial Any financial derivatives other than future and option contracts, for example swaps.

- *Commodity futures* Standardised contracts, traded on an exchange, that obligate one party to buy, and the other to sell, a commodity (agricultural product, oil etc) at a specific price and date in the future.
- *Commodity options* Contracts that give the buyer the right, but not the obligation, to buy or sell a commodity by (or on) a specific date for a specific price. For this right the purchaser pays a premium.
- Other commodity Any commodity derivatives other than future and option contracts.

Number of derivatives contracts cleared Several contracts may be traded in one transaction. This item does not refer to the number of transactions, but to the number of contracts. For CCPs, contracts are reported on a post-novation basis (counting the contract with the CCP as it interposes itself as buyer to every seller and seller to every buyer).

Transfers of underlying assets to fulfil obligations from open positions in derivatives at expiration of a derivatives contract are not counted as derivatives transactions. If the underlying is a security, such a transfer is counted as a securities transaction.

Value of derivatives contracts cleared Derivatives transactions are valued at market value. The market value of an option is the actual premium to be paid by the option buyer. The market value of a futures contract is the market value of the underlying or, for futures with notional underlying, the market price of the futures contract itself.

Central securities depositories

A central securities depository (CSD) is a facility (or an institution) for holding securities which enables securities transactions to be processed by book entry. Physical securities may be immobilised by the depository or securities may be dematerialised (ie so that they exist only as electronic records). In addition to safekeeping, a CSD may incorporate comparison, clearing and settlement functions. When a single entity performs the functions of both clearing house or CCP and CSD, Tables 22 to 25 are completed, when relevant, with data on its clearing house or CCP activities.

Table 22: Number of direct participants in CSDs

Figures are provided separately for each CSD, with categories of various participants as sub-items. When countries are unable to provide a breakdown, only the total number of participants is reported.

Direct participants Direct account holders in a tiered system or account operators in a nontiered system. Tiered vs non-tiered In a tiered system, custodian banks or other CSDs hold accounts with the CSD. Individual customers will only be allowed to open accounts with a system custodian bank, but not directly with the CSD. In a non-tiered system, every private individual can have an account with the CSD. However, the accounts are operated by only a few companies, the account operators. A company operating the account of (private) customers in non-tiered Account operator systems. Account operators are typically banks. Domestic vs foreign Any participant that is located in the country of incorporation of the CSD (which is also the reporting country) is considered as a domestic participants participant. When it is not possible to distinguish between the location of the participants, then the categories of participants appear as sub-items under Total number of participants, instead of under the two sub-categories Number of domestic participants and Number of foreign participants. If a bank is at the same time a CCP or a CSD, the institution is classified Banks as a CCP or a CSD and not as a bank.

Table 23: Number of securities held on accounts at CSDs

Total number of ISIN codes held	The number of securities (ISIN codes or national codes) held on accounts with the reporting CSD, comprising all securities issued or safe-kept in the reporting CSD, or transferred into the CSD through a link.
Debt securities	A debt security is a promise on the part of the issuer (the borrower) to make one or more payment(s) to the holder (the lender) on a specified future date or dates. Such securities usually carry a specific rate of interest (the coupon) and/or are sold at a discount to the amount that will be repaid at maturity.
Non-debt securities	All other securities (mainly equities).
Bonds	Debt securities (including convertible securities) with an original maturity of more than one year.
Short-term paper	Debt securities (including convertible securities) with an original maturity of one year or less.

Table 24: Value of securities held on account at CSDs

The value of securities held on accounts with the reporting CSD, comprising all securities issued or safe-kept in the reporting CSD, or transferred into the CSD through a link.
The value of securities denominated in a currency other than the reporting currency is converted to the reporting currency using the exchange rate on the last business day of the year.
Valued at nominal value.
Valued at market value. The monthly average price may be used as a proxy for market value. When market values are not available, the latest available price is used (as specified in a footnote).
When no price and no recent payment value can be associated with the security (eg in DVP transactions), each security is valued at one unit of national currency.
This item aims at providing information about the relative importance of non-debt securities (ISIN or national codes) for which the valuation rule has been applied.

Tables 25 and 26: Number and value of delivery instructions processed

Delivery instructions	All instructions to move securities between accounts.
	For trades not cleared by a CCP: data related to delivery instructions are reported on a gross basis. For trades cleared by a CCP: data related to delivery instructions are reported on a post-netting basis.
	 Delivery instructions reported also include: instructions to block (and de-block) securities for collateralisation purposes on a borrower's securities account with the CSD; securities movements due to automatic securities lending or automatic collateralisation (including self-collateralisation); delivery instructions to move securities from the participant's own account to his omnibus account and vice versa when there is segregation on a participant's account with the CSD; delivery instructions related to the transfer of securities between two accounts of the same account operator in a non-tiered system.
	 Not reported are instructions: related to securities movements due to corporate actions (restructuring the ownership of a company through an action such as a stock split or conversion), new issues and redemptions; related to purely technical bookings such as realignment procedures.
Number of delivery instructions	In principle, only delivery instructions are counted.
	An instruction to transfer two or more securities (ISIN or national codes) is counted as two (or more) instructions. When processing an instruction to transfer securities from a seller to a buyer requires two transfers, due to the use of a technical account (that cannot be assigned to a CSD participant), only one transfer is reported. If the CSD receives two instructions regarding the same transaction (eg one from the seller and one from the buyer of the securities), only one instruction is reported.
	For transfers through a link between CSDs, only the issuer CSD should report. When the issuing CSD is not involved (eg transfers through the "bridge"), only the delivering CSD reports.
Value of delivery instructions	The value of securities denominated in a currency other than the reporting currency is converted to the reporting currency using the exchange rate on

	the day of the transaction. As a proxy, the monthly average exchange rate can be used.
DVP transactions	A mechanism that ensures that the delivery of a security occurs if, and only if, payment occurs.
Free-of-payment transactions	Delivery of securities with no corresponding payment of funds
Debt securities	Valued at nominal value.
Equity and other	Valued at market value. See Table 24.

