

## STATISTICAL ANNEX CONTENTS

Tables	Pages
<b>(A) International banking markets</b>	
1 BIS reporting banks: Summary of international positions .....	1
2 External positions of banks in individual reporting countries	
A In all currencies vis-à-vis all sectors .....	2
B In all currencies vis-à-vis the non-bank sector .....	3
C In domestic currency vis-à-vis all sectors .....	4
D In domestic currency vis-à-vis the non-bank sector .....	5
E In foreign currencies vis-à-vis all sectors .....	6
F In foreign currencies vis-à-vis the non-bank sector .....	7
3 Local positions in foreign currency of banks in individual reporting countries	
A Vis-à-vis all sectors .....	8
B Vis-à-vis the non-bank sector .....	9
4 Currency breakdown of reporting banks' international positions	
A External positions vis-à-vis all sectors .....	10
B External positions vis-à-vis the non-bank sector .....	11
C External positions vis-à-vis official monetary institutions .....	12
D Local positions in foreign currency vis-à-vis all sectors and vis-à-vis the non-bank sector .....	13
5 External positions of reporting banks vis-à-vis individual countries	
A Vis-à-vis all sectors .....	14-20
B Vis-à-vis the non-bank sector .....	21-27
6 ECU positions of reporting banks	
A External positions vis-à-vis all sectors and vis-à-vis the non-bank sector .....	28
B Local positions vis-à-vis all sectors and vis-à-vis the non-bank sector .....	29
C International positions vis-à-vis individual countries, vis-à-vis all sectors .....	30
D International positions vis-à-vis individual countries, vis-à-vis the non-bank sector .....	31
7 International positions by nationality of ownership of reporting banks	
A Amounts outstanding .....	32
B Estimated exchange rate adjusted changes .....	33
8 Announced international syndicated credit facilities by nationality of borrower .....	34
<b>(B) Securities markets</b>	
9 International debt securities by country of residence .....	35
10 International debt securities by nationality of issuer	
A All issuers .....	36
B Financial institutions .....	37
C Governments and state agencies .....	38
D Corporate issuers .....	39
11 International debt securities by type, sector and currency	
A Money market instruments .....	40
B Bonds and notes .....	41
12 International debt securities by country of residence	
A Money market instruments .....	42
B Bonds and notes .....	43
13 International debt securities by nationality of issuer	
A Money market instruments .....	44
B Bonds and notes .....	45
14 International debt securities by sector and nationality of issuer .....	46
15 Domestic debt securities by sector and country of issuer .....	47
16 The international debt securities market in ECUs	
A Money market instruments .....	48
B Bonds and notes .....	49
<b>(C) Derivatives markets</b>	
17 Notional principal of swaps by currency and type of counterparty	
A Interest rate swaps .....	50
B Currency swaps .....	51
18 Notional principal of swaps by location and type of end-user	
A Interest rate swaps .....	52
B Currency swaps .....	53
19 Maturity breakdown of notional principal of swaps	
A Interest rate swaps .....	52
B Currency swaps .....	53
20 Derivative financial instruments traded on organised exchanges by instrument and location	
A Notional amounts .....	54
B Number of contracts .....	55
Notes to tables and breaks in series .....	56-57
Special features incorporated in "International banking and financial market developments" .....	58

.. = not available.

<sup>1</sup> Including Australia and New Zealand.

