

Canada

This document provides citations of the relevant legislation, regulation, policy and guidance, and notes explaining the assigned ratings for all relevant Principles of a given jurisdiction, by FMI type. It is a direct download of all the information for one jurisdiction that is included in the online CPMI-IOSCO PFMI implementation database (www.bis.org/pfmi/index.htm and www.iosco.org/about/?subsection=cpmi_iosco). It includes all Principles and all key considerations: for the ones where gaps were identified the last column provides details on key conclusions and recommendations. The online CPMI-IOSCO PFMI implementation database allows to search information by Principle across different jurisdictions.

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
PS	1.0	An FMI should have a well-founded, clear, transparent, and enforceable legal basis for each material aspect of its activities in all relevant jurisdictions.		The BoC has adopted the PFMI and key considerations verbatim as its risk management standards.	Consistent	
PS	1.1	An FMI should have a well-founded, clear, transparent, and enforceable legal basis for each material aspect of its activities in all relevant jurisdictions.	The legal basis should provide a high degree of certainty for each material aspect of an FMI's activities in all relevant jurisdictions.	BoC Standard 1: Legal Basis	Consistent	
PS	1.2	An FMI should have a well-founded, clear, transparent, and enforceable legal basis for each material aspect of its activities in all relevant jurisdictions.	An FMI should have rules, procedures, and contracts that are clear, understandable, and consistent with relevant laws and regulations.	BoC Standard 1: Legal Basis	Consistent	
PS	1.3	An FMI should have a well-founded, clear, transparent, and enforceable legal basis for each material aspect of its activities in all relevant jurisdictions.	An FMI should be able to articulate the legal basis for its activities to relevant authorities, participants, and, where relevant, participants'		Consistent