Statistical methodology for the comparative tables

General

The comparative tables are fully based on the country tables, with the exception, to a certain extent, of the payment, trading and clearing and settlement systems tables (Table PS1 ff). In this methodology, references to both country and other comparative tables are made in brackets, where [CT 1] indicates that the figures used in the comparative table under consideration have been calculated with data from Country Table 1. When figures can either be derived from a country or from a comparative table, only the reference to the country table appears, as the figures presented there are considered to be the source of the comparative tables. In some cases, however, reference is also made to other comparative tables, because of repeated identical calculations. When calculations are identical for all or most items of a table, the full formula is only given once, while repetitions are indicated by "idem".

In all tables, figures are given for individual CPSS countries. A figure for the euro area is added to the individual countries' figure in Table 2. A figure for all CPSS countries is also calculated in Tables 1–15 (where this is statistically not relevant, this is indicated by "nap"). Where applicable, these totals or averages are expressed in or based on USD terms.

Henceforth, comparative tables are simply referred to as tables.

Basic information: banknotes and coin; institutions; transferable deposits

Table 1: Basic statistical data

Based on CT 1.

GDP	Nominal figures, expressed in USD by dividing <i>GDP in domestic currency</i> [CT 1] by the <i>average exchange rate</i> of the domestic currency vis-à-vis the USD [CT 1].
Population	Population [CT 1].
GDP per capita	GDP in USD [Table 1] divided by population [CT 1].
Consumer price inflation	CPI inflation [CT 1].
Exchange rate (domestic currency vis-à-vis USD)	Average and end-of-year exchange rates (domestic currency vis-à-vis USD) [CT 1].

Table 2: Banknotes and coin in circulation

Based on CT 4.	
Total value	<i>Banknotes and coin</i> (including banknotes and coin held at banks) [CT 4], converted to USD using the <i>end-of-year exchange rate</i> [CT 1].
Value per inhabitant	Total value in USD [Table 2] divided by population [CT 1].
<i>Value as a percentage of GDP</i>	Total value [CT 4] divided by GDP [CT 1].
<i>Value as a percentage of narrow money</i>	Total value [CT 4] divided by narrow money [CT 2].

Table 3: Transferable deposits held by banks

Based on CT 3.

Transferable balances held at the central bank

Total value	Value of <i>transferable balances held at the central bank</i> [CT 3], converted to USD using the <i>end-of-year exchange rate</i> [CT 1].	
Value as a percentage of GDP	Value of <i>transferable balances held at the central bank</i> [CT 3], divided by GDP [CT 1].	
Transferable balances held at other banks		
Total value	Value of <i>transferable balances held at other banks</i> [CT 3], converted to USD using the <i>end-of-year exchange rate</i> [CT 1].	
Value as a percentage of GDP	Value of <i>transferable balances held at other banks</i> [CT 3], divided by <i>GDP</i> [CT 1].	

Table 4: Institutions offering payment services to non-banks

Based on CT 5.		
Number of institutions		
Total number	Total number of institutions offering payment services to non-banks [CT 5].	
Number per 1 million inhabitants	Total number of institutions [CT 5] divided by population [CT 1].	
Number of branches or offices		
Total number	Total number of branches or offices [CT 5].	
Number per 1 million inhabitants	Total number of branches or offices [CT 5] divided by population [CT 1].	

Table 5: Transferable deposits held by non-banks

Based on CT 5.	
Total number of accounts	Total number of accounts [CT 5].
Number of accounts per inhabitant	Number of accounts [CT 5] divided by population [CT 1].
Total value of accounts	Total value of accounts [CT 5], converted to USD using the end-of-year exchange rate [CT 1].
Value per inhabitant	Total value of accounts in USD [Table 5] divided by population [CT1].
Value as a percentage of GDP	Total value of accounts [CT 5] divided by GDP [CT 1].

Retail payment instruments

Table 6: Payment transactions by non-banks: total number of transactions

Based on CT 7.

Total number of transactions	Total number of transactions with payment instruments [CT 7]. This is equal to the sum of the sub-items of Table 7.
Increase in the number of transactions	Difference between <i>total number of transactions with payment instruments</i> [CT 7] in the current and previous year, divided by that number for the previous year, in per cent.
Number per inhabitant	<i>Total number of transactions with payment instruments</i> [CT 7] divided by <i>population</i> [CT 1]. This is equal to the sum of the sub-items of Table 7c.
Number per deposit account held by non-banks	Total number of transactions with payment instruments [CT 7] divided by transferable deposits [CT 2].

Table 7: Use of payment instruments by non-banks: number of transactions per payment instrument

Tables 7 and 7a–c are based on CT 7. The objective of these tables is to compare the volume of cashless payment instruments used in the countries concerned.

Credit transfers	Credit transfers [CT 7].
Direct debits	Direct debits [CT 7].
Cheques	Cheques [CT 7].
E-money payment transactions	E-money payment transactions [CT 7].
Card payments	Card payments with cards issued in the country [CT 7].
by cards with a debit function	Payments by card with a debit function [CT 7].
by cards with a delayed debit function	Payments by card with a delayed debit function [CT 7].
by cards with a credit function	Payments by card with a credit function [CT 7].

