

# Singapore

This document provides citations of the relevant legislation, regulation, policy and guidance, and notes explaining the assigned ratings for all relevant Principles of a given jurisdiction, by FMI type. It is a direct download of all the information for one jurisdiction that is included in the online CPMI-IOSCO PFMI implementation database ([www.bis.org/pfmi/index.htm](http://www.bis.org/pfmi/index.htm) and [www.iosco.org/about/?subsection=cpmi\\_iosco](http://www.iosco.org/about/?subsection=cpmi_iosco)). It includes all Principles and all key considerations: for the ones where gaps were identified the last column provides details on key conclusions and recommendations. The online CPMI-IOSCO PFMI implementation database allows to search information by Principle across different jurisdictions.

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
PS	1.0	An FMI should have a well-founded, clear, transparent, and enforceable legal basis for each material aspect of its activities in all relevant jurisdictions.		Refer to KCs	Consistent	
PS	1.1	An FMI should have a well-founded, clear, transparent, and enforceable legal basis for each material aspect of its activities in all relevant jurisdictions.	The legal basis should provide a high degree of certainty for each material aspect of an FMI's activities in all relevant jurisdictions.	Paragraph 2.2 of the Standards for MAS-Operated FMIs	Consistent	
PS	1.2	An FMI should have a well-founded, clear, transparent, and enforceable legal basis for each material aspect of its activities in all relevant jurisdictions.	An FMI should have rules, procedures, and contracts that are clear, understandable, and consistent with relevant laws and regulations.	Paragraph 2.3 of the Standards for MAS-Operated FMIs	Consistent	
PS	1.3	An FMI should have a well-founded, clear, transparent, and enforceable legal basis for each material aspect of its activities in all relevant jurisdictions.	An FMI should be able to articulate the legal basis for its activities to relevant authorities, participants, and, where relevant, participants'	Paragraph 2.4 of the Standards	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
			customers, in a clear and understandable way.	for MAS-Operated FMIs		
PS	1.4	An FMI should have a well-founded, clear, transparent, and enforceable legal basis for each material aspect of its activities in all relevant jurisdictions.	An FMI should have rules, procedures, and contracts that are enforceable in all relevant jurisdictions. There should be a high degree of certainty that actions taken by the FMI under such rules and procedures will not be voided, reversed, or subject to stays.	Paragraph 2.5 of the Standards for MAS-Operated FMIs	Consistent	
PS	1.5	An FMI should have a well-founded, clear, transparent, and enforceable legal basis for each material aspect of its activities in all relevant jurisdictions.	An FMI conducting business in multiple jurisdictions should identify and mitigate the risks arising from any potential conflict of laws across jurisdictions.	Paragraph 2.6 of the Standards for MAS-Operated FMIs	Consistent	
PS	2.0	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.		Refer to KCs	Consistent	
PS	2.1	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the	An FMI should have objectives that place a high priority on the safety and efficiency of the FMI and explicitly support financial stability and other relevant public interest considerations.	Paragraph 2.7 of the Standards	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		objectives of relevant stakeholders.		for MAS-Operated FMIs		
PS	2.2	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	An FMI should have documented governance arrangements that provide clear and direct lines of responsibility and accountability. These arrangements should be disclosed to owners, relevant authorities, participants, and, at a more general level, the public.	Paragraph 2.8 of the Standards for MAS-Operated FMIs	Consistent	
PS	2.3	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The roles and responsibilities of an FMI's board of directors (or equivalent) should be clearly specified, and there should be documented procedures for its functioning, including procedures to identify, address, and manage member conflicts of interest. The board should review both its overall performance and the performance of its individual board members regularly.	Paragraph 2.9 of the Standards for MAS-Operated FMIs	Consistent	
PS	2.4	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The board should contain suitable members with the appropriate skills and incentives to fulfil its multiple roles. This typically requires the inclusion of non-executive board member(s).	Paragraph 2.10 of the Standards for MAS-Operated FMIs	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
PS	2.5	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The roles and responsibilities of management should be clearly specified. An FMI's management should have the appropriate experience, a mix of skills, and the integrity necessary to discharge their responsibilities for the operation and risk management of the FMI.	Paragraph 2.11 of the Standards for MAS-Operated FMIs	Consistent	
PS	2.6	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The board should establish a clear, documented risk-management framework that includes the FMI's risk-tolerance policy, assigns responsibilities and accountability for risk decisions, and addresses decision making in crises and emergencies. Governance arrangements should ensure that the risk-management and internal control functions have sufficient authority, independence, resources, and access to the board.	Paragraph 2.12 of the Standards for MAS-Operated FMIs	Consistent	
PS	2.7	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The board should ensure that the FMI's design, rules, overall strategy, and major decisions reflect appropriately the legitimate interests of its direct and indirect participants and other relevant stakeholders. Major decisions should be clearly disclosed to relevant stakeholders and, where there is a broad market impact, the public.	Paragraph 2.13 of the Standards for MAS-Operated FMIs	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
PS	3.0	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.		Refer to KCs	Consistent	
PS	3.1	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.	An FMI should have risk-management policies, procedures, and systems that enable it to identify, measure, monitor, and manage the range of risks that arise in or are borne by the FMI. Risk-management frameworks should be subject to periodic review.	Paragraph 2.14 of the Standards for MAS-Operated FMIs	Consistent	
PS	3.2	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.	An FMI should provide incentives to participants and, where relevant, their customers to manage and contain the risks they pose to the FMI.	Paragraph 2.15 of the Standards for MAS-Operated FMIs	Consistent	
PS	3.3	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.	An FMI should regularly review the material risks it bears from and poses to other entities (such as other FMIs, settlement banks, liquidity providers, and service providers) as a result of interdependencies and develop appropriate risk-management tools to address these risks.	Paragraph 2.16 of the Standards for MAS-Operated FMIs	Consistent	
PS	3.4	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.	An FMI should identify scenarios that may potentially prevent it from being able to provide its critical operations and services as a going concern and assess the effectiveness of a full range of options for recovery or orderly	Not applicable for central bank-owned and operated FMIs as elaborated in the CPMI-IOSCO Guidance note on Application of the Principles for financial market infrastructures to central bank FMIs (August 2015).	Consistent	The approach taken by MAS is consistent with paragraph 1.23 of the PFMI, as elaborated in the CPMI-IOSCO Guidance note Application of the Principles for