## Notes to tables

Table 1	BIS reporting banks include banks residing in the Group of Ten countries, Luxembourg, Austria, Denmark, Finland, Ireland, Norway, Spain, the Bahamas, Bahrain, the Cayman Islands, Hong Kong, the Netherlands Antilles and Singapore and the offshore branches of US banks in Panama. Inside-area countries also include positions vis-à-vis Aruba, Barbados, Bermuda, Lebanon, Liberia, Vanuatu and the British West Indies.
	The unallocated item includes international institutions other than the BIS and on the liabilities side banks' issues of debt securities for most reporting countries.
	Local positions in foreign currency are available from all reporting banks except those in the United States and Hong Kong as well as for liabilities vis-à-vis non-banks, those in Japan. For Singapore, local positions include interbank business only. ("Local" refers to positions vis-à-vis residents.)
	Total net international bank lending includes, in addition to direct cross-border claims on end-users, the following interbank positions: first, claims on outside-area banks, the assumption being that these "peripheral" banks will not, in most cases, redeposit the funds with the reporting banks; secondly, claims on inside-area banks to the extent that these banks switch the funds into domestic currency and/or use them for direct foreign currency lending to domestic customers; thirdly, a large portion of the foreign currency claims on banks in the country of issue of the currency in question, e.g. dollar claims of banks in London on banks in the United States; here again the assumption is that the borrowing banks obtain the funds mainly for domestic purposes and not for re-lending abroad. Net international bank lending is thus the sum of items B.1, B.2.a and C.a, plus part of items B.2.b and B.3; it also equals the sum of items F.1, F.2.a and G.a plus part of items F.2.b and F.3. Inside-area "other liabilities" include liabilities vis-à-vis international institutions.
Tables 2	"Other reporting countries" include the Bahamas, Bahrain, the Cayman Islands, Hong Kong, Singapore and under "Other" the Netherlands Antilles and the offshore branches of US banks in Panama.
Table 2 A	The total for net international bank lending is adjusted to exclude, on a partly estimated basis, the redepositing of funds among the reporting banks (see also notes to Table 1).
Table 2 B	For banks in the United States the data relate to domestic currency positions only.
Table 2 E-F	Except for Hong Kong, the positions of banks in "Other reporting countries" include those in domestic currency.
Tables 3	In the case of Belgium and Luxembourg, the data relate to residents of both countries.
Tables 4 A-B	Owing to the lack of a currency breakdown, the foreign currency positions of banks in the United States are included under "Unallocated". Claims on non-banks include the positions of banks in the United States and their offshore branches vis-à-vis official monetary institutions. No currency breakdown is available for "Other reporting countries".
Table 4 C	Excludes, on the assets side, the positions of banks in the United States and their offshore branches, which are indistinguishably included under positions vis-à-vis non-banks.
Table 4 D	The data cover all reporting banks except those in the United States and Hong Kong as well as for liabilities vis-à-vis non-banks, those in Japan. For Singapore, local positions include interbank business only.
Table 5 A	Positions vis-à-vis Switzerland include those vis-à-vis the BIS.
	The residual item for Middle Eastern countries includes the positions of banks in the United States and their branches in Panama vis-à-vis Middle Eastern OPEC countries (including positions vis-à-vis Bahrain, but excluding those vis-à-vis Libya, which appear under the residual item for African countries) as well as the residual positions of banks in the Bahamas vis-à-vis Middle Eastern OPEC countries. The residual item for African countries includes the positions of banks in the United States vis-à-vis African OPEC countries.
	For reasons of confidentiality, positions vis-à-vis certain countries may be included under the residual or unallocated items.
Table 5 B	The extent of the inclusion of data of banks in the United States vis-à-vis individual countries is indicated by the letter U placed after the names of the countries for which such figures are available. In the case of the offshore branches of US banks in Panama, only the positions vis-à-vis the US non-bank sector are available separately. See also notes to Table 5 A.
Tables 7 A-B	The data cover cross-border positions in all currencies plus local foreign currency positions of banks located in the group of "Industrial reporting countries" and Hong Kong. The data for banks in the United States include domestic currency only. In addition, the data cover cross-border positions in foreign currency of the offshore branches of US banks in the Bahamas, the Cayman Islands, Panama, Hong Kong and Singapore.
	Positions vis-à-vis "related offices" cover cross-border positions only. In the case of banks in Canada, such positions are given for Canadian banks only.
	Claims on official monetary institutions are not reported separately for banks by the Netherlands, while in the case of banks in the United States and their offshore branches, the claims are included under positions vis-à-vis non-banks.
Table 8	The data cover announcements of international syndicated credit facilities that are granted by syndicates consisting of at least three financial institutions (thus excluding bilateral deals) acting as arranger/co-arranger, lead manager/co-lead manager, manager/co-manager, member of a tender panel or participant; the nationality of at least one of the syndicate banks must differ from that of the borrower. Facilities must take the form of one or a combination of the following instruments: term loan, revolving credit, co-financing facility, export credit, bridge facility, construction loan, mezzanine loan or multiple options facility. Furthermore, only signed facilities with a maturity of at least one year and for an amount equivalent to at least \$1 million are included. Finally, there are no restrictions on the purposes to which the proceeds of the facilities might be directed and the data therefore also include refinancing facilities.
Tables 9-14	"International debt securities" in Tables 9, 10 and 14 include international money market instruments, bonds and notes.

The "country of residence" in Tables 9, 12 and 16 is determined by the residence of the borrower and conforms with the balance-of-payments methodology.