			customers, in a clear and understandable way.	BoC Standard 1: Legal Basis		
PS	1.4	An FMI should have a well-founded, clear, transparent, and enforceable legal basis for each material aspect of its activities in all relevant jurisdictions.	An FMI should have rules, procedures, and contracts that are enforceable in all relevant jurisdictions. There should be a high degree of certainty that actions taken by the FMI under such rules and procedures will not be voided, reversed, or subject to stays.	BoC Standard 1: Legal Basis	Consistent	
PS	1.5	An FMI should have a well-founded, clear, transparent, and enforceable legal basis for each material aspect of its activities in all relevant jurisdictions.	An FMI conducting business in multiple jurisdictions should identify and mitigate the risks arising from any potential conflict of laws across jurisdictions.	BoC Standard 1: Legal Basis	Consistent	
PS	2.0	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.		The Bank of Canada has adopted the PFMI and key considerations verbatim as its risk management standards. In addition, supplementary guidance was provided on the Governance Principle.	Consistent	
PS	2.1	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the	An FMI should have objectives that place a high priority on the safety and efficiency of the FMI and explicitly support financial stability and other relevant public interest considerations.		Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		objectives of relevant stakeholders.		BOC Standard 2: Governance		
PS	2.2	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	An FMI should have documented governance arrangements that provide clear and direct lines of responsibility and accountability. These arrangements should be disclosed to owners, relevant authorities, participants, and, at a more general level, the public.	BOC Standard 2: Governance	Consistent	
PS	2.3	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The roles and responsibilities of an FMI's board of directors (or equivalent) should be clearly specified, and there should be documented procedures for its functioning, including procedures to identify, address, and manage member conflicts of interest. The board should review both its overall performance and the performance of its individual board members regularly.	BOC Standard 2: Governance	Consistent	
PS	2.4	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The board should contain suitable members with the appropriate skills and incentives to fulfil its multiple roles. This typically requires the inclusion of non-executive board member(s).	BOC Standard 2: Governance	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
PS	2.5	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The roles and responsibilities of management should be clearly specified. An FMI's management should have the appropriate experience, a mix of skills, and the integrity necessary to discharge their responsibilities for the operation and risk management of the FMI.	BOC Standard 2: Governance	Consistent	
PS	2.6	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The board should establish a clear, documented risk-management framework that includes the FMI's risk-tolerance policy, assigns responsibilities and accountability for risk decisions, and addresses decision making in crises and emergencies. Governance arrangements should ensure that the risk-management and internal control functions have sufficient authority, independence, resources, and access to the board.	BOC Standard 2: Governance	Consistent	
PS	2.7	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The board should ensure that the FMI's design, rules, overall strategy, and major decisions reflect appropriately the legitimate interests of its direct and indirect participants and other relevant stakeholders. Major decisions should be clearly disclosed to relevant stakeholders and, where there is a broad market impact, the public.	BOC Standard 2: Governance	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
PS	3.0	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.		The Bank of Canada has adopted the PFMI and key considerations verbatim as its risk management standards.	Consistent	
PS	3.1	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.	An FMI should have risk-management policies, procedures, and systems that enable it to identify, measure, monitor, and manage the range of risks that arise in or are borne by the FMI. Risk-management frameworks should be subject to periodic review.	BOC Standard 3: Framework for the Comprehensive Management of Risks	Consistent	
PS	3.2	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.	An FMI should provide incentives to participants and, where relevant, their customers to manage and contain the risks they pose to the FMI.	BOC Standard 3: Framework for the Comprehensive Management of Risks	Consistent	
PS	3.3	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.	An FMI should regularly review the material risks it bears from and poses to other entities (such as other FMIs, settlement banks, liquidity providers, and service providers) as a result of interdependencies and develop appropriate risk-management tools to address these risks.	BOC Standard 3: Framework for the Comprehensive Management of Risks	Consistent	
PS	3.4	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.	An FMI should identify scenarios that may potentially prevent it from being able to provide its critical operations and services as a going concern and assess the effectiveness of a full range of options for recovery or orderly	BOC Standard 3: Framework for the Comprehensive	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
			wind-down. An FMI should prepare appropriate plans for its recovery or orderly wind-down based on the results of that assessment. Where applicable, an FMI should also provide relevant authorities with the information needed for purposes of resolution planning.	Management of Risks		
PS	4.0	An FMI should effectively measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes. An FMI should maintain sufficient financial resources to cover its credit exposure to each participant fully with a high degree of confidence. In addition, a CCP that is involved in activities with a more-complex risk profile or that is systemically important in multiple jurisdictions should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the two participants and their affiliates that would potentially cause the largest aggregate credit exposure to the CCP in extreme but plausible market conditions. All other CCPs should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should		The Bank of Canada has adopted the PFMI and key considerations verbatim as its	Consistent