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
			<p>wind-down. An FMI should prepare appropriate plans for its recovery or orderly wind-down based on the results of that assessment. Where applicable, an FMI should also provide relevant authorities with the information needed for purposes of resolution planning.</p>			<p>financial market infrastructures to central bank FMIs.</p>
PS	4.0	<p>An FMI should effectively measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes. An FMI should maintain sufficient financial resources to cover its credit exposure to each participant fully with a high degree of confidence. In addition, a CCP that is involved in activities with a more-complex risk profile or that is systemically important in multiple jurisdictions should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the two participants and their affiliates that would potentially cause the largest aggregate credit exposure to the CCP in extreme but plausible market conditions. All other CCPs should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should</p>		<p>Refer to KCs. As explained in paragraph 2.17 of the Standards for MAS-Operated FMIs, the implementation measures for this principle are strictly in respect of credit risk arising from MAS-operated FMIs' activities.</p>	Consistent	<p>The approach taken by MAS is consistent with paragraph 1.23 of the PFMI, as elaborated in the CPMI-IOSCO Guidance note Application of the Principles for</p>

		include, but not be limited to, the default of the participant and its affiliates that would potentially cause the largest aggregate credit exposure to the CCP in extreme but plausible market conditions.				financial market infrastructures to central bank FMIs.
PS	4.1	An FMI should effectively measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes. An FMI should maintain sufficient financial resources to cover its credit exposure to each participant fully with a high degree of confidence. In addition, a CCP that is involved in activities with a more-complex risk profile or that is systemically important in multiple jurisdictions should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the two participants and their affiliates that would potentially cause the largest aggregate credit exposure to the CCP in extreme but plausible market conditions. All other CCPs should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its	An FMI should establish a robust framework to manage its credit exposures to its participants and the credit risks arising from its payment, clearing, and settlement processes. Credit exposure may arise from current exposures, potential future exposures, or both.	Paragraph 2.18 of the Standards for MAS-Operated	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		<p>affiliates that would potentially cause the largest aggregate credit exposure to the CCP in extreme but plausible market conditions.</p>		<p>FMI's</p>		
<p>PS</p>	<p>4.2</p>	<p>An FMI should effectively measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes. An FMI should maintain sufficient financial resources to cover its credit exposure to each participant fully with a high degree of confidence. In addition, a CCP that is involved in activities with a more-complex risk profile or that is systemically important in multiple jurisdictions should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the two participants and their affiliates that would potentially cause the largest aggregate credit exposure to the CCP in extreme but plausible market conditions. All other CCPs should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would potentially cause the largest aggregate</p>	<p>An FMI should identify sources of credit risk, routinely measure and monitor credit exposures, and use appropriate risk-management tools to control these risks.</p>	<p>Paragraph 2.19 of the Standards for MAS-Operated</p>	<p>Consistent</p>	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		credit exposure to the CCP in extreme but plausible market conditions.		FMIs		
PS	4.3	An FMI should effectively measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes. An FMI should maintain sufficient financial resources to cover its credit exposure to each participant fully with a high degree of confidence. In addition, a CCP that is involved in activities with a more-complex risk profile or that is systemically important in multiple jurisdictions should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the two participants and their affiliates that would potentially cause the largest aggregate credit exposure to the CCP in extreme but plausible market conditions. All other CCPs should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would potentially cause the largest aggregate	A payment system or SSS should cover its current and, where they exist, potential future exposures to each participant fully with a high degree of confidence using collateral and other equivalent financial resources (see Principle 5 on collateral). In the case of a DNS payment system or DNS SSS in which there is no settlement guarantee but where its participants face credit exposures arising from its payment, clearing, and settlement processes, such an FMI should maintain, at a minimum, sufficient resources to cover the exposures of the two participants and their affiliates that would create the largest aggregate credit exposure in the system.	Paragraph 2.20 of the Standards for MAS-Operated	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		credit exposure to the CCP in extreme but plausible market conditions.		FMIs		
PS	4.7	An FMI should effectively measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes. An FMI should maintain sufficient financial resources to cover its credit exposure to each participant fully with a high degree of confidence. In addition, a CCP that is involved in activities with a more-complex risk profile or that is systemically important in multiple jurisdictions should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the two participants and their affiliates that would potentially cause the largest aggregate credit exposure to the CCP in extreme but plausible market conditions. All other CCPs should maintain additional financial resources sufficient to cover a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would potentially cause the largest aggregate	An FMI should establish explicit rules and procedures that address fully any credit losses it may face as a result of any individual or combined default among its participants with respect to any of their obligations to the FMI. These rules and procedures should address how potentially uncovered credit losses would be allocated, including the repayment of any funds an FMI may borrow from liquidity providers. These rules and procedures should also indicate the FMI's process to replenish any financial resources that the FMI may employ during a stress event, so that the FMI can continue to operate in a safe and sound manner.	Paragraph 2.21 of the Standards for MAS-Operated	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		credit exposure to the CCP in extreme but plausible market conditions.		FMI		
PS	5.0	An FMI that requires collateral to manage its or its participants' credit exposure should accept collateral with low credit, liquidity, and market risks. An FMI should also set and enforce appropriately conservative haircuts and concentration limits.		Refer to KCs	Consistent	
PS	5.1	An FMI that requires collateral to manage its or its participants' credit exposure should accept collateral with low credit, liquidity, and market risks. An FMI should also set and enforce appropriately conservative haircuts and concentration limits.	An FMI should generally limit the assets it (routinely) accepts as collateral to those with low credit, liquidity, and market risks.	Paragraph 2.22 of the Standards for MAS-Operated FMI.	Consistent	The approach taken by MAS is consistent with paragraph 1.23 of the PFMI, as elaborated in the CPMI-IOSCO Guidance note Application of the Principles for financial market infrastructures to central bank FMIs.
PS	5.2	An FMI that requires collateral to manage its or its participants' credit exposure should accept collateral with low credit, liquidity, and market risks. An FMI should also set and enforce appropriately conservative haircuts and concentration limits.	An FMI should establish prudent valuation practices and develop haircuts that are regularly tested and take into account stressed market conditions.	Paragraph 2.23 of the Standards for MAS-Operated FMI	Consistent	
PS	5.3	An FMI that requires collateral to manage its or its participants' credit exposure should accept collateral with low credit, liquidity, and market risks. An FMI should also set and enforce appropriately conservative haircuts and concentration limits.	In order to reduce the need for procyclical adjustments, an FMI should establish stable and conservative haircuts that are calibrated to include periods of stressed market conditions, to the extent practicable and prudent.	Paragraph 2.24 of the Standards for MAS-Operated FMI	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
PS	5.4	An FMI that requires collateral to manage its or its participants' credit exposure should accept collateral with low credit, liquidity, and market risks. An FMI should also set and enforce appropriately conservative haircuts and concentration limits.	An FMI should avoid concentrated holdings of certain assets where this would significantly impair the ability to liquidate such assets quickly without significant adverse price effects.	Paragraph 2.25 of the Standards for MAS-Operated FMIs	Consistent	
PS	5.5	An FMI that requires collateral to manage its or its participants' credit exposure should accept collateral with low credit, liquidity, and market risks. An FMI should also set and enforce appropriately conservative haircuts and concentration limits.	An FMI that accepts cross-border collateral should mitigate the risks associated with its use and ensure that the collateral can be used in a timely manner.	Paragraph 2.26 of the Standards for MAS-Operated FMIs	Consistent	
PS	5.6	An FMI that requires collateral to manage its or its participants' credit exposure should accept collateral with low credit, liquidity, and market risks. An FMI should also set and enforce appropriately conservative haircuts and concentration limits.	An FMI should use a collateral management system that is well-designed and operationally flexible.	Paragraph 2.27 of the Standards for MAS-Operated FMIs	Consistent	
PS	7.0	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default			Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.		Refer to KCs		
