

Residential and commercial property prices - changes to the data set

Last updated: 29 January 2026

The property price statistics track price development of the [residential](#) and the [commercial](#) market segments. In disseminating property price data, the BIS and its member central banks follow the recommendations of the G20 Data Gaps Initiative.

January 2026

- *Major revisions:* the selected series for **advanced economies** (AEs) and **emerging market economies** (EMEs) used in statistical releases have been aligned with the updated [country classification](#).
Key changes: Czechia, Hong Kong SAR, Israel, Korea and Singapore have been reclassified as AEs.
These updates have resulted in revisions to the [aggregate figures of the selected property prices data set](#). The series are back-calculated from their start date. Index revisions are minimal (below 2%); year-on-year growth rates may show larger revisions."