The "Nationality of issuer" in Tables 10, 13, 14 and 16 (and in Table 11B for Japanese issuers) is determined by the country of incorporation of the parent company of the borrower; it corresponds to the country of ultimate risk.

The data on net issues of money market instruments and notes are calculated as changes in amounts outstanding at constant exchange rates. The data on net issues of international bonds represent transaction data and are obtained by deducting scheduled and early repayments from data on completed issues but adding the implied interest accruals on zero coupon bonds; repayments of non-US dollar bonds are converted at the exchange rates prevailing at the beginning of the repayment quarter.

The memorandum items in Tables 11A and 11B contain aggregates for all of the OECD countries and selected emerging markets as shown in Table 15. These data also include ECU treasury bills and domestically targeted ECU bonds.

Table 15 The data on net issues are calculated as changes in amounts outstanding at constant exchange rates. "Other short-term notes" include mainly certificates of deposit (CDs). The data also include ECU Treasury bills and domestically targeted ECU bonds issued by governments.

Data on short-term notes for Argentina include negotiable CDs plus time deposits in domestic and foreign currencies. The public sector figures for Argentina include "Bonos" issued in foreign currency.

Data for Brazilian public sector domestic securities exclude federal securities held by the central bank.

Indian public sector domestic securities exclude those of government-guaranteed bodies.

Domestic debt securities data for Luxembourg are calculated by subtracting data on international debt securities issues outstanding in Luxembourg francs from total amounts outstanding of debt securities issues in Luxembourg francs.

For the Netherlands, the source of data on domestic MTNs is different from that for data on domestic bonds, with which there may therefore be some overlaps. Furthermore, data on domestic CP include foreign issues in Dutch guilders. Issues of CDs by the Netherlands Bank are included under private short term notes.

The UK data on CP and MTNs also include foreign issues.

Data for US short-term notes include CDs plus other time deposits. The US data on domestic CPs include foreign issues.

The latest available bonds data for Belgium relate to end-March 1997. The public sector data for Singapore are available up to end-December 1996. The private sector data for Singapore are only available up to end-December 1995. For the United States, data on domestic MTNs are only available up to end-1966. The latest available data on amounts outstanding have been carried forward for the periods thereafter.

Tables 17 The notional principal of interest rate swaps corresponds to the hypothetical underlying amount on which swap payments are based. The notional principal of new interest rate swaps in each non-US-dollar currency is translated into US dollars by using a six-month average of individual exchange rates against the US dollar. The notional principal of outstanding interest rate swaps in each non-US-dollar currency is translated into US dollars by using a twelve-month average of individual exchange rates against the US dollar.

The US dollar value of the notional principal of currency swaps in non-US-dollar currencies is calculated on the basis of a two-step procedure. First, an implicit exchange rate is computed as a ratio of the total notional principal of swaps between the US dollar and another currency. For example, in order to obtain the implicit exchange rate between the US dollar and the Swiss franc, the notional principal of currency swaps of US dollars against Swiss francs reported in terms of US dollars is divided by the amount reported in terms of Swiss francs. Secondly, this exchange rate is used to translate the total notional principal of currency swaps in non-US-dollar currencies into US dollars. In the present example the implicit US dollar/Swiss franc exchange rate is used to translate into US dollars the total amount of currency swaps involving the Swiss franc. These translation procedures apply to both new currency swaps and those outstanding at end-year. Interest rate and currency swaps between ISDA members (interbank swaps) are adjusted for double-counting. Source: International Swaps and Derivatives Association, Inc.

Tables 18 Swaps with end-users exclude brokered swaps. Government includes international institutions. Corporations include "Other". Source: International Swaps and Derivatives Association, Inc.

Tables 19 Individual maturity brackets include the lower range but exclude the upper range. Source: International Swaps and Derivatives Association, Inc.

Tables 20 Source: Futures Industry Association and various futures and options exchanges.

#### Breaks in series

December 1995	France .....	Reclassification of own issues of short-term debt securities from individual vis-à-vis countries to total debt securities.
	Japan .....	Inclusion of trust account balances in foreign currencies.
	United Kingdom .....	Change in method of reporting liabilities and claims under sale and repurchase agreements from purchases of securities to collateralised loans.
December 1996	Hong Kong .....	Inclusion of banks' international positions by nationality of ownership of reporting banks in Tables 7 A-B.