PS	7.1	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	An FMI should have a robust framework to manage its liquidity risks from its participants, settlement banks, nostro agents, custodian banks, liquidity providers, and other entities.	Paragraph 2.28 of the Standards for MAS-Operated FMIs	Consistent	
PS	7.2	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the	An FMI should have effective operational and analytical tools to identify, measure, and monitor its settlement and funding flows on an ongoing and timely basis, including its use of intraday liquidity.	Paragraph 2.29 of the Standards for MAS-Operated	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.		FMIs		
PS	7.3	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	A payment system or SSS, including one employing a DNS mechanism, should maintain sufficient liquid resources in all relevant currencies to effect same-day settlement, and where appropriate intraday or multiday settlement, of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate payment obligation in extreme but plausible market conditions.	Paragraph 2.30 of the Standards for MAS-Operated FMIs	Consistent	
PS	7.5	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the	For the purpose of meeting its minimum liquid resource requirement, an FMI's qualifying liquid resources in each currency include cash at the central bank of issue and at creditworthy commercial banks, committed lines of credit, committed foreign exchange swaps, and committed repos, as well as highly marketable collateral held in custody and investments that are readily available and convertible into cash with prearranged and highly reliable funding arrangements, even in extreme	Paragraph 2.31 of the Standards for MAS-Operated	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	but plausible market conditions. If an FMI has access to routine credit at the central bank of issue, the FMI may count such access as part of the minimum requirement to the extent it has collateral that is eligible for pledging to (or for conducting other appropriate forms of transactions with) the relevant central bank. All such resources should be available when needed.	FMIs		
PS	7.6	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	An FMI may supplement its qualifying liquid resources with other forms of liquid resources. If the FMI does so, then these liquid resources should be in the form of assets that are likely to be saleable or acceptable as collateral for lines of credit, swaps, or repos on an ad hoc basis following a default, even if this cannot be reliably prearranged or guaranteed in extreme market conditions. Even if an FMI does not have access to routine central bank credit, it should still take account of what collateral is typically accepted by the relevant central bank, as such assets may be more likely to be liquid in stressed circumstances. An FMI should not assume the availability of emergency central bank credit as a part of its liquidity plan.	Paragraph 2.32 of the Standards for MAS-Operated FMIs	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
PS	7.7	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	An FMI should obtain a high degree of confidence, through rigorous due diligence, that each provider of its minimum required qualifying liquid resources, whether a participant of the FMI or an external party, has sufficient information to understand and to manage its associated liquidity risks, and that it has the capacity to perform as required under its commitment. Where relevant to assessing a liquidity provider's performance reliability with respect to a particular currency, a liquidity provider's potential access to credit from the central bank of issue may be taken into account. An FMI should regularly test its procedures for accessing its liquid resources at a liquidity provider.	Paragraph 2.33 of the Standards for MAS-Operated FMIs	Consistent	
PS	7.8	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity	An FMI with access to central bank accounts, payment services, or securities services should use these services, where practical, to enhance its management of liquidity risk.	Paragraph 2.34 of the Standards for MAS-Operated	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		obligation for the FMI in extreme but plausible market conditions.		FMIs		
PS	7.9	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	An FMI should determine the amount and regularly test the sufficiency of its liquid resources through rigorous stress testing. An FMI should have clear procedures to report the results of its stress tests to appropriate decision makers at the FMI and to use these results to evaluate the adequacy of and adjust its liquidity risk-management framework. In conducting stress testing, an FMI should consider a wide range of relevant scenarios. Scenarios should include relevant peak historic price volatilities, shifts in other market factors such as price determinants and yield curves, multiple defaults over various time horizons, simultaneous pressures in funding and asset markets, and a spectrum of forward-looking stress scenarios in a variety of extreme but plausible market conditions. Scenarios should also take into account the design and operation of the FMI, include all entities that might pose material liquidity risks to the FMI (such as settlement banks, nostro agents, custodian banks, liquidity providers, and linked FMIs), and where appropriate, cover a multiday period. In all cases, an FMI should document	Paragraph 2.35 of the Standards for MAS-Operated	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
			its supporting rationale for, and should have appropriate governance arrangements relating to, the amount and form of total liquid resources it maintains.	FMIs		
PS	7.10	An FMI should effectively measure, monitor, and manage its liquidity risk. An FMI should maintain sufficient liquid resources in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of potential stress scenarios that should include, but not be limited to, the default of the participant and its affiliates that would generate the largest aggregate liquidity obligation for the FMI in extreme but plausible market conditions.	An FMI should establish explicit rules and procedures that enable the FMI to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations on time following any individual or combined default among its participants. These rules and procedures should address unforeseen and potentially uncovered liquidity shortfalls and should aim to avoid unwinding, revoking, or delaying the same-day settlement of payment obligations. These rules and procedures should also indicate the FMI's process to replenish any liquidity resources it may employ during a stress event, so that it can continue to operate in a safe and sound manner.	Paragraph 2.36 of the Standards for MAS-Operated FMIs	Consistent	
PS	8.0	An FMI should provide clear and certain final settlement, at a minimum by the end of the value date. Where necessary or preferable, an FMI should provide final settlement intraday or in real time.		Refer to KCs	Consistent	
PS	8.1	An FMI should provide clear and	An FMI's rules and procedures	Paragraph 2.37 of the	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		certain final settlement, at a minimum by the end of the value date. Where necessary or preferable, an FMI should provide final settlement intraday or in real time.	should clearly define the point at which settlement is final.	Standards for MAS-Operated FMIs		
PS	8.2	An FMI should provide clear and certain final settlement, at a minimum by the end of the value date. Where necessary or preferable, an FMI should provide final settlement intraday or in real time.	An FMI should complete final settlement no later than the end of the value date, and preferably intraday or in real time, to reduce settlement risk. An LVPS or SSS should consider adopting RTGS or multiple-batch processing during the settlement day.	Paragraph 2.38 of the Standards for MAS-Operated FMIs	Consistent	
PS	8.3	An FMI should provide clear and certain final settlement, at a minimum by the end of the value date. Where necessary or preferable, an FMI should provide final settlement intraday or in real time.	An FMI should clearly define the point after which unsettled payments, transfer instructions, or other obligations may not be revoked by a participant.	Paragraph 2.39 of the Standards for MAS-Operated FMIs	Consistent	
PS	9.0	An FMI should conduct its money settlements in central bank money where practical and available. If central bank money is not used, an FMI should minimise and strictly control the credit and liquidity risk arising from the use of commercial bank money.		Refer to KCs	Consistent	
PS	9.1	An FMI should conduct its money settlements in central bank money where practical and available. If central bank money	An FMI should conduct its money settlements in central	Paragraph 2.40 of the Standards for MAS-Operated	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		is not used, an FMI should minimise and strictly control the credit and liquidity risk arising from the use of commercial bank money.	bank money, where practical and available, to avoid credit and liquidity risks.	FMIs		
PS	9.2	An FMI should conduct its money settlements in central bank money where practical and available. If central bank money is not used, an FMI should minimise and strictly control the credit and liquidity risk arising from the use of commercial bank money.	If central bank money is not used, an FMI should conduct its money settlements using a settlement asset with little or no credit or liquidity risk.	Paragraph 2.41 of the Standards for MAS-Operated FMIs	Consistent	
PS	9.3	An FMI should conduct its money settlements in central bank money where practical and available. If central bank money is not used, an FMI should minimise and strictly control the credit and liquidity risk arising from the use of commercial bank money.	If an FMI settles in commercial bank money, it should monitor, manage, and limit its credit and liquidity risks arising from the commercial settlement banks. In particular, an FMI should establish and monitor adherence to strict criteria for its settlement banks that take account of, among other things, their regulation and supervision, creditworthiness, capitalisation, access to liquidity, and operational reliability. An FMI should also monitor and manage the concentration of credit and liquidity exposures to its commercial settlement banks.	Paragraph 2.42 of the Standards for MAS-Operated FMIs	Consistent	
PS	9.4	An FMI should conduct its money settlements in central bank money where practical and available. If central bank money is not used, an FMI should	If an FMI conducts money settlements on its own books, it should minimise and strictly control its credit and liquidity risks.	Paragraph 2.43 of the Standards for MAS-Operated	Consistent

