

Japan

This document provides citations of the relevant legislation, regulation, policy and guidance, and notes explaining the assigned ratings for all relevant Principles of a given jurisdiction, by FMI type. It is a direct download of all the information for one jurisdiction that is included in the online CPMI-IOSCO PFMI implementation database (www.bis.org/pfmi/index.htm and www.iosco.org/about/?subsection=cpmi_iosco). It includes all Principles and all key considerations: for the ones where gaps were identified the last column provides details on key conclusions and recommendations. The online CPMI-IOSCO PFMI implementation database allows to search information by Principle across different jurisdictions.

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
CCP	1.0	An FMI should have a well-founded, clear, transparent, and enforceable legal basis for each material aspect of its activities in all relevant jurisdictions.			Consistent	
CCP	1.1	An FMI should have a well-founded, clear, transparent, and enforceable legal basis for each material aspect of its activities in all relevant jurisdictions.	The legal basis should provide a high degree of certainty for each material aspect of an FMI's activities in all relevant jurisdictions.	The FSA published a policy statement on 18 December 2012. The measure came into force on the same date. Further, the FSA published its Supervisory Guidelines in December 2013. The BOJ published its Policy on Oversight of Financial Market Infrastructures on 12 March 2013. The measure came into force on 1 April 2013.	Consistent	
CCP	1.2	An FMI should have a well-founded, clear, transparent, and	An FMI should have rules, procedures, and contracts that	FSA - Policy statement on supervision of FMIs	Consistent

		credit exposure to the CCP in extreme but plausible market conditions.		BOJ - Policy on Oversight of Financial Market Infrastructures		
CCP	4.4	An FMI should effectively measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes. An FMI should maintain sufficient financial resources to cover its credit exposure to each participant fully with a high degree of confidence. In addition, a CCP that is involved in activities with a more-complex risk profile or that is systemically important in multiple jurisdictions should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the two participants and their affiliates that would potentially cause the largest aggregate credit exposure to the CCP in extreme but plausible market conditions. All other CCPs should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would potentially cause the largest aggregate	A CCP should cover its current and potential future exposures to each participant fully with a high degree of confidence using margin and other prefunded financial resources (see Principle 5 on collateral and Principle 6 on margin). In addition, a CCP that is involved in activities with a more-complex risk profile or that is systemically important in multiple jurisdictions should maintain additional financial resources to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the two participants and their affiliates that would potentially cause the largest aggregate credit exposure for the CCP in extreme but plausible market conditions. All other CCPs should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would potentially cause the largest aggregate credit exposure for the CCP in extreme but plausible market conditions. In all cases, a CCP should document its supporting rationale for, and should have	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section II-2-3 on Credit Risk Management BOJ - Policy on Oversight of Financial Market Infrastructures	Consistent	The Supervisory Guidelines differ in language from the PFMI in two important ways. Additional pre-funded financial resources for CCPs that are neither systemically important in multiple jurisdictions nor has a complex risk profile. The Supervisory Guidelines require a CCP that is neither systemically important in multiple jurisdictions nor has a complex risk profile maintain sufficient financial resources to cover the default two participants (unconsolidated) that would cause the largest aggregate credit exposure or the participant (consolidated) that would cause the largest aggregate credit exposure. There may be instances in which a cover two (unconsolidated) could be lower than a cover one (consolidated). However, all CCPs can withstand, at a minimum, the default of participant (consolidated) with the largest exposure and there are no CCPs that are subject to the cover two (unconsolidated) requirement.

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		credit exposure to the CCP in extreme but plausible market conditions.	appropriate governance arrangements relating to, the amount of total financial resources it maintains.			Additional pre-funded financial resources for CCPs are not explicit about covering “a wide range of stress scenarios.” The Supervisory Guidelines require a CCP to cover any of the following stress scenarios in consideration of extreme but plausible market conditions: (a) default of two participants that would cause the largest aggregate credit exposure or (b) default of the participant that would cause the largest aggregate credit exposure. This language is narrower than what is provided in the PFMI, which state, “maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of [one/two participants]” However, the stress testing requirements in the Supervisory Guidelines require a CCP to regularly test the sufficiency of financial resources through stress testing that considers “a variety of extreme but plausible market conditions,” consistent with the PFMI. While not explicit in the Supervisory Guidance, the FSA has indicated that a CCP would be required to maintain additional resources that would consider a wide range of scenarios.
CCP	4.5	An FMI should effectively	A CCP should determine the	FSA - Policy statement on	Consistent