		credit exposure to the CCP in extreme but plausible market conditions.		BOC Standard 4: Credit Risk		
PS	5.0	An FMI that requires collateral to manage its or its participants' credit exposure should accept collateral with low credit, liquidity, and market risks. An FMI should also set and enforce appropriately conservative haircuts and concentration limits.		The Bank of Canada has adopted the PFMI and key considerations verbatim as its risk management standards. In addition, supplementary guidance was provided on certain elements of the Collateral Principle.	Consistent	
PS	5.1	An FMI that requires collateral to manage its or its participants' credit exposure should accept collateral with low credit, liquidity, and market risks. An FMI should also set and enforce appropriately conservative haircuts and concentration limits.	An FMI should generally limit the assets it (routinely) accepts as collateral to those with low credit, liquidity, and market risks.	BOC Standard 5: Collateral	Consistent	
PS	5.2	An FMI that requires collateral to manage its or its participants' credit exposure should accept collateral with low credit, liquidity, and market risks. An FMI should also set and enforce appropriately conservative haircuts and concentration limits.	An FMI should establish prudent valuation practices and develop haircuts that are regularly tested and take into account stressed market conditions.	BOC Standard 5: Collateral	Consistent	
PS	5.3	An FMI that requires collateral to manage its or its participants' credit exposure should accept collateral with low credit, liquidity, and market risks. An FMI should also set and enforce appropriately conservative haircuts and concentration limits.	In order to reduce the need for procyclical adjustments, an FMI should establish stable and conservative haircuts that are calibrated to include periods of stressed market conditions, to the extent practicable and prudent.	BOC Standard 5: Collateral	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
PS	5.4	An FMI that requires collateral to manage its or its participants' credit exposure should accept collateral with low credit, liquidity, and market risks. An FMI should also set and enforce appropriately conservative haircuts and concentration limits.	An FMI should avoid concentrated holdings of certain assets where this would significantly impair the ability to liquidate such assets quickly without significant adverse price effects.	BOC Standard 5: Collateral	Consistent	
PS	5.5	An FMI that requires collateral to manage its or its participants' credit exposure should accept collateral with low credit, liquidity, and market risks. An FMI should also set and enforce appropriately conservative haircuts and concentration limits.	An FMI that accepts cross-border collateral should mitigate the risks associated with its use and ensure that the collateral can be used in a timely manner.	BOC Standard 5: Collateral	Consistent	
PS	5.6	An FMI that requires collateral to manage its or its participants' credit exposure should accept collateral with low credit, liquidity, and market risks. An FMI should also set and enforce appropriately conservative haircuts and concentration limits.	An FMI should use a collateral management system that is well-designed and operationally flexible.	BOC Standard 5: Collateral	Consistent	
PS	7.0	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default			Partly consistent	Recommendation: The Canadian authorities should adapt their regulatory framework to be consistent with the PFMI in the allowed use of other liquid

		of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.				resources and the definition of qualifying liquid resources.
PS	7.1	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	An FMI should have a robust framework to manage its liquidity risks from its participants, settlement banks, nostro agents, custodian banks, liquidity providers, and other entities.	BoC Standard 7: Liquidity Risk	Partly consistent	
PS	7.2	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the	An FMI should have effective operational and analytical tools to identify, measure, and monitor its settlement and funding flows on an ongoing and timely basis, including its use of intraday liquidity.	BoC Standard 7: Liquidity Risk		

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.			Partly consistent	
PS	7.3	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	A payment system or SSS, including one employing a DNS mechanism, should maintain sufficient liquid resources in all relevant currencies to effect same-day settlement, and where appropriate intraday or multiday settlement, of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate payment obligation in extreme but plausible market conditions.	BoC Standard 7: Liquidity Risk	Partly consistent	
PS	7.5	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the	For the purpose of meeting its minimum liquid resource requirement, an FMI's qualifying liquid resources in each currency include cash at the central bank of issue and at creditworthy commercial banks, committed lines of credit, committed foreign exchange swaps, and committed repos, as well as highly marketable collateral held in custody and investments that are readily available and convertible into cash with prearranged and highly reliable funding arrangements, even in extreme	BoC Standard 7: Liquidity Risk		

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	but plausible market conditions. If an FMI has access to routine credit at the central bank of issue, the FMI may count such access as part of the minimum requirement to the extent it has collateral that is eligible for pledging to (or for conducting other appropriate forms of transactions with) the relevant central bank. All such resources should be available when needed.		Partly consistent	
PS	7.6	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	An FMI may supplement its qualifying liquid resources with other forms of liquid resources. If the FMI does so, then these liquid resources should be in the form of assets that are likely to be saleable or acceptable as collateral for lines of credit, swaps, or repos on an ad hoc basis following a default, even if this cannot be reliably prearranged or guaranteed in extreme market conditions. Even if an FMI does not have access to routine central bank credit, it should still take account of what collateral is typically accepted by the relevant central bank, as such assets may be more likely to be liquid in stressed circumstances. An FMI should not assume the availability of emergency central bank credit as a part of its liquidity plan.	BoC Standard 7: Liquidity Risk	Partly consistent	The BoC-CSA Supplementary Guidance on liquidity risk allows the use of “other liquid resources” to meet a certain portion of minimum liquid resource requirements. The rationale given in the supplementary guidance is that “it may be prohibitively expensive, or even impossible, for the FMI to obtain sufficient qualifying liquid resources.” Notwithstanding the rationale, allowing such use of other liquid resources is inconsistent with KC 5 which explicitly requires the use of qualifying liquid resources for meeting minimum liquid resource requirements.