PS	13.0	An FMI should have effective and clearly defined rules and procedures to manage a participant default. These rules and procedures should be designed to ensure that the FMI can take timely action to contain losses and liquidity pressures and continue to meet its obligations.		Refer to KCs. As explained in paragraph 2.54 of the Standards for MAS-Operated FMIs, the implementation measures for this principle are not intended to constrain MAS' policies and actions for maintaining financial stability including managing participant defaults.	Consistent	The approach taken by MAS is consistent with paragraph 1.23 of the PFMI, as elaborated in the CPMI-IOSCO Guidance note Application of the Principles for financial market infrastructures to central bank FMIs.
PS	13.1	An FMI should have effective and clearly defined rules and procedures to manage a participant default. These rules and procedures should be designed to ensure that the FMI can take timely action to contain losses and liquidity pressures and continue to meet its obligations.	An FMI should have default rules and procedures that enable the FMI to continue to meet its obligations in the event of a participant default and that address the replenishment of resources following a default.	Paragraph 2.55 of the Standards for MAS-Operated FMIs	Consistent	
PS	13.2	An FMI should have effective and clearly defined rules and procedures to manage a participant default. These rules and procedures should be designed to ensure that the FMI can take timely action to contain losses and liquidity pressures and continue to meet its obligations.	An FMI should be well prepared to implement its default rules and procedures, including any appropriate discretionary procedures provided for in its rules.	Paragraph 2.56 of the Standards for MAS-Operated FMIs	Consistent	
PS	13.3	An FMI should have effective and clearly defined rules and procedures to manage a participant default. These rules and procedures should be designed to ensure that the FMI	An FMI should publicly disclose key aspects of its default rules and procedures.	Paragraph 2.57 of the Standards for MAS-Operated	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		can take timely action to contain losses and liquidity pressures and continue to meet its obligations.		FMIs		
PS	13.4	An FMI should have effective and clearly defined rules and procedures to manage a participant default. These rules and procedures should be designed to ensure that the FMI can take timely action to contain losses and liquidity pressures and continue to meet its obligations.	An FMI should involve its participants and other stakeholders in the testing and review of the FMI's default procedures, including any close-out procedures. Such testing and review should be conducted at least annually or following material changes to the rules and procedures to ensure that they are practical and effective.	Paragraph 2.58 of the Standards for MAS-Operated FMIs	Consistent	
PS	15.0	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.		Refer to KCs	Consistent	
PS	15.1	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if	An FMI should have robust management and control systems to identify, monitor, and manage general business risks, including losses from poor execution of business strategy,	Paragraph 2.59 of the Standards for MAS-Operated	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	negative cash flows, or unexpected and excessively large operating expenses.	FMIs		
PS	15.2	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	An FMI should hold liquid net assets funded by equity (such as common stock, disclosed reserves, or other retained earnings) so that it can continue operations and services as a going concern if it incurs general business losses. The amount of liquid net assets funded by equity an FMI should hold should be determined by its general business risk profile and the length of time required to achieve a recovery or orderly wind-down, as appropriate, of its critical operations and services if such action is taken.	Not applicable for central bank-owned and operated FMIs as explained in the PFMI and elaborated in the CPMI-IOSCO Guidance note on Application of the Principles for financial market infrastructures to central bank FMIs (August 2015).	Consistent	The approach taken by MAS is consistent with paragraph 1.23 of the PFMI, as elaborated in the CPMI-IOSCO Guidance note Application of the Principles for financial market infrastructures to central bank FMIs.
PS	15.3	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	An FMI should maintain a viable recovery or orderly wind-down plan and should hold sufficient liquid net assets funded by equity to implement this plan. At a minimum, an FMI should hold liquid net assets funded by equity equal to at least six months of current operating expenses. These assets are in addition to resources held to cover participant defaults or other risks covered under the financial resources principles. However, equity held under	Not applicable for central bank-owned and operated FMIs as explained in the PFMI and elaborated in the CPMI-IOSCO note on Application of the Principles for financial market infrastructures to central bank FMIs (August 2015).	Consistent	The approach taken by MAS is consistent with paragraph 1.23 of the PFMI, as elaborated in the CPMI-IOSCO Guidance note Application of the Principles for