		<p>measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes. An FMI should maintain sufficient financial resources to cover its credit exposure to each participant fully with a high degree of confidence. In addition, a CCP that is involved in activities with a more-complex risk profile or that is systemically important in multiple jurisdictions should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the two participants and their affiliates that would potentially cause the largest aggregate credit exposure to the CCP in extreme but plausible market conditions. All other CCPs should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would potentially cause the largest aggregate credit exposure to the CCP in extreme but plausible market conditions.</p>	<p>amount and regularly test the sufficiency of its total financial resources available in the event of a default or multiple defaults in extreme but plausible market conditions through rigorous stress testing. A CCP should have clear procedures to report the results of its stress tests to appropriate decision makers at the CCP and to use these results to evaluate the adequacy of and adjust its total financial resources. Stress tests should be performed daily using standard and predetermined parameters and assumptions. On at least a monthly basis, a CCP should perform a comprehensive and thorough analysis of stress testing scenarios, models, and underlying parameters and assumptions used to ensure they are appropriate for determining the CCP's required level of default protection in light of current and evolving market conditions. A CCP should perform this analysis of stress testing more frequently when the products cleared or markets served display high volatility, become less liquid, or when the size or concentration of positions held by a CCP's participants increases significantly. A full validation of a CCP's risk-management model should be performed at least annually.</p>	<p>supervision of FMIs</p> <p>Supervisory Guidelines section III-2-3 on Credit Risk Management</p> <p>BOJ - Policy on Oversight of Financial Market Infrastructures</p>

				BOJ - Policy on Oversight of Financial Market Infrastructures		
CCP	14.4	A CCP should have rules and procedures that enable the segregation and portability of positions of a participant's customers and the collateral provided to the CCP with respect to those positions.	A CCP should disclose its rules, policies, and procedures relating to the segregation and portability of a participant's customers' positions and related collateral. In particular, the CCP should disclose whether customer collateral is protected on an individual or omnibus basis. In addition, a CCP should disclose any constraints, such as legal or operational constraints, that may impair its ability to segregate or port a participant's customers' positions and related collateral.	<p>FSA - Policy statement on supervision of FMIs</p> <p>Supervisory Guidelines section III-3-6 on Management of Collateral, etc.</p> <p>Supervisory Guidelines section III-4-1 on Points to Consider regarding Authorization of Business Rules, etc.</p> <p>BOJ - Policy on Oversight of Financial Market Infrastructures</p>	Consistent	
CCP	15.0	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.			Consistent	<p>While the Supervisory Guidelines do not fully address this principle, the various statements and guidance put out by both Japanese authorities taken together, convey the authorities' intent to fully implement the PFMI in a consistent manner.</p> <p>Recommendation: Where there are inconsistencies in language or requirements between the Supervisory Guidelines and the PFMI, the FSA should provide clarity to CCPs with respect to minimum standards.</p>

