Law 27,440 which was enacted on May 9th 2018, amended Law 26,831 of Capital Markets. The law reinforced the legal grounds of Central Counterparties (CCPs), giving them a stronger legal status. An important reason for that was to highlight and promote their contribution to counterparty credit risk management by allowing for multilateral netting, reducing uncertainty about participants’ exposures and increasing the transparency of market activity. The amendment also empowered the CNV with additional flexibility to establish and modify the requirements of the reserves constituted by the CCP with their own resources as well as with those of third parties, and to create different types of guarantee funds in order to manage the risks that their infrastructures and their participants are exposed to.

On January 11th, 2018 CNV issued RG No. 720/2018 regarding short selling and securities lending, which up to that moment was only available for failures in settlement.

In line with the amendment of Law No 26,831, on November 22nd 2019 CNV issued General Resolution No. 817/2019, which includes higher capital requirements for CCP, the obligation to carry out stress tests in order to evaluate the adequacy of CCP financial resources and the mandatory establishment of a risk committee. General Resolution No. 817/2019 entered into force on November 25th, 2019.

At present, there are no TRs in Argentina. Nevertheless, there are TR-like entities, as defined by the FSB.

CNV published Rules 2013 on 31 July 2013.
Law 27,440 which was enacted on May 9th 2018, amended Law 26,831 of Capital Markets.
Among other changes, it defines the "Registry of Derivatives Transactions" as the registry of the derivatives contracts traded on a bilateral basis outside authorized markets by the Commission. This registry should be carried on by the "Register Entities of Derivative Transaction" (TRs) or by the markets and CCP (TR-like entities). In the same line, it defines –and brings legal status to- the "Register Entities of Derivatives Transactions" (TRs) as legal entities with the main goal of complying with the functions established by CNV Rules and subject to CNV authorization.

Furthermore, Law 27,440 includes close-out netting disposition for OTC derivatives.

On November 28th, 2018 CNV issued General Resolution No. 775/2018 which regulates the collection and record of information regarding OTC derivative contracts and repo in a centralized manner, and the provision of the registered data by TR-line entities to CNV.

**Comments:**
CNV continuous to work on the implementation measures (for CDSs/SSSs and CCPs, the regulation does not include mechanisms with regard to Principle No. 15 General Business Risk".
