**Comments:**

In the area in which the jurisdiction has already a “4”, the new information is included to make sure that the Level 1 reflects the most current information for all FMI types.

For TRs, the US self-assessment reflects a split rating on the basis that certain elements of the PFMI are at different points of adoption and that this is clear and transparent in public documents. The US included in the split ratings a:

- “4” on the basis that certain elements have been adopted (in final form) in regulations, are in force, and that this is clear and transparent in public documents; and
- “2” on the basis that certain other elements have been proposed but not been adopted (in final form) in regulations.

The CFTC and the SEC have completed all measures necessary to incorporate fully the PFMI into their regulatory frameworks for CCPs, and the SEC has done so also with CSDs.

The Federal Reserve Board has completed all measures necessary to fully incorporate the PFMI into its regulatory framework for CCPs, PSs, and CSDs and SSSs.