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
PS	7.7	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	An FMI should obtain a high degree of confidence, through rigorous due diligence, that each provider of its minimum required qualifying liquid resources, whether a participant of the FMI or an external party, has sufficient information to understand and to manage its associated liquidity risks, and that it has the capacity to perform as required under its commitment. Where relevant to assessing a liquidity provider's performance reliability with respect to a particular currency, a liquidity provider's potential access to credit from the central bank of issue may be taken into account. An FMI should regularly test its procedures for accessing its liquid resources at a liquidity provider.	BoC Standard 7: Liquidity Risk	Partly consistent	
PS	7.8	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity	An FMI with access to central bank accounts, payment services, or securities services should use these services, where practical, to enhance its management of liquidity risk.	BoC Standard 7: Liquidity Risk		

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		obligation for the FMI in extreme but plausible market conditions.			Partly consistent	
PS	7.9	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	An FMI should determine the amount and regularly test the sufficiency of its liquid resources through rigorous stress testing. An FMI should have clear procedures to report the results of its stress tests to appropriate decision makers at the FMI and to use these results to evaluate the adequacy of and adjust its liquidity risk-management framework. In conducting stress testing, an FMI should consider a wide range of relevant scenarios. Scenarios should include relevant peak historic price volatilities, shifts in other market factors such as price determinants and yield curves, multiple defaults over various time horizons, simultaneous pressures in funding and asset markets, and a spectrum of forward-looking stress scenarios in a variety of extreme but plausible market conditions. Scenarios should also take into account the design and operation of the FMI, include all entities that might pose material liquidity risks to the FMI (such as settlement banks, nostro agents, custodian banks, liquidity providers, and linked FMIs), and where appropriate, cover a multiday period. In all cases, an FMI should document	BoC Standard 7: Liquidity Risk		

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
			its supporting rationale for, and should have appropriate governance arrangements relating to, the amount and form of total liquid resources it maintains.		Partly consistent	
PS	7.10	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	An FMI should establish explicit rules and procedures that enable the FMI to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations on time following any individual or combined default among its participants. These rules and procedures should address unforeseen and potentially uncovered liquidity shortfalls and should aim to avoid unwinding, revoking, or delaying the same-day settlement of payment obligations. These rules and procedures should also indicate the FMI's process to replenish any liquidity resources it may employ during a stress event, so that it can continue to operate in a safe and sound manner.	BoC Standard 7: Liquidity Risk	Partly consistent	
PS	8.0	An FMI should provide clear and certain final settlement, at a minimum by the end of the value date. Where necessary or preferable, an FMI should provide final settlement intraday or in real time.		The BoC has adopted the PFMI and key considerations verbatim as its risk management standards.	Consistent

