## BIS international banking statistics: latest revisions and breaks

The latest BIS locational and consolidated banking statistics refer to end-March 2024.

The statistics are subject to revision and are affected by breaks in series (or changes in compilation) over time. Breaks may arise from: changes in the population of reporting institutions, including the addition of new reporting countries; changes in reporting practices; or methodological improvements.

Publication dates for updates and revisions are announced in the [release calendar](#). Questions about the BIS locational and consolidated banking statistics may be addressed to [statistics@bis.org](mailto:statistics@bis.org).

### Data repeated from previous quarters

The latest statistics include some data carried forward from previous quarters, so as to improve the comparability across quarters of aggregates composed of data reported by all countries. Data have been carried forward for those countries shown in Table 1.