Table 7a: Use of payment instruments by non-banks: relative importance of payment instruments, in number of transactions

This table is based on CT 7 or on Table 7, in that it takes the figures concerning the use of payment instruments, in volume terms, and expresses them as a percentage of the total volume of payment instruments used by non-banks.

Credit transfers	<i>Credit transfers</i> [CT 7] expressed as a percentage of <i>total number</i> of <i>transactions with payment instruments</i> [CT 7].
Direct debits	Idem for <i>direct debits</i> [CT 7].
Cheques	Idem for <i>cheques</i> [CT 7].
E-money payment transactions	Idem for e-money payment transactions [CT 7].
Card payments	Idem for card payments with cards issued in the country [CT 7].

by cards with a debit function	Idem for payments by card with a debit function [CT 7].
by cards with a delayed debit function	Idem for payments by card with a delayed debit function [CT 7].
by cards with a credit function	Idem for payments by card with a credit function [CT 7].

Table 7b: Use of payment instruments by non-banks: increase in the number of transactions

This table is based on CT 7 or on Table 7, in that it takes the figures concerning the use of payment instruments, in volume terms, and calculates the year-on-year growth rate.

Credit transfers	Difference between the volume of <i>credit transfers</i> [CT 7] in the current and previous year, divided by that number for the previous year, in per cent.
Direct debits	Idem for <i>direct debits</i> [CT 7].
Cheques	Idem for <i>cheques</i> [CT 7].
E-money payment transactions	Idem for e-money payment transactions [CT 7].
Card payments	Idem for card payments with cards issued in the country [CT 7].
by cards with a debit function	Idem for payments by card with a debit function [CT 7].
by cards with a delayed debit function	Idem for payments by card with a delayed debit function [CT 7].
by cards with a credit function	Idem for payments by card with a credit function [CT 7].

Table 7c: Use of payment instruments by non-banks: number of transactions per inhabitant

This table is based on CT 7 or on Table 7, in that it takes the figures concerning the use of payment instruments, in volume terms, and expresses them as the number of transactions per inhabitant.

Credit transfers	Credit transfers [CT 7] divided by population [CT 1].
Direct debits	Idem for direct debits [CT 7].
Cheques	Idem for cheques [CT 7].
E-money payment transactions	Idem for <i>e-money payment transactions</i> [CT 7].
Card payments	Idem for card payments with cards issued in the country [CT 7].
by cards with a debit function	Idem for payments by card with a debit function [CT 7].
by cards with a delayed debit function	Idem for payments by card with a delayed debit function [CT 7].
by cards with a credit function	Idem for payments by card with a credit function [CT 7].

Table 8: Payment transactions by non-banks: total value of transactions

Based on CT 8.

Total value of transactions	<i>Total value of transactions with payment instruments</i> [CT 8], converted to USD using the <i>average exchange rate</i> [CT 1]. This is equal to the sum of the sub-items of Table 9.
Increase in the real value of transactions	Difference between <i>total value of transactions with payment instruments</i> [CT 8] in the current and previous year, divided by that number for the previous year, deflated by <i>CPI inflation</i> in the current year [CT 1], in per cent.
Average value per transaction	Total value of transactions with payment instruments in USD [Table 8] divided by total number of transactions with payment instruments [CT 7].
Average value per inhabitant	<i>Total value of transactions with payment instruments in USD</i> [Table 8] divided by <i>population</i> [CT 1].
Value as a ratio to GDP	Total value of transactions [CT 8] divided by GDP [CT 1].
Value as a ratio to deposits held by non-banks	<i>Total value of transactions</i> [CT 8] divided by <i>total value of deposit accounts</i> [CT 5].

Table 9: Use of payment instruments by non-banks: value of transactions per payment instrument

Tables 9 and 9a–e are based on CT 8. The objective of these tables is to compare the value of cashless payment instruments used in the countries concerned. These tables are based on the same general methodological guidance as Tables 7 and 7a–c.

Credit transfers	<i>Credit transfers</i> [CT 8], converted to USD using the <i>average exchange rate</i> [CT 1].
Direct debits	Direct debits [CT 8].
Cheques	Cheques [CT 8].
E-money payment transactions	E-money payment transactions [CT 8].
Card payments	Card payments with cards issued in the country [CT 8].
by cards with a debit function	Payments by card with a debit function [CT 8].
by cards with a delayed debit function	Payments by card with a delayed debit function [CT 8].
by cards with a credit function	Payments by card with a credit function [CT 8].

Table 9a: Use of payment instruments by non-banks: relative importance of payment instruments, in value of transactions

This table is based on CT 8 or on Table 9, in that it takes the figures concerning the use of payment instruments, in value terms, and expresses them as a percentage of the total value of payment instruments used by non-banks.

Credit transfers	Value of credit transfers [CT 8] expressed as a percentage of total value of transactions with payment instruments [CT 8].
Direct debits	Idem for <i>direct debits</i> [CT 8].
Cheques	Idem for <i>cheques</i> [CT 8].

E-money payment transactions	Idem for <i>e-money payment transactions</i> [CT 8].
Card payments	Idem for card payments with cards issued in the country [CT 8].
by cards with a debit function	Idem for payments by card with a debit function [CT 8].
by cards with a delayed debit function	Idem for payments by card with a delayed debit function [CT 8].
by cards with a credit function	Idem for payments by card with a credit function [CT 8].

Table 9b: Use of payment instruments by non-banks: increase in the real value of transactions

This table is based on CT 8 or on Table 9, in that it takes the figures concerning the use of payment instruments, in value terms and in domestic currency, and calculates the year-on-year growth rate, deflated by CPI inflation.

