BIS international banking statistics: latest revisions and breaks

The latest BIS locational and consolidated banking statistics refer to end-June 2023. The statistics are subject to revision and are affected by breaks in series (or changes in compilation) over time. Breaks may arise from: changes in the population of reporting institutions, including the addition of new reporting countries; changes in reporting practices; or methodological improvements.

Publication dates for updates and revisions are announced in the release calendar. Questions about the BIS locational and consolidated banking statistics may be addressed to statistics@bis.org.

Data repeated from previous quarters

The latest statistics include some data carried forward from previous quarters, so as to improve the comparability across quarters of aggregates composed of data reported by all countries. Data have been carried forward for those countries shown in Table 1.

Revisions and breaks

Significant revisions and breaks reported since the previous publication of the statistics in September 2023 are explained below. For more information about breaks in historical data, see the LBS-break and CBS-break summaries.

Break sizes are shown in the BIS Statistics Explorer under measure B. For example, for break sizes in the LBS and CBS see Table A2 and Table B1, respectively. At the request of reporting countries, the size of some breaks and revisions is not shown for confidentiality reasons (indicated in the published data by “\”).