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
			international risk-based capital standards can be included where relevant and appropriate to avoid duplicate capital requirements.			financial market infrastructures to central bank FMIs.
PS	15.4	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	Assets held to cover general business risk should be of high quality and sufficiently liquid in order to allow the FMI to meet its current and projected operating expenses under a range of scenarios, including in adverse market conditions.	Not applicable for central bank-owned and operated FMIs as explained in the PFMI and elaborated in the CPMI-IOSCO note on Application of the Principles for financial market infrastructures to central bank FMIs (August 2015).	Consistent	The approach taken by MAS is consistent with paragraph 1.23 of the PFMI, as elaborated in the CPMI-IOSCO Guidance note Application of the Principles for financial market infrastructures to central bank FMIs.
PS	15.5	An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.	An FMI should maintain a viable plan for raising additional equity should its equity fall close to or below the amount needed. This plan should be approved by the board of directors and updated regularly.	Not applicable for central bank-owned and operated FMIs as explained in the PFMI and elaborated in the CPMI-IOSCO note on Application of the Principles for financial market infrastructures to central bank FMIs (August 2015).	Consistent	The approach taken by MAS is consistent with paragraph 1.23 of the PFMI, as elaborated in the CPMI-IOSCO Guidance note Application of the Principles for financial market infrastructures to central bank FMIs.
PS	16.0	An FMI should safeguard its own and its participants' assets and minimise the risk of loss on and delay in access to these		Refer to KCs. As explained in paragraph 2.60 of the Standards for MAS-	Consistent	The approach taken by MAS is consistent with paragraph 1.23 of the PFMI, as elaborated in the CPMI-IOSCO Guidance note