Credit transfers	Difference between the value of <i>credit transfers</i> [CT 8] in the current and previous year, divided by that number for the previous year, deflated by <i>CPI inflation</i> in the current year [CT 1], in per cent.
Direct debits	Idem for <i>direct debits</i> [CT 8].
Cheques	Idem for <i>cheques</i> [CT 8].
E-money payment transactions	Idem for e-money payment transactions [CT 8].
Card payments	Idem for card payments with cards issued in the country [CT 8].
by cards with a debit function	Idem for payments by card with a debit function [CT 8].
by cards with a delayed debit function	Idem for payments by card with a delayed debit function [CT 8].
by cards with a credit function	Idem for payments by card with a credit function [CT 8].

Table 9c: Use of payment instruments by non-banks: average value per transaction

This table is based on CTs 7 and 8 or on Tables 7 and 9, in that it takes the figures concerning the use of payment instruments, in value terms, and divides them by the volume of this use.

Credit transfers	Value of <i>credit transfers</i> [CT 8], converted to USD using the <i>average exchange rate</i> [CT 1], divided by the volume of <i>credit transfers</i> [CT 7].
Direct debits	Idem for <i>direct debits</i> [CT 8].
Cheques	Idem for <i>cheques</i> [CT 8].
E-money payment transactions	Idem for e-money payment transactions [CT 8].
Card payments	Idem for card payments with cards issued in the country [CT 8].
by cards with a debit function	Idem for payments by card with a debit function [CT 8].
by cards with a delayed debit function	Idem for payments by card with a delayed debit function [CT 8].
by cards with a credit function	Idem for payments by card with a credit function [CT 8].

Table 9d: Use of payment instruments by non-banks: value of transactions per inhabitant

This table is based on CT 8 or on Table 9, in that it takes the figures concerning the use of payment instruments, in value terms, and expresses them as a value of transactions per inhabitant.

Credit transfers	Value of <i>credit transfers</i> [CT 8], converted to USD using the <i>average exchange rate</i> [CT 1], divided by <i>population</i> [CT 1].
Direct debits	Idem for direct debits [CT 8].
Cheques	Idem for <i>cheques</i> [CT 8].
E-money payment transactions	Idem for <i>e-money payment transactions</i> [CT 8].
Card payments	Idem for card payments with cards issued in the country [CT 8].
by cards with a debit function	Idem for payments by card with a debit function [CT 8].
by cards with a delayed debit function	Idem for payments by card with a delayed debit function [CT 8].
by cards with a credit function	Idem for payments by card with a credit function [CT 8].

Table 9e: Use of payment instruments by non-banks: value of transactions as a ratio to GDP

This table is based on CT 8 or on Table 9, in that it takes the figures concerning the use of payment instruments, in value terms, and expresses them as a percentage of GDP.

Credit transfers	Value of credit transfers [CT 8] divided by GDP [CT 1].
Direct debits	Idem for direct debits [CT 8].
Cheques	Idem for <i>cheques</i> [CT 8].
E-money payment transactions	Idem for e-money payment transactions [CT 8].
Card payments	Idem for card payments with cards issued in the country [CT 8].
by cards with a debit function	Idem for payments by card with a debit function [CT 8].
by cards with a delayed debit function	Idem for payments by card with a delayed debit function [CT 8].
by cards with a credit function	Idem for payments by card with a credit function [CT 8].

Cards and terminals

Table 10: Cards issued in the country: number of cards

Based on CT 6.	
Cards with a cash function	Cards with a cash function [CT 6].
Cards with an e-money function which have been loaded at least once	Cards with an e-money function which have been loaded at least once [CT 6].
Cards with a payment function	Sum of cards with a debit function, cards with a delayed debit function and cards with a credit function [CT 6].
debit function	Cards with a debit function [CT 6].
delayed debit function	Cards with a delayed debit function [CT 6].
	If no distinction is possible between cards with a credit and/or debit function and those with a delayed debit function, they are presented under this item.
credit function	Cards with a credit function [CT 6].

Table 10a: Cards issued in the country: increase in the number of cards

This table is based on CT 6, in that it takes the figures concerning the number of cards and calculates the year-on-year growth rate.

Cards with a cash function	Difference between <i>cards with a cash function</i> [CT 6] in the current and previous year, divided by that number for the previous year, in per cent.
Cards with an e-money function which have been loaded at least once	Idem for cards with an e-money function which have been loaded at least once [CT 6].
Cards with a payment function	Idem for the sum of cards with a debit function, cards with a delayed debit function and cards with a credit function [CT 6].
debit function	Idem for cards with a debit function [CT 6].
delayed debit function	Idem for cards with a delayed debit function [CT 6].
credit function	Idem for cards with a credit function [CT 6].

Table 10b: Cards issued in the country: number of cards per inhabitant

This table is based on CT 6, in that it takes the number of cards and divides them by the country's population. It gives an indication of the penetration of cards in the population of different countries.

Cards with a cash function	Cards with a cash function [CT 6] divided by population [CT 1].
Cards with an e-money function which have been loaded at least once	Idem for cards with an e-money function which have been loaded at least once [CT 6].

Cards with a payment function	Idem for the sum of cards with a debit function, cards with a delayed debit function and cards with a credit function [CT 6].
debit function	Idem for cards with a debit function [CT 6].
delayed debit function	Idem for cards with a delayed debit function [CT 6].
credit function	Idem for cards with a credit function [CT 6].