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
CCP	15.1	A CCP should have rules and procedures that enable the segregation and portability of positions of a participant's customers and the collateral provided to the CCP with respect to those positions.	An FMI should have robust management and control systems to identify, monitor, and manage general business risks, including losses from poor execution of business strategy, negative cash flows, or unexpected and excessively large operating expenses.	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section III-2-1 on Adequacy of Capital BOJ - Policy on Oversight of Financial Market Infrastructures	Consistent	The Supervisory Guidelines have no requirements that a CCP have robust management and control systems to identify, monitor, and manage general business risks, although there are requirements that a CCP have processes to formulate a capital plan to address business risks.
CCP	15.2	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	An FMI should hold liquid net assets funded by equity (such as common stock, disclosed reserves, or other retained earnings) so that it can continue operations and services as a going concern if it incurs general business losses. The amount of liquid net assets funded by equity an FMI should hold should be determined by its general business risk profile and the length of time required to achieve a recovery or orderly wind-down, as appropriate, of its critical operations and services if such action is taken.	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section III-2-1 on Adequacy of Capital BOJ - Policy on Oversight of Financial Market Infrastructures	Consistent	
CCP	15.3	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to	An FMI should maintain a viable recovery or orderly wind-down plan and should hold sufficient liquid net assets funded by equity to implement this plan. At a minimum, an FMI should hold liquid net assets funded by equity equal to at least six months of current operating expenses. These assets are in addition to resources held to	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section III-2-1 on Adequacy of Capital	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		ensure a recovery or orderly wind-down of critical operations and services.	cover participant defaults or other risks covered under the financial resources principles. However, equity held under international risk-based capital standards can be included where relevant and appropriate to avoid duplicate capital requirements.	BOJ - Policy on Oversight of Financial Market Infrastructures		
CCP	15.4	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	Assets held to cover general business risk should be of high quality and sufficiently liquid in order to allow the FMI to meet its current and projected operating expenses under a range of scenarios, including in adverse market conditions.	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section III-2-1 on Adequacy of Capital BOJ - Policy on Oversight of Financial Market Infrastructures	Consistent	
CCP	15.5	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	An FMI should maintain a viable plan for raising additional equity should its equity fall close to or below the amount needed. This plan should be approved by the board of directors and updated regularly.	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section III-2-1 on Adequacy of Capital BOJ - Policy on Oversight of Financial Market Infrastructures	Consistent

		enforceable legal basis for each material aspect of its activities in all relevant jurisdictions.	identify and mitigate the risks arising from any potential conflict of laws across jurisdictions.	Supervisory Guidelines section VI-4-1 on Points to Consider regarding Authorization of Business Rules, etc. BOJ - Policy on Oversight of Financial Market Infrastructures		
TR	2.0	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.			Consistent	While the Supervisory Guidelines differ in language from the PFMI, the various statements and guidance put out by both Japanese authorities, taken together, convey the authorities' intent to fully implement the PFMI in a consistent manner. Recommendation: Where there are inconsistencies in language or requirements between the Supervisory Guidelines and the PFMI, the FSA should provide clarity to TRs with respect to minimum standards.
TR	2.1	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	An FMI should have objectives that place a high priority on the safety and efficiency of the FMI and explicitly support financial stability and other relevant public interest considerations.	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section VI-1-1 on Governance System BOJ - Policy on Oversight of Financial Market Infrastructures	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
TR	2.2	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	An FMI should have documented governance arrangements that provide clear and direct lines of responsibility and accountability. These arrangements should be disclosed to owners, relevant authorities, participants, and, at a more general level, the public.	<p>FSA - Policy statement on supervision of FMIs</p> <p>Supervisory Guidelines section VI-1-1 on Governance System</p> <p>BOJ - Policy on Oversight of Financial Market Infrastructures</p>	Consistent	The Supervisory Guidelines do not address publication of governance arrangements.
TR	2.3	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The roles and responsibilities of an FMI's board of directors (or equivalent) should be clearly specified, and there should be documented procedures for its functioning, including procedures to identify, address, and manage member conflicts of interest. The board should review both its overall performance and the performance of its individual board members regularly.	<p>FSA - Policy statement on supervision of FMIs</p> <p>Supervisory Guidelines section VI-1-1 on Governance System</p> <p>BOJ - Policy on Oversight of Financial Market Infrastructures</p>	Consistent	
TR	2.4	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The board should contain suitable members with the appropriate skills and incentives to fulfil its multiple roles. This typically requires the inclusion of non-executive board member(s).	<p>FSA - Policy statement on supervision of FMIs</p> <p>Supervisory Guidelines section VI-1-1 on Governance System.</p> <p>Supervisory Guidelines section VI-1-3 on Staffing.</p> <p>BOJ - Policy on Oversight of Financial Market Infrastructures</p>	Consistent	The Supervisory Guidelines do not explicitly require that the board of a TR contain suitable members with appropriate incentives.