		support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	typically requires the inclusion of non-executive board member(s).	Securities and Futures Act, section 71(1) and 81ZF(2)		<p>and the board to have a mixture of skills of members to fulfil multiple roles of the board.</p> <p>In practice, in accordance with the policy statement in the monograph, MAS considers relevant aspects under KC4 (including the skills and incentives for the person to satisfy the board's multiple roles) in its regulatory approval process of the appointment of the board members.</p>
CCP	2.5	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The roles and responsibilities of management should be clearly specified. An FMI's management should have the appropriate experience, a mix of skills, and the integrity necessary to discharge their responsibilities for the operation and risk management of the FMI.	Notice on Financial Market Infrastructure Standards 3.2.4	Consistent	
CCP	2.6	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The board should establish a clear, documented risk-management framework that includes the FMI's risk-tolerance policy, assigns responsibilities and accountability for risk decisions, and addresses decision making in crises and emergencies. Governance arrangements should ensure that the risk-management and internal control functions have sufficient authority,	Notice on Financial Market	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
			independence, resources, and access to the board.	Infrastructure Standards 3.2.5		
CCP	2.7	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The board should ensure that the FMI's design, rules, overall strategy, and major decisions reflect appropriately the legitimate interests of its direct and indirect participants and other relevant stakeholders. Major decisions should be clearly disclosed to relevant stakeholders and, where there is a broad market impact, the public.	Notice on Financial Market Infrastructure Standards 3.2.6	Consistent	
CCP	3.0	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.			Consistent	Recommendation: Where there are gaps/inconsistencies in language or requirements between the relevant regulations and notices and the PFMI, MAS should consider providing more clarity to CCPs with respect to minimum standards.
CCP	3.1	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.	An FMI should have risk-management policies, procedures, and systems that enable it to identify, measure, monitor, and manage the range of risks that arise in or are borne by the FMI. Risk-management frameworks should be subject to periodic review.	Notice on Financial Market Infrastructure Standards 3.3.1  Securities and Futures Act, section 59	Consistent	
CCP	3.2	An FMI should have a sound risk-management framework for	An FMI should provide incentives to participants and,	Notice on Financial Market	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		comprehensively managing legal, credit, liquidity, operational, and other risks.	where relevant, their customers to manage and contain the risks they pose to the FMI.	Infrastructure Standards 3.3.2		
CCP	3.3	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.	An FMI should regularly review the material risks it bears from and poses to other entities (such as other FMIs, settlement banks, liquidity providers, and service providers) as a result of interdependencies and develop appropriate risk-management tools to address these risks.	Notice on Financial Market Infrastructure Standards 3.3.3	Consistent	
CCP	3.4	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.	An FMI should identify scenarios that may potentially prevent it from being able to provide its critical operations and services as a going concern and assess the effectiveness of a full range of options for recovery or orderly wind-down. An FMI should prepare appropriate plans for its recovery or orderly wind-down based on the results of that assessment. Where applicable, an FMI should also provide relevant authorities with the information needed for purposes of resolution planning.	<p>Securities and Futures (Clearing Facilities) Regulations, section 17</p> <p>Securities and Futures Act, section 63</p> <p>MAS Act, section 30AAZK</p>	Consistent	<p>MAS has not explicitly stated in its Securities and Futures (Clearing Facilities) Regulations that a CCP shall identify scenarios that may potentially prevent [the CCP] from being able to provide its critical operations and services as a going concern and assess the effectiveness of a full range of options for recovery or orderly wind-down.</p> <p>In practice, MAS requires each CCP to have a recovery and orderly wind-down plan, and it assesses whether the CCP has an appropriate and effective plan. As part of this assessment, MAS determines whether the CCP identified scenarios that may potentially prevent it from being able to provide its critical operations and services as a going concern, and assessed the effectiveness of a full range</p>

		all products through an effective margin system that is risk-based and regularly reviewed.	sound valuation models for addressing circumstances in which pricing data are not readily available or reliable.	Infrastructure Standards 3.6.2		
CCP	6.3	A CCP should cover its credit exposures to its participants for all products through an effective margin system that is risk-based and regularly reviewed.	A CCP should adopt initial margin models and parameters that are risk-based and generate margin requirements sufficient to cover its potential future exposure to participants in the interval between the last margin collection and the close out of positions following a participant default. Initial margin should meet an established single-tailed confidence level of at least 99 percent with respect to the estimated distribution of future exposure. For a CCP that calculates margin at the portfolio level, this requirement applies to each portfolio's distribution of future exposure. For a CCP that calculates margin at more-granular levels, such as at the subportfolio level or by product, the requirement must be met for the corresponding distributions of future exposure. The model should (a) use a conservative estimate of the time horizons for the effective hedging or close out of the particular types of products cleared by the CCP (including in stressed market conditions), (b) have an appropriate method for measuring credit exposure that accounts for relevant product	Notice on Financial Market	Consistent	