Table 11: Terminals located in the country: number of terminals

Based on CT 6.	
ATMs	<i>ATM</i> s [CT 6].
POS terminals	POS terminals [CT 6].
E-money loading/unloading terminals	E-money loading/unloading terminals [CT 6].
E-money card payment terminals	E-money card payment terminals [CT 6].

Table 11a: Terminals located in the country: increase in the number of terminals

This table is based on CT 6, in that it takes the figures concerning the number of terminals and calculates the year-on-year growth rate.

ATMs	Difference between <i>ATMs</i> [CT 6] in the current and previous year, divided by that number for the previous year, in per cent.
POS terminals	Idem for POS terminals [CT 6].
E-money loading/unloading terminals	Idem for e-money loading/unloading terminals [CT 6].
E-money card payment terminals	Idem for e-money card payment terminals [CT 6].

Table 11b: Terminals located in the country: number of terminals per million inhabitants

This table is based on CT 6, in that it takes the number of terminals and divides them by the country's population. It shows the density of terminals, expressed in terms of population, in the different countries.

ATMs	ATMs [CT 6] divided by population.
POS terminals	Idem for POS terminals [CT 6].
E-money loading/unloading terminals	Idem for <i>e-money loading/unloading terminals</i> [CT 6].
E-money card payment terminals	Idem for <i>e-money card payment terminals</i> [CT 6].

Table 12: Transactions at terminals: number of cash withdrawals and loading transactions

This table is based on CT 7. It gives an indication of the number of transactions conducted at terminals located in and outside the country with cards issued in and outside the country.

Cash withdrawals at ATMs located in the country

with cards issued outside the country	Transactions at terminals in the country by cards issued outside the country: ATM cash withdrawals [CT 7].	
with cards issued in the country	Transactions at terminals in the country by cards issued in the country: ATM cash withdrawals [CT 7].	
Cash withdrawals at ATMs located outside the country		
with cards issued in the country	Transactions at terminals outside the country by cards issued in the country: ATM cash withdrawals [CT 7].	
E-money loading/unloading transactions at terminals in the country		
with cards issued in the country	Transactions at terminals in the country by cards issued in the country: e-money loading/unloading transactions [CT 7].	

Table 12a: Transactions at terminals: increase in the number of cash withdrawals and loading transactions

This table is based on CT 7 or on Table 12, in that it takes the figures concerning the use of cards, in volume terms, and calculates the year-on-year growth rate.

Cash withdrawals at ATMs located in the country

with cards issued	Difference between the number of transactions at terminals in the country
outside the country	by cards issued outside the country: ATM cash withdrawals [CT 7] in the
	current and previous year, divided by that number for the previous year, in
	per cent.

with cards issued in the ldem for transactions at terminals in the country by cards issued in the country: ATM cash withdrawals [CT 7].

Cash withdrawals at ATMs located outside the country

with cards issued in the Idem for transactions at terminals outside the country by cards issued in the country: ATM cash withdrawals [CT 7].

E-money loading/unloading transactions at terminals in the country

with cards issued in the ldem for transactions at terminals in the country by cards issued in the country: e-money loading/unloading transactions [CT 7].

Table 13: Transactions at terminals: value of cash withdrawals and loading transactions

This table is based on CT 8 (the amounts have been converted to USD using the *average exchange rate* [CT 1]). It gives an indication of the value of card transactions conducted at terminals located in the country, either with cards issued in the country or with cards issued outside the country.

Cash withdrawals at ATMs located in the country

with cards issued outside the country	Transactions at terminals in the country by cards issued outside the country: ATM cash withdrawals [CT 8].	
with cards issued in the country	Transactions at terminals in the country by cards issued in the country: ATM cash withdrawals [CT 8].	
Cash withdrawals at ATMs located outside the country		
with cards issued in the country	Transactions at terminals outside the country by cards issued in the country: ATM cash withdrawals [CT 8].	

E-money loading/unloading transactions at terminals in the country

with cards issued in the Transactions at terminals in the country by cards issued in the country: e-money loading/unloading transactions [CT 8].

Table 13a: Transactions at terminals: increase in the real value of cash withdrawals and loading transactions

This table is based on CT 8 or on Table 13, in that it takes the figures concerning the use of cards, in value terms, and calculates the year-on-year growth rate, deflated by CPI inflation.

Cash withdrawals at ATMs located in the country

with cards issued outside the country	Difference between the value of <i>transactions at terminals in the country by cards issued outside the country: ATM cash withdrawals</i> [CT 8] in the current and previous year, divided by that number for the previous year, deflated by <i>CPI inflation</i> in the current year [CT 1], in per cent.	
with cards issued in the country	Idem for transactions at terminals in the country by cards issued in the country: ATM cash withdrawals [CT 8].	
Cash withdrawals at ATMs located outside the country		
with cards issued in the country	Idem for transactions at terminals outside the country by cards issued in the country: ATM cash withdrawals [CT 8].	
E-money loading/unloading transactions at terminals in the country		
with cards issued in the country	Idem for transactions at terminals in the country by cards issued in the country: e-money loading/unloading transactions [CT 8].	

Table 14: Transactions at terminals: number of payment transactions

This table is based on CT 7. It gives an indication of card payments conducted at terminals located in the country, either with cards issued in the country or with cards issued outside the country.

POS transactions at terminals located in the country

with cards issued outside the country	Transactions at terminals in the country by cards issued outside the country: POS payment transactions [CT 7].
with cards issued in the country	Transactions at terminals in the country by cards issued in the country: POS payment transactions [CT 7].

POS transactions at terminals located outside the country

with cards issued in the Transactions at terminals outside the country by cards issued in the country: POS payment transactions [CT 7].