		losses and liquidity pressures and continue to meet its obligations.		default rules and procedures		
PS	13.4	An FMI should have effective and clearly defined rules and procedures to manage a participant default. These rules and procedures should be designed to ensure that the FMI can take timely action to contain losses and liquidity pressures and continue to meet its obligations.	An FMI should involve its participants and other stakeholders in the testing and review of the FMI's default procedures, including any close-out procedures. Such testing and review should be conducted at least annually or following material changes to the rules and procedures to ensure that they are practical and effective.	BOC Standard 13: Participant-default rules and procedures	Consistent	
PS	15.0	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.		The BoC has adopted the PFMI and key considerations verbatim as its risk management standards. In addition, supplementary guidance was provided on certain elements of the General Business Risk Principle (General business risk and Recovery Plans).	Consistent	Recommendation: The Canadian authorities should adapt their regulatory framework to be consistent with the PFMI in the definition of current operating expenses.
PS	15.1	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise.	An FMI should have robust management and control systems to identify, monitor, and manage general business risks, including losses from poor execution of business strategy, negative cash flows, or unexpected and excessively large operating expenses.	BOC Standard 15: General	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.		Business Risk		
PS	15.2	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	An FMI should hold liquid net assets funded by equity (such as common stock, disclosed reserves, or other retained earnings) so that it can continue operations and services as a going concern if it incurs general business losses. The amount of liquid net assets funded by equity an FMI should hold should be determined by its general business risk profile and the length of time required to achieve a recovery or orderly wind-down, as appropriate, of its critical operations and services if such action is taken.	BOC Standard 15: General Business Risk	Consistent	
PS	15.3	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	An FMI should maintain a viable recovery or orderly wind-down plan and should hold sufficient liquid net assets funded by equity to implement this plan. At a minimum, an FMI should hold liquid net assets funded by equity equal to at least six months of current operating expenses. These assets are in addition to resources held to cover participant defaults or other risks covered under the financial resources principles. However, equity held under international risk-based capital	BOC Standard 15: General Business Risk	Consistent	The BoC-CSA Supplementary Guidance on general business risk instructs FMIs to exclude “any extraordinary expenses (i.e. unessential, infrequent or one-off costs)” from the calculation of current operating expenses. This is not fully consistent with KC 3. Note that footnote 137 for the explanatory note 3.15.5 in the PFMI explicitly mentions excluding depreciation and amortisation from the current

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
			standards can be included where relevant and appropriate to avoid duplicate capital requirements.			operating expenses, but not extraordinary expenses.
PS	15.4	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	Assets held to cover general business risk should be of high quality and sufficiently liquid in order to allow the FMI to meet its current and projected operating expenses under a range of scenarios, including in adverse market conditions.	BOC Standard 15: General Business Risk	Consistent	
PS	15.5	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	An FMI should maintain a viable plan for raising additional equity should its equity fall close to or below the amount needed. This plan should be approved by the board of directors and updated regularly.	BOC Standard 15: General Business Risk	Consistent	
PS	16.0	An FMI should safeguard its own and its participants' assets and minimise the risk of loss on and delay in access to these assets. An FMI's investments		The Bank of Canada has adopted the PFMI and key considerations verbatim as its risk management standards. In addition, supplementary	Consistent

