Transitional arrangements

This chapter describes transitional arrangements for the output floor.

Version effective as of 01 January 2022

First version in the format of the consolidated framework.

BANK FOR INTERNATIONAL SETTLEMENTS

This document has been generated on 29/08/2026 based on the Basel Framework data available on the BIS website (www.bis.org).

90.1

The output floor will be implemented as of 1 January 2022, based on the following calibration phase-in arrangement:

Phase-in arrangements for output floor	Table 1
Date	Calibration
1 January 2022	50%
1 January 2023	55%
1 January 2024	60%
1 January 2025	65%
1 January 2026	70%
1 January 2027	72.5%

90.2

During the phase-in period, supervisors may exercise national discretion to cap the incremental increase in a bank's total risk-weighted assets (RWA) that results from the application of the floor. This transitional cap will be set at 25% of a bank's RWA before the application of the floor. In the example shown in RBC20.13, the application of this national discretion by the supervisor would cap the bank's RWA to 95 (ie a 25% increase of its pre-floor RWA of 76).