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
TR	2.5	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The roles and responsibilities of management should be clearly specified. An FMI's management should have the appropriate experience, a mix of skills, and the integrity necessary to discharge their responsibilities for the operation and risk management of the FMI.	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section VI-1-1 on Governance System BOJ - Policy on Oversight of Financial Market Infrastructures	Consistent	
TR	2.6	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The board should establish a clear, documented risk-management framework that includes the FMI's risk-tolerance policy, assigns responsibilities and accountability for risk decisions, and addresses decision making in crises and emergencies. Governance arrangements should ensure that the risk-management and internal control functions have sufficient authority, independence, resources, and access to the board.	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section VI-1-1 on Governance System Supervisory Guidelines section VI-2-2 on Risk Management Framework BOJ - Policy on Oversight of Financial Market Infrastructures	Consistent	The Supervisory Guidelines do not explicitly address the following: <ul style="list-style-type: none"> • Decision making in crises and emergencies, and • Risk management functions having sufficient authority, independence, resources and access to the board.
TR	2.7	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The board should ensure that the FMI's design, rules, overall strategy, and major decisions reflect appropriately the legitimate interests of its direct and indirect participants and other relevant stakeholders. Major decisions should be clearly disclosed to relevant stakeholders and, where there is a broad market impact, the public.	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section VI-1-1 on Governance System BOJ - Policy on Oversight of Financial Market Infrastructures	Consistent	The Supervisory Guidelines do not explicitly require a TR to reflect the legitimate interests of its direct and indirect participants in its design, rules, overall strategy, and major decisions, or clearly disclose major decisions to relevant stakeholders. However, the Supervisory Guidelines explicitly require a TR's board of directors to seek

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
						external experts when making major decisions, and disclose and explain major changes to its business rules to participants and their customers.
TR	3.0	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.			Consistent	<p>While the Supervisory Guidelines do not address all aspects of this principle, the various statements and guidance put out by both Japanese authorities, taken together, convey the authorities' intent to fully implement the PFMI in a consistent manner.</p> <p>Recommendation: Where there are inconsistencies in language or requirements between the Supervisory Guidelines and the PFMI, the FSA should provide clarity to TRs with respect to minimum standards.</p>
TR	3.1	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.	An FMI should have risk-management policies, procedures, and systems that enable it to identify, measure, monitor, and manage the range of risks that arise in or are borne by the FMI. Risk-management frameworks should be subject to periodic review.	<p>FSA - Policy statement on supervision of FMIs</p> <p>Supervisory Guidelines section VI-2-2 on Risk Management Framework</p> <p>BOJ - Policy on Oversight of Financial Market Infrastructures</p>	Consistent

		ensure a recovery or orderly wind-down of critical operations and services.	achieve a recovery or orderly wind-down, as appropriate, of its critical operations and services if such action is taken.	BOJ - Policy on Oversight of Financial Market Infrastructures		
TR	15.3	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	An FMI should maintain a viable recovery or orderly wind-down plan and should hold sufficient liquid net assets funded by equity to implement this plan. At a minimum, an FMI should hold liquid net assets funded by equity equal to at least six months of current operating expenses. These assets are in addition to resources held to cover participant defaults or other risks covered under the financial resources principles. However, equity held under international risk-based capital standards can be included where relevant and appropriate to avoid duplicate capital requirements.	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section VI-2-1 on Adequacy of Capital BOJ - Policy on Oversight of Financial Market Infrastructures	Consistent	
TR	15.4	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	Assets held to cover general business risk should be of high quality and sufficiently liquid in order to allow the FMI to meet its current and projected operating expenses under a range of scenarios, including in adverse market conditions.	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section VI-2-1 on Adequacy of Capital BOJ - Policy on Oversight of Financial Market Infrastructures	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
TR	15.5	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	An FMI should maintain a viable plan for raising additional equity should its equity fall close to or below the amount needed. This plan should be approved by the board of directors and updated regularly.	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section VI-2-1 on Adequacy of Capital BOJ - Policy on Oversight of Financial Market Infrastructures	Consistent	
TR	17.0	An FMI should identify the plausible sources of operational risk, both internal and external, and mitigate their impact through the use of appropriate systems, policies, procedures, and controls. Systems should be designed to ensure a high degree of security and operational reliability and should have adequate, scalable capacity. Business continuity management should aim for timely recovery of operations and fulfilment of the FMI's obligations, including in the event of a wide-scale or major disruption.			Consistent	While the Supervisory Guidelines do not fully address this principle, the various statements and guidance put out by both Japanese authorities, taken together, convey the authorities' intent to fully implement the PFMI in a consistent manner. Recommendation: Where there are inconsistencies in language or requirements between the Supervisory Guidelines and the PFMI, the FSA should provide clarity to TRs with respect to minimum standards.