		participation arrangements.	basic information about indirect participation in order to identify, monitor, and manage any material risks to the FMI arising from such tiered participation arrangements.	NI 24-102, s. 3.1, and s. 1.1 definition "PFMI Principle"		
CCP	19.2	An FMI should identify, monitor, and manage the material risks to the FMI arising from tiered participation arrangements.	An FMI should identify material dependencies between direct and indirect participants that might affect the FMI.	BoC Standard 19: Tiered Participation Arrangements NI 24-102, s. 3.1, and s. 1.1 definition "PFMI Principle"	Consistent	
CCP	19.3	An FMI should identify, monitor, and manage the material risks to the FMI arising from tiered participation arrangements.	An FMI should identify indirect participants responsible for a significant proportion of transactions processed by the FMI and indirect participants whose transaction volumes or values are large relative to the capacity of the direct participants through which they access the FMI in order to manage the risks arising from these transactions.	BoC Standard 19: Tiered Participation Arrangements NI 24-102, s. 3.1, and s. 1.1 definition "PFMI Principle"	Consistent	
CCP	19.4	An FMI should identify, monitor, and manage the material risks to the FMI arising from tiered participation arrangements.	An FMI should regularly review risks arising from tiered participation arrangements and should take mitigating action when appropriate.	BoC Standard 19: Tiered Participation Arrangements NI 24-102, s. 3.1, and s. 1.1 definition "PFMI Principle"	Consistent	
CCP	20.0	An FMI that establishes a link with one or more FMIs should identify, monitor, and manage link-related risks.			Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
CCP	20.1	An FMI that establishes a link with one or more FMIs should identify, monitor, and manage link-related risks.	Before entering into a link arrangement and on an ongoing basis once the link is established, an FMI should identify, monitor, and manage all potential sources of risk arising from the link arrangement. Link arrangements should be designed such that each FMI is able to observe the other principles in this report.	BoC Standard 20: FMI Links NI 24-102, s. 3.1, and s. 1.1 definition "PFMI Principle"	Consistent	
CCP	20.2	An FMI that establishes a link with one or more FMIs should identify, monitor, and manage link-related risks.	A link should have a well-founded legal basis, in all relevant jurisdictions, that supports its design and provides adequate protection to the FMIs involved in the link.	BoC Standard 20: FMI Links NI 24-102, s. 3.1, and s. 1.1 definition "PFMI Principle"	Consistent	
CCP	20.7	An FMI that establishes a link with one or more FMIs should identify, monitor, and manage link-related risks.	Before entering into a link with another CCP, a CCP should identify and manage the potential spill-over effects from the default of the linked CCP. If a link has three or more CCPs, each CCP should identify, assess, and manage the risks of the collective link arrangement.	BoC Standard 20: FMI Links NI 24-102, s. 3.1, and s. 1.1 definition "PFMI Principle"	Consistent	
CCP	20.8	An FMI that establishes a link with one or more FMIs should identify, monitor, and manage link-related risks.	Each CCP in a CCP link arrangement should be able to cover, at least on a daily basis, its current and potential future exposures to the linked CCP and its participants, if any, fully with a high degree of confidence without reducing the CCP's ability to fulfil its obligations to its own participants at any time.	BoC Standard 20: FMI Links NI 24-102, s. 3.1, and s. 1.1 definition "PFMI Principle"	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
CCP	21.0	An FMI should be efficient and effective in meeting the requirements of its participants and the markets it serves.			Consistent	
CCP	21.1	An FMI should be efficient and effective in meeting the requirements of its participants and the markets it serves.	An FMI should be designed to meet the needs of its participants and the markets it serves, in particular, with regard to choice of a clearing and settlement arrangement; operating structure; scope of products cleared, settled, or recorded; and use of technology and procedures.	BoC Standard 21: Efficiency and Effectiveness NI 24-102, s. 3.1, and s. 1.1 definition "PFMI Principle"	Consistent	
CCP	21.2	An FMI should be efficient and effective in meeting the requirements of its participants and the markets it serves.	An FMI should have clearly defined goals and objectives that are measurable and achievable, such as in the areas of minimum service levels, risk-management expectations, and business priorities.	BoC Standard 21: Efficiency and Effectiveness NI 24-102, s. 3.1, and s. 1.1 definition "PFMI Principle"	Consistent	
CCP	21.3	An FMI should be efficient and effective in meeting the requirements of its participants and the markets it serves.	An FMI should have established mechanisms for the regular review of its efficiency and effectiveness.	BoC Standard 21: Efficiency and Effectiveness NI 24-102, s. 3.1, and s. 1.1 definition "PFMI Principle"	Consistent	
CCP	22.0	An FMI should use, or at a minimum accommodate, relevant internationally accepted communication procedures and standards in order to facilitate efficient payment, clearing, settlement, and recording.			Consistent

		wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.			Partly consistent	
CSD_SSS	7.3	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	A payment system or SSS, including one employing a DNS mechanism, should maintain sufficient liquid resources in all relevant currencies to effect same-day settlement, and where appropriate intraday or multiday settlement, of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate payment obligation in extreme but plausible market conditions.	BoC Standard 7: Liquidity Risk NI 24-102, para. 3.1(b), and s. 1.1 definition "PFMI Principle"	Partly consistent	
CSD_SSS	7.5	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include,	For the purpose of meeting its minimum liquid resource requirement, an FMI's qualifying liquid resources in each currency include cash at the central bank of issue and at creditworthy commercial banks, committed lines of credit, committed foreign exchange swaps, and committed repos, as well as highly marketable collateral held in custody and	BoC Standard 7: Liquidity Risk NI 24-102, para. 3.1(b), and s. 1.1 definition "PFMI Principle"	Partly consistent	The BoC-CSA Supplementary Guidance on liquidity risk allows the use of "other liquid resources" to meet a certain portion of minimum liquid resource requirements. The rationale given in the supplementary guidance is that "it may be prohibitively expensive, or even impossible, for the FMI to obtain sufficient qualifying liquid resources."