E-money payment transactions at terminals in the country

with cards issued in the E-money payment transactions by cards with an e-money function [CT 7]. country

Table 14a: Transactions at terminals: increase in the number of payment transactions

This table is based on CT 7 or on Table 14, in that it takes the figures concerning the use of payment and e-money cards, in volume terms, and calculates the year-on-year growth rate.

POS transactions at terminals located in the country

with cards issued Difference between the number of *transactions at terminals in the country* by cards issued outside the country: POS payment transactions [CT 7] in the current and previous year, divided by that number for the previous year, in per cent.

with cards issued in the ldem for transactions at terminals in the country by cards issued in the country: POS payment transactions [CT 7].

POS transactions at terminals located outside the country

with cards issued in the ldem for transactions at terminals outside the country by cards issued in the country: POS payment transactions [CT 7].

E-money payment transactions at terminals in the country

with cards issued in the ldem for transactions e-money payment transactions by cards with an e-money function [CT 7].

Table 15: Transactions at terminals: value of payment transactions

This table is based on CT 8 (the amounts have been converted to USD using the *average exchange rate* [CT 1]). It gives an indication of the value of card payments conducted at terminals located in the country, either with cards issued in the country or with cards issued outside the country.

POS transactions at terminals located in the country

with cards issued outside the country	Transactions at terminals in the country by cards issued outside the country: POS payment transactions [CT 8].	
with cards issued in the country	Transactions at terminals in the country by cards issued in the country: POS payment transactions [CT 8].	
POS transactions at terminals located outside the country		
with cards issued in the country	Transactions at terminals outside the country by cards issued in the country: POS payment transactions [CT 8].	
-	a construction of the second sec	

E-money payment transactions at terminals in the country

with cards issued in the E-money payment transactions by cards with an e-money function [CT 8]. country

Table 15a: Transactions at terminals: increase in the real value of payment transactions

This table is based on CT 8 or on Table 15, in that it takes the figures concerning the use of payment and e-money cards, in value terms, and calculates the year-on-year growth rate, deflated by CPI inflation.

POS transactions at terminals located in the country

with cards issued outside the country	Difference between the value of <i>transactions at terminals in the country by cards issued outside the country: POS payment transactions</i> [CT 7] in the current and previous year, divided by that number for the previous year, deflated by <i>CPI inflation</i> in the current year [CT 1], in per cent.	
with cards issued in the country	Idem for transactions at terminals in the country by cards issued in the country: POS payment transactions [CT 7].	
POS transactions at terminals located outside the country		
with cards issued in the country	Idem for transactions at terminals outside the country by cards issued in the country: POS payment transactions [CT 7].	
E-money payment transactions at terminals in the country		
with cards issued in the country	Idem for <i>e-money payment transactions by cards with an e-money function</i> [CT 8].	

Interbank funds transfer systems (IFTSs)

Table PS1: Features of selected interbank funds transfer systems

Figures are new and are not presented in the CTs. The first category, *System*, is presented in all payment systems (PS) tables.

System	All systems presented in CT 9.
Туре	Large-value payment system (L); retail payment system (R); foreign exchange settlement system (FX).
	If the IFTS processes large-value and retail payments, it is shown as $L+R$.
Settlement	Real-time gross settlement (RTGS).
	Net (N), of which multilateral netting (MN) and bilateral netting (BN).
	Gross (G): other gross settlement.
	Batch settlement (BA): settlement of batches in gross value without netting.
Owner/manager	Central bank (CB), commercial banks (B) or a payment association (PA).
Processing	<i>Manual</i> (<i>M</i>), <i>automated clearing house</i> (offline, via an electronic clearing system in which payment orders are exchanged among financial institutions and handled by a data processing centre; <i>ACH</i>) or <i>real-time transmission</i> (the transmission of funds transfer instructions on an individual basis at the time they are initiated; <i>RTT</i>).
Membership	<i>Open</i> (any bank can apply; <i>O</i>) or <i>restricted</i> (subject to criteria; <i>R</i>).
Degree of centralisation	<i>Centralised</i> (one processing centre where all settlement instructions are processed; <i>C</i>) or <i>decentralised</i> (more than one processing centre; <i>D</i>).
Pricing	Costs passed on to payment system participants: <i>full cost</i> (F), including investments with a view to cost recovery, <i>variable cost</i> (V), with a view to recovering the costs of transactions, <i>symbolic cost</i> (S), below variable cost, or <i>no cost</i> (O).
Closing time for same day transactions	Latest time of the day at which transactions can be sent to the system for settlement on the same day; in local time.
Settlement finality	Real time in RTGS systems.
	<i>Intraday</i> in prefunded net systems. Intraday finality is settlement finality achieved continuously or several times throughout the settlement day. It can be provided through real-time settlement procedures and/or the settlement of the results of multiple batch processing during the settlement day.
	At specific times of the day (in local time) in other net and gross systems.
Cufoff third-party orders	Latest time of the day at which transactions can be sent by third-party or indirect participants to the system for settlement on the same day; in local time.
Standard money market hours	Opening and closing expressed in local time.

Table PS2: Payments processed by selected interbank funds transfer systems: number of transactions

Based on CT 10.	
Number of transactions	Total number of transactions per system [CT 10].
Increase in the number of transactions	Difference between the <i>total number of transactions</i> per system [CT 10], for the current and previous year, divided by that number for the previous year, in per cent.

Table PS3: Payments processed by selected interbank funds transfer systems: value of transactions

Based on CTs 10 and 11.