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
			risk factors and portfolio effects across products, and (c) to the extent practicable and prudent, limit the need for destabilising, procyclical changes.	Infrastructure Standards 3.6.3		
CCP	6.4	A CCP should cover its credit exposures to its participants for all products through an effective margin system that is risk-based and regularly reviewed.	A CCP should mark participant positions to market and collect variation margin at least daily to limit the build-up of current exposures. A CCP should have the authority and operational capacity to make intraday margin calls and payments, both scheduled and unscheduled, to participants.	Notice on Financial Market Infrastructure Standards 3.6.4	Consistent	
CCP	6.5	A CCP should cover its credit exposures to its participants for all products through an effective margin system that is risk-based and regularly reviewed.	In calculating margin requirements, a CCP may allow offsets or reductions in required margin across products that it clears or between products that it and another CCP clear, if the risk of one product is significantly and reliably correlated with the risk of the other product. Where two or more CCPs are authorised to offer cross-margining, they must have appropriate safeguards and harmonised overall risk-management systems.	Notice on Financial Market Infrastructure Standards 3.6.5	Consistent	
CCP	6.6	A CCP should cover its credit exposures to its participants for all products through an effective margin system that is risk-based and regularly reviewed.	A CCP should analyse and monitor its model performance and overall margin coverage by conducting rigorous daily backtesting and at least monthly, and more-frequent where appropriate, sensitivity	Notice on Financial Market	Consistent

			actions taken by the FMI under such rules and procedures will not be voided, reversed, or subject to stays.	Infrastructure Standards 3.1.4		
TR	1.5	An FMI should have a well-founded, clear, transparent, and enforceable legal basis for each material aspect of its activities in all relevant jurisdictions.	An FMI conducting business in multiple jurisdictions should identify and mitigate the risks arising from any potential conflict of laws across jurisdictions.	Notice on Financial Market Infrastructure Standards 3.1.5	Consistent	
TR	2.0	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.			Consistent	Recommendation: Where there are gaps/inconsistencies in language or requirements between the relevant regulations and the PFMI, MAS should consider providing more clarity to TRs with respect to minimum standards.
TR	2.1	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	An FMI should have objectives that place a high priority on the safety and efficiency of the FMI and explicitly support financial stability and other relevant public interest considerations.	Notice on Financial Market Infrastructure Standards 3.2.1	Consistent	While the language used in Notice on Financial Market Infrastructure Standards 3.2.1 is closely aligned to the KC, the word “explicitly” was not included. The absence of an explicit requirement could render a CCP’s objectives subject to interpretation and thereby weaken the objectives with respect to financial stability and other relevant public interest considerations.
TR	2.2	An FMI should have governance arrangements that are clear and	An FMI should have documented governance	Notice on Financial Market Infrastructure Standards 3.2.2	Consistent	While the language used in Notice on Financial Market

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	arrangements that provide clear and direct lines of responsibility and accountability. These arrangements should be disclosed to owners, relevant authorities, participants, and, at a more general level, the public.			<p>Infrastructure Standards 3.2.2 is closely aligned to the KC, it limits the referenced governance arrangements to those for its board of directors (or equivalent) and limits the referenced lines of responsibility and accountability to those between management and the board. As such, the requirements do not extend to lower staff levels.</p> <p>In practice, in accordance with the policy statement in the Monograph, MAS takes guidance from the PFMI explanatory note and MAS expects management to ensure clear and direct lines of responsibility and accountability, including for lower levels.</p>
TR	2.3	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The roles and responsibilities of an FMI's board of directors (or equivalent) should be clearly specified, and there should be documented procedures for its functioning, including procedures to identify, address, and manage member conflicts of interest. The board should review both its overall performance and the performance of its individual board members regularly.	Notice on Financial Market Infrastructure Standards 3.2.3	Consistent	
TR	2.4	An FMI should have governance arrangements that are clear and transparent, promote the safety	The board should contain suitable members with the appropriate skills and incentives	Securities and Futures Act, section 461(1)(j)	Consistent	The requirements in the referenced regulations do not explicitly cover board members'

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
		and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	to fulfil its multiple roles. This typically requires the inclusion of non-executive board member(s).	Securities and Futures Act, section 46V(1)		<p>incentives or a reference to the board's multiple roles and the inclusion of non-executive board member(s).</p> <p>In practice, in accordance with the policy statement in the monograph, MAS considers relevant aspects under KC4 (including the skills and incentives for the person to satisfy the board's multiple roles) in its regulatory approval process of the appointment of the board members.</p> <p>It is noted that MAS envisages legislative amendments to include TRs into the Securities and Futures (Corporate Governance of Approved Exchanges, Approved Clearing Houses and Approved Holding Companies) Regulations to establish requirements on independent directors and to provide further precision on the qualification criteria for board members as set out in these regulations currently applicable to CCPs and SSS.</p>
TR	2.5	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the	The roles and responsibilities of management should be clearly specified. 		objectives of relevant stakeholders.	necessary to discharge their responsibilities for the operation and risk management of the FMI.	Infrastructure Standards 3.2.4		
TR	2.6	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The board should establish a clear, documented risk-management framework that includes the FMI's risk-tolerance policy, assigns responsibilities and accountability for risk decisions, and addresses decision making in crises and emergencies. Governance arrangements should ensure that the risk-management and internal control functions have sufficient authority, independence, resources, and access to the board.	Notice on Financial Market Infrastructure Standards 3.2.5	Consistent	
TR	2.7	An FMI should have governance arrangements that are clear and transparent, promote the safety and efficiency of the FMI, and support the stability of the broader financial system, other relevant public interest considerations, and the objectives of relevant stakeholders.	The board should ensure that the FMI's design, rules, overall strategy, and major decisions reflect appropriately the legitimate interests of its direct and indirect participants and other relevant stakeholders. Major decisions should be clearly disclosed to relevant stakeholders and, where there is a broad market impact, the public.	Notice on Financial Market Infrastructure Standards 3.2.6	Consistent	
TR	3.0	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.			Consistent	Recommendation: Where there are gaps/inconsistencies in language or requirements between the relevant regulations and the PFMI, MAS should