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	investments that are readily available and convertible into cash with prearranged and highly reliable funding arrangements, even in extreme but plausible market conditions. If an FMI has access to routine credit at the central bank of issue, the FMI may count such access as part of the minimum requirement to the extent it has collateral that is eligible for pledging to (or for conducting other appropriate forms of transactions with) the relevant central bank. All such resources should be available when needed.			Notwithstanding the rationale, allowing such use of other liquid resources is inconsistent with KC 5 which explicitly requires the use of qualifying liquid resources for meeting minimum liquid resource requirements.
CSD_SSS	7.6	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	An FMI may supplement its qualifying liquid resources with other forms of liquid resources. If the FMI does so, then these liquid resources should be in the form of assets that are likely to be saleable or acceptable as collateral for lines of credit, swaps, or repos on an ad hoc basis following a default, even if this cannot be reliably prearranged or guaranteed in extreme market conditions. Even if an FMI does not have access to routine central bank credit, it should still take account of what collateral is typically accepted by the relevant central bank, as such assets may be more likely to be liquid in stressed circumstances. An FMI	BoC Standard 7: Liquidity Risk NI 24-102, para. 3.1(b), and s. 1.1 definition "PFMI Principle"		

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
			should not assume the availability of emergency central bank credit as a part of its liquidity plan.		Partly consistent	
CSD _SSS	7.7	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	An FMI should obtain a high degree of confidence, through rigorous due diligence, that each provider of its minimum required qualifying liquid resources, whether a participant of the FMI or an external party, has sufficient information to understand and to manage its associated liquidity risks, and that it has the capacity to perform as required under its commitment. Where relevant to assessing a liquidity provider's performance reliability with respect to a particular currency, a liquidity provider's potential access to credit from the central bank of issue may be taken into account. An FMI should regularly test its procedures for accessing its liquid resources at a liquidity provider.	BoC Standard 7: Liquidity Risk NI 24-102, para. 3.1(b), and s. 1.1 definition "PFMI Principle"	Partly consistent	
CSD _SSS	7.8	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress	An FMI with access to central bank accounts, payment services, or securities services should use these services, where practical, to enhance its management of liquidity risk.	BoC Standard 7: Liquidity Risk NI 24-102, para. 3.1(b), and s. 1.1 definition "PFMI Principle"		

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		<p>scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.</p>			Partly consistent	
CSD_SSS	7.9	<p>An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.</p>	<p>An FMI should determine the amount and regularly test the sufficiency of its liquid resources through rigorous stress testing. An FMI should have clear procedures to report the results of its stress tests to appropriate decision makers at the FMI and to use these results to evaluate the adequacy of and adjust its liquidity risk-management framework. In conducting stress testing, an FMI should consider a wide range of relevant scenarios. Scenarios should include relevant peak historic price volatilities, shifts in other market factors such as price determinants and yield curves, multiple defaults over various time horizons, simultaneous pressures in funding and asset markets, and a spectrum of forward-looking stress scenarios in a variety of extreme but plausible market conditions. Scenarios should also take into account the design and operation of the FMI, include all entities that might pose material liquidity risks to the FMI (such as settlement banks, nostro</p>	<p>BoC Standard 7: Liquidity Risk</p> <p>NI 24-102, para. 3.1(b), and s. 1.1 definition “PFMI Principle”</p>