Value of transactions	<i>Total value of transactions</i> per system [CT 11], converted to USD using the <i>average exchange rate</i> [CT 1].
Average value per transaction	<i>Total value of transactions</i> per system [CT 11], converted to USD using the <i>average exchange rate</i> [CT 1], divided by <i>total number of transactions</i> per system [CT 10].
Increase in the real value of transactions	Difference between the <i>total value of transactions</i> per system [CT 10] in the current and previous year, divided by that number for the previous year, deflated by <i>CPI inflation</i> in the current year [CT 1], in per cent.
Value of transactions as a percentage of GDP	<i>Total value of transactions</i> per system [CT 11], divided by <i>GDP</i> [CT 1], in per cent.

Table PS4: Participation in selected interbank funds transfer systems

Figures concerning participation in payment systems.come from CT 9 and concentration ratios from CTs 10 and 11.

Total number of participants	Total number of participants [CT 9].
of which: direct participants	Direct participants [CT 9].
Concentration ratio in terms of volume	Concentration ratio in terms of volume [CT 10], in per cent.
Concentration ratio in terms of value	Concentration ratio in terms of value [CT 11], in per cent.

Securities trading, clearing and settlement

Table TRS1: Features of selected exchanges and trading systems

Figures are new and are not presented in the CTs. The first category, *Exchange/system*, is presented in all trading systems (TRS) tables.

Exchange/system	All exchanges and trading systems presented in CTs 14–18.
Owner/manager	Central bank (CB), commercial banks (B), a stock exchange (SE) or other (O).
	If owner and manager differ, both are provided. If (fully or partially) owned by another exchange, the name of that exchange is provided, as well as the share of its ownership rights.
Markets/products	Securities (SEC): bonds (B), certificates of deposit (C), government securities (G), equity (E) and/or other (O); derivatives (DER).
Trading	Floor trading (FLT) or electronic trading (ELT).
Operating times	Opening and closing time of the exchange/system; in local time.
Relationship with the central counterparty (CCP)	The CCP belongs to the same entity as the exchange = internal (<i>int</i>); is a subsidiary of the exchange = parental (<i>par</i>); or is independent from the exchange (<i>indep</i>). The name of the CCP is provided.

Table TRS2: Trades executed on selected exchanges and trading systems: number of transactions

Based on CT 17.

Number of transactions	Total number of transactions per system [CT 17].
Increase in the number of transactions	Difference between the <i>total number of transactions</i> [CT 17] per system in the current and previous year, divided by that number for the previous year, in per cent.

Table TRS3: Transactions processed by selected exchanges and trading systems: value of transactions

Based on CTs 17 and 18.

Value of transactions	<i>Total value of transactions</i> per system [CT 18], converted to USD using the <i>average exchange rate</i> [CT 1].
Average value per transaction	<i>Total value of transactions</i> per system [CT 18], converted to USD using the <i>average exchange rate</i> [CT 1], divided by <i>total number of transactions</i> per system [CT 17].
Increase in the real value of transactions	Difference between the <i>total value of transactions</i> per system [CT 18] in the current and the previous year, divided by the <i>total value of transactions</i> [CT 18] in the previous year, deflated by <i>CPI inflation</i> in the current year [CT 1], in per cent.
Value of transactions as a percentage of GDP	<i>Total value of transactions</i> per system [CT 18], divided by <i>GDP</i> [CT 1], in per cent.

Table TRS4: Participation in selected exchanges and trading systems

Based on CT 14.	
Total number of participants	Number of participants in trading systems – total [CT 14].

Table TRS5: Securities listed on selected exchanges and trading systems

Based on CTs 15 and 16.

Number of securities listed	Total number of securities listed [CT 15].
Market capitalisation	<i>Total market capitalisation</i> [CT 16], converted to USD using the <i>end-of- year exchange rate</i> [CT 1].

Table CCP1: Features of selected central counterparties and clearing houses

Figures are new and are not presented in the CTs. The first category, *Entity,* is presented in all CCP tables.

Entity	All CCPs presented in CTs 19–21.
CCP or clearing house	The entity is a central counterparty (CCP) or a clearing house (CH).
Owner/manager	Central bank (CB), commercial banks (B), a stock exchange (SE), another CCP (CCP) or clearing house (CH) or other (O).
	If owner and manager differ, both are provided. If (fully or partially) owned by an exchange, a CCP or a clearing house, the name of that entity is provided, as well as the share of its ownership rights.
Relationship with exchange	The CCP belongs to the same entity as the exchange = internal (<i>int</i>); is a subsidiary of the exchange = parental (<i>par</i>); or is independent from the exchange (<i>indep</i>). The name of the CCP is provided.
Relationship with CSD	The CCP belongs to the same entity as the CSD = internal (<i>int</i>); is a subsidiary of the CSD = parental (<i>par</i>); or is independent from the CSD (<i>indep</i>). The name of the CSD is provided.
Intraday margining	<i>Routine</i> and/or <i>event-driven</i> . When event-driven, price-driven (<i>P</i>) or size- driven (<i>S</i>).
Products/markets cleared	Securities (SEC), derivatives (DER) and/or repos (REP).
Currencies	ISO code of the cleared currencies.
Securities settlement agent	The securities settlement agent (<i>CSD</i> (the name of the CSD is provided), <i>central bank</i> (<i>CB</i>), <i>commercial banks</i> (<i>B</i>) or <i>other</i> (<i>O</i>)) settles the securities leg of the transaction. The information is given per product and per currency.
Cash settlement agent	The cash settlement agent (<i>central bank</i> (<i>CB</i>), <i>commercial banks</i> (<i>B</i>) or <i>other</i> (<i>O</i>)) settles the cash leg of the securities transaction. The information is given per product and per currency.
Links to other CCPs	Such links can be based on <i>cross-participation</i> or on <i>common systems</i> . The number of links is provided per currency area.