						Supervisory Guidelines and the PFMI, the FSA should provide clarity to TRs with respect to minimum standards.
TR	23.1	An FMI should have clear and comprehensive rules and procedures and should provide sufficient information to enable participants to have an accurate understanding of the risks, fees, and other material costs they incur by participating in the FMI. All relevant rules and key procedures should be publicly disclosed.	An FMI should adopt clear and comprehensive rules and procedures that are fully disclosed to participants. Relevant rules and key procedures should also be publicly disclosed.	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section VI-3-5-1 on Disclosure of Major Rules, etc. BOJ - Policy on Oversight of Financial Market Infrastructures	Consistent	
TR	23.2	An FMI should have clear and comprehensive rules and procedures and should provide sufficient information to enable participants to have an accurate understanding of the risks, fees, and other material costs they incur by participating in the FMI. All relevant rules and key procedures should be publicly disclosed.	An FMI should disclose clear descriptions of the system's design and operations, as well as the FMI's and participants' rights and obligations, so that participants can assess the risks they would incur by participating in the FMI.	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section VI-3-5-1 on Disclosure of Major Rules, etc. BOJ - Policy on Oversight of Financial Market Infrastructures	Consistent	The Supervisory Guidelines do not have specific requirements for the disclosure of systems design and operations.
TR	23.3	An FMI should have clear and comprehensive rules and procedures and should provide sufficient information to enable participants to have an accurate understanding of the risks, fees, and other material costs they incur by participating in the FMI. All relevant rules and key procedures should be publicly disclosed.	An FMI should provide all necessary and appropriate documentation and training to facilitate participants' understanding of the FMI's rules and procedures and the risks they face from participating in the FMI.	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section VI-3-5-1 on Disclosure of Major Rules, etc. BOJ - Policy on Oversight of Financial Market Infrastructures	Consistent	The Supervisory Guidelines do not have specific requirements relating to provision of training to participants. Given the nature of a TR and the services they provide to participants, the lack of specific requirements on training will likely not have material impact, as participants would need to understand and test the TR's systems and

						services during the on-boarding processes.
TR	23.4	An FMI should have clear and comprehensive rules and procedures and should provide sufficient information to enable participants to have an accurate understanding of the risks, fees, and other material costs they incur by participating in the FMI. All relevant rules and key procedures should be publicly disclosed.	An FMI should publicly disclose its fees at the level of individual services it offers as well as its policies on any available discounts. The FMI should provide clear descriptions of priced services for comparability purposes.	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section VI-3-5-1 on Disclosure of Major Rules, etc. BOJ - Policy on Oversight of Financial Market Infrastructures	Consistent	
TR	23.5	An FMI should have clear and comprehensive rules and procedures and should provide sufficient information to enable participants to have an accurate understanding of the risks, fees, and other material costs they incur by participating in the FMI. All relevant rules and key procedures should be publicly disclosed.	An FMI should complete regularly and disclose publicly responses to the CPSS-IOSCO Disclosure framework for financial market infrastructures. An FMI also should, at a minimum, disclose basic data on transaction volumes and values.	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section VI-3-5-1 on Disclosure of Major Rules, etc. BOJ - Policy on Oversight of Financial Market Infrastructures	Consistent	The Supervisory Guidelines do not have a requirement for a TR to publicly disclose its responses to the CPSS-IOSCO Disclosure Framework.
TR	24.0	A TR should provide timely and accurate data to relevant authorities and the public in line with their respective needs.			Consistent	
TR	24.1	A TR should provide timely and accurate data to relevant authorities and the public in line with their respective needs.	A TR should provide data in line with regulatory and industry expectations to relevant authorities and the public, respectively, that is comprehensive and at a level of detail sufficient to enhance	FSA - Policy statement on supervision of FMIs Supervisory Guidelines section VI-3-5-2 on Disclosure of Market Data	Consistent