		wind-down of critical operations and services.		MI 96-101, s. 20 MI 96-101 Companion Policy, s 20	Broadly consistent	
TR	15.2	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	An FMI should hold liquid net assets funded by equity (such as common stock, disclosed reserves, or other retained earnings) so that it can continue operations and services as a going concern if it incurs general business losses. The amount of liquid net assets funded by equity an FMI should hold should be determined by its general business risk profile and the length of time required to achieve a recovery or orderly wind-down, as appropriate, of its critical operations and services if such action is taken.	OSC TR Rule/Companion Policy Guidance, ss. 20(1), (2), (3) QC TR Regulation and Policy Statement for ss. 20(1), (2), (3) QC QDA s.30 MSC TR Rule and CP guidance for ss.20(1), (2) and (3) MI 96-101, ss. 20(2), (3) MI 96-101 Companion Policy, s 20(2)	Broadly consistent	
TR	15.3	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	An FMI should maintain a viable recovery or orderly wind-down plan and should hold sufficient liquid net assets funded by equity to implement this plan. At a minimum, an FMI should hold liquid net assets funded by equity equal to at least six months of current operating expenses. These assets are in addition to resources held to cover participant defaults or other risks covered under the financial resources principles. However, equity held under international risk-based capital standards can be included	OSC TR Rule/Companion Policy Guidance, s. 20(1), (2), (3), (4) QC TR Regulation and Policy Statement for ss. 20(1), (2), (3), (4) QC QDA s.30 MSC TR Rule and CP guidance for s.20(1), (2), (3) and (4) MI 96-101, ss. 20 MI 96-101 Companion Policy, s 20		

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
			where relevant and appropriate to avoid duplicate capital requirements.		Broadly consistent	
TR	15.4	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	Assets held to cover general business risk should be of high quality and sufficiently liquid in order to allow the FMI to meet its current and projected operating expenses under a range of scenarios, including in adverse market conditions.	OSC TR Rule, ss. 20(2), (3) QC TR Regulation ss. 20(2), (3) QC QDA s. 30 MSC TR Rule, ss. 20(2), (3) MI 96-101, ss. 20(2), (3)	Broadly consistent	
TR	15.5	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	An FMI should maintain a viable plan for raising additional equity should its equity fall close to or below the amount needed. This plan should be approved by the board of directors and updated regularly.	OSC TR Rule/Companion Policy guidance, s. 20(4) QC TR Policy Statement for s. 20(4) QC QDA s. 30 MSC TR Rule and CP guidance for s.20(4) MI 96-101, ss. 20(4), (5)	Broadly consistent	According to the provincial securities regulators the TR rules /regulations do not reach the specificity of this key consideration. Nevertheless, they would expect that KC 5 is followed as part of the compliance with the relevant parts of the framework. However there is a gap in the absence of specific provisions requiring the TR to maintain a plan for raising additional equity approved by the board of directors and updated regularly.

TR	23.4	An FMI should have clear and comprehensive rules and procedures and should provide sufficient information to enable participants to have an accurate understanding of the risks, fees, and other material costs they incur by participating in the FMI. All relevant rules and key procedures should be publicly disclosed.	An FMI should publicly disclose its fees at the level of individual services it offers as well as its policies on any available discounts. The FMI should provide clear descriptions of priced services for comparability purposes.	<p>OSC TR Rule, s. 12</p> <p>QC TR Regulations. 12</p> <p>MSC TR Rule s. 12</p> <p>MI 96-101, s 12</p>	Consistent	
TR	23.5	An FMI should have clear and comprehensive rules and procedures and should provide sufficient information to enable participants to have an accurate understanding of the risks, fees, and other material costs they incur by participating in the FMI. All relevant rules and key procedures should be publicly disclosed.	An FMI should complete regularly and disclose publicly responses to the CPSS-IOSCO Disclosure framework for financial market infrastructures. An FMI also should, at a minimum, disclose basic data on transaction volumes and values.	<p>OSC TR Rule, ss. 17(1), (4) OSC TR Rule Companion Policy guidance for s. 17</p> <p>QC TR Regulation ss. 17(1), (4) and Policy Statement for s. 17</p> <p>MSC TR Rule and CP guidance ss. 17(1), (4)</p>	Consistent