Table CCP2: Transactions cleared by selected central counterparties and clearing houses: number of transactions

Based on CT 20.Number of transactionsTotal number of transactions per CCP or clearing house [CT 20].Increase in the number
of transactionsDifference between the total number of transactions [CT 20] per CCP or
clearing house in the current and previous year, divided by that number for
the previous year, in per cent.

Table CCP3: Transactions cleared by selected central counterparties and clearing houses: value of transactions

Based on CTs 20 and 21.

Value of transactions	<i>Total value of transactions</i> per CCP or clearing house [CT 21], converted to USD using the <i>average exchange rate</i> [CT 1].
Average value per transaction	<i>Total value of transactions</i> per CCP or clearing house [CT 21], converted to USD using the <i>average exchange rate</i> [CT 1], divided by <i>total number of transactions</i> per system [CT 20].
Increase in the real value of transactions	Difference between the <i>total value of transactions</i> per system [CT 21] in the current and the previous year, divided by the <i>total value of transactions</i> [CT 21] in the previous year, deflated by <i>CPI inflation</i> in the current year [CT 1], in per cent.
Value of transactions as a percentage of GDP	<i>Total value of transactions</i> CCP or clearing house [CT 21], divided by <i>GDP</i> [CT 1], in per cent.

Table CCP4: Participation in selected central counterparties and clearing houses

Based on CT 19.	
Total number of participants	Number of participants in CCPs and clearing houses – total [CT 19].

Table CSD1: Features of selected central securities depositories

Figures are new and are not presented in the CTs. The first category, *CSD*, is presented in all central securities depositories (CSDs) tables.

CSD	All CSDs presented in CTs 22–26.
Type of securities held	Domestic securities (DOM) and/or international securities (INT). Bonds (B), certificates of deposit (C), government securities (G), equity (E) and/or other (O).
Owner/manager	Central bank (CB), commercial banks (B), the stock exchange (SE) or other (O).
Securities settlement system	Name of the settlement system(s). If more than one system is in operation during the reporting period for the statistical tables, information and data can be sent separately for each settlement system.
Closing time for same day transactions	Latest time of the day at which transactions can be sent to the system for settlement on the same day; in local time.
Links to other CSDs	Such links can be <i>direct</i> (based on cross-participation), or <i>indirect</i> (through local agents). They can allow <i>FoP</i> or <i>DVP</i> settlement. The number of links and their category is provided per currency area.

- *Delivery lag (T+n)* Time lag between entering into a trade/bargain and its discharge by the final exchange of a financial asset for payment.
- Intraday finality Settlement finality achieved continuously or several times throughout the settlement day. Intraday finality can be provided through real-time settlement procedures and/or the settlement of the results of multiple batch processing during the settlement day (*yes* if the system offers intraday finality; *no* otherwise).
- *DVP (delivery versus payment) mechanism* A link between a securities transfer system and a funds transfer system that ensures that delivery occurs if, and only if, payment occurs.
 - In *DVP model 1*, transfer instructions for both securities and funds are settled on a trade-by-trade basis, with final transfer of securities from the seller to the buyer (delivery) occurring at the same time as final transfer of the funds from the buyer to the seller (payment).

In *DVP model 2*, securities transfer instructions are settled on a gross basis, with final transfer of securities from the seller to the buyer (delivery) occurring throughout the processing cycle, but funds transfer instructions are settled on a net basis, with final transfer of the funds from the buyer to the seller (payment) occurring at the end of the processing cycle.

In *DVP model 3*, transfer instructions for both securities and funds are settled on a net basis, with final transfer of both securities and funds occurring at the end of the processing cycle.

Currencies For domestic CSDs, ISO code of the currencies in which settlement can be done; for international CSDs, number of currencies in which settlement can be done.

Cash settlement agent The cash settlement agent (central bank (CB), commercial banks (B), stock exchange (SE) or other (the name of the cash settlement agent is provided)) settles the cash leg of the securities transactions. The information is provided per currency, when relevant.

Table CSD2: Transactions processed by selected central securities depositories: number of transactions

Based on CT 25.

Number of transactionsTotal number of transactions per CSD [CT 25].Increase in the numberDifference between the total number of transactions [CT 25] per CSD in
the current and previous year, divided by that number for the previous

year, in per cent.

Table CSD3: Transactions processed by selected central securities depositories: value of transactions

Based on CTs 25 and 26.

Value of transactions	<i>Total value of transactions</i> per CSD [CT 26], converted to USD using the average exchange rate [CT 1].
Average value per transaction	<i>Total value of transactions</i> per CSD [CT 26], converted to USD using the <i>average exchange rate</i> [CT 1], divided by <i>total number of transactions</i> per CSD [CT 25].
Increase in the real value of transactions	Difference between the <i>total value of transactions</i> per CSD [CT 26] in the current and the previous year, divided by the <i>total value of transactions</i> [CT 26] in the previous year, deflated by <i>CPI inflation</i> in the current year [CT 1], in per cent.

Value of transactions as Total value of transactions per CSD [CT 126], divided by *GDP* [CT 1], in per cent.

Table CSD4: Participation in selected central securities depositories

Based on CT 22.	
Total number of participants	Number of participants in CSDs – total [CT 22].

Table CSD5: Securities held on account at selected central securities depositories

Based on CTs 23 and 24.Number of securities
heldTotal number of securities held [CT 23].Value of securities heldTotal value of securities held [CT 24], converted to USD using the average
exchange rate [CT 1].