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
						consider providing more clarity to TRs with respect to minimum standards.
TR	3.1	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.	An FMI should have risk-management policies, procedures, and systems that enable it to identify, measure, monitor, and manage the range of risks that arise in or are borne by the FMI. Risk-management frameworks should be subject to periodic review.	Notice on Financial Market Infrastructure Standards 3.3.1  Securities and Futures Act, section 46J	Consistent	
TR	3.2	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.	An FMI should provide incentives to participants and, where relevant, their customers to manage and contain the risks they pose to the FMI.	Notice on Financial Market Infrastructure Standards 3.3.2	Consistent	
TR	3.3	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.	An FMI should regularly review the material risks it bears from and poses to other entities (such as other FMIs, settlement banks, liquidity providers, and service providers) as a result of interdependencies and develop appropriate risk-management tools to address these risks.	Notice on Financial Market Infrastructure Standards 3.3.3	Consistent	
TR	3.4	An FMI should have a sound risk-management framework for comprehensively managing legal, credit, liquidity, operational, and other risks.	An FMI should identify scenarios that may potentially prevent it from being able to provide its critical operations and services as a going concern and assess the effectiveness of a full range of options for recovery or orderly wind-down. An FMI should prepare appropriate plans for its	Securities and Futures (Trade Repositories) Regulations, section 14  Securities and Futures Act, section 46N  MAS Act, section 30AAZK	Consistent	MAS has not explicitly stated in its Securities and Futures (Trade Repositories) Regulations that a TR shall identify scenarios that may potentially prevent [the TR] from being able to provide its critical operations and services as a going concern and assess the effectiveness of a full range

FMI Type	Principle or key consideration ID	Principle	Key consideration	Implementation measures	Principle rating	Assessment comments (ie key conclusions and recommendations)
			<p>recovery or orderly wind-down based on the results of that assessment. Where applicable, an FMI should also provide relevant authorities with the information needed for purposes of resolution planning.</p>			<p>of options for recovery or orderly wind-down.</p> <p>In practice, MAS requires each TR to have a recovery and orderly wind-down plan, and it assesses whether the TR has an appropriate and effective plan. As part of this assessment, MAS determines whether the TR identified scenarios that may potentially prevent it from being able to provide its critical operations and services as a going concern, and assessed the effectiveness of a full range of options for recovery or orderly winding-down.</p>
TR	15.0	<p>An FMI should identify, monitor, and manage its general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialise. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services.</p>			Consistent	<p>Recommendation: Where there are gaps/inconsistencies in language or requirements between the relevant regulations and the PFMI, MAS should consider providing more clarity to TRs with respect to minimum standards.</p>

						/inconsistencies in language or requirements between the relevant regulations and the PFMI, MAS should consider providing more clarity to TRs with respect to minimum standards.
TR	24.1	A TR should provide timely and accurate data to relevant authorities and the public in line with their respective needs.	A TR should provide data in line with regulatory and industry expectations to relevant authorities and the public, respectively, that is comprehensive and at a level of detail sufficient to enhance market transparency and support other public policy objectives.	Securities and Futures Act, section 46A  Securities and Futures Act, section 46ZJ(1)(e) and 46ZK(2)(a)	Partly consistent	<p>MAS has authority under the SFA to direct a TR to publish information related to the transactions reported to it. As of the cut-off date, however, MAS had not exercised the authority to direct DDRS, the sole LTR operating in Singapore as of the cut-off date, to publish such information. Accordingly, there are currently neither legal /supervisory requirements /expectations for, nor actual practice of, disclosure of the TR data to the public.</p> <p>The referenced regulations articulate specific requirements for a TR to provide data to MAS but do not do so with respect to the data provision to other relevant authorities. However, the AT considers that MAS' implementation measures are consistent with this respect of PFMI (ie data provision to relevant authorities) on the basis of the Monograph for the following reasons: (1) DDRS is required by MAS as part of its ongoing supervision to submit to MAS all the transaction data</p>

						<p>reported to DDRS; (2) MAS entered into a MOU with the Australian Securities Investments Commission (ASIC) and the Reserve Bank of Australia (RBA) to provide them with access to the data in DDRS; and (3) Only ASIC and RBA are deemed to be such relevant authorities at this juncture.</p> <p>Recommendation: MAS is recommended to implement /complete measures that address the identified gaps.</p> <p>It is acknowledged that MAS is actively considering appropriate requirements for LTRs to publish the data in a manner that will help to achieve the objectives of the public disclosure.</p>
TR	24.2	A TR should provide timely and accurate data to relevant authorities and the public in line with their respective needs.	A TR should have effective processes and procedures to provide data to relevant authorities in a timely and appropriate manner to enable them to meet their respective regulatory mandates and legal responsibilities.	<p>Securities and Futures Act, section 46I(1)(h)</p> <p>Securities and Futures Act, section 46ZJ(1)(e)</p>	Partly consistent	<p>The referenced regulations do not explicitly establish requirements with respect to the timeliness and appropriateness of the manner of the data provision.</p> <p>In practice, in accordance with the policy statement in the Monograph, MAS sets the requirements that mirror KC2 when exercising its legal power</p>

						to prescribe the manner of data provision by the TR to relevant authorities.
TR	24.3	A TR should provide timely and accurate data to relevant authorities and the public in line with their respective needs.	A TR should have robust information systems that provide accurate current and historical data. Data should be provided in a timely manner and in a format that permits it to be easily analysed.	Notice on Financial Market Infrastructure Standards 3.24.1	Partly consistent	<p>The referenced regulation refers to timeliness and format of the data only for cases “where the data is disclosed publicly” and does not separately address timeliness and format of data provision to relevant authorities and participants.</p> <p>In practice, in accordance with the policy statement in the Monograph, MAS ensures as part of its licensing and ongoing supervision process that appropriate arrangements are in place for timely data provision and accessible data formatting including with respect to relevant authorities and participants.</p>
