Consultative document: Capital treatment for "simple, transparent and comparable" securitisations - consultative document(/bcbs/publ/d343.pdf)
Classification: Public

Comments:

ad Q 4:
In general the risk weights proposed in Section 4 of the consultative document are on the right track. To guarantee that STC-securitisations will be attractive as a financial instrument for all potential investors, thus risk weights have to be reduced further. This would also be in accord with the European Commission's goals of the Capital Market Union.
