1. Summary of latest developments

- Global real residential property prices\(^1\) increased by 2.1% year on year in aggregate in the first quarter of 2019. The rise was more pronounced in the emerging market economies than in the advanced ones (2.6% versus 1.5%).

- In real terms, residential property prices are well above their levels immediately post-crisis in both advanced and emerging market economies, by 18% and 14% respectively.\(^2\)

---

1. Real residential property prices refer to nominal residential property price indicators deflated by the Consumer Price Index.

2. Global aggregates are weighted aggregates of selected advanced economies (Australia, Canada, Denmark, the euro area, Iceland, Japan, New Zealand, Norway, Sweden, Switzerland, the United Kingdom and the United States) and emerging market economies (Brazil, Bulgaria, Chile, China, Colombia, Croatia, the Czech Republic, Hong Kong SAR, Hungary, India, Indonesia, Israel, Korea, North Macedonia, Malaysia, Mexico, Morocco, Peru, Philippines, Poland, Romania, Russia, Saudi Arabia, Republic of Serbia, Singapore, South Africa, Thailand, Turkey and United Arab Emirates), based on PPP exchange rates.
Among G20 economies, China saw the strongest annual real house price inflation in the first quarter of 2019. Prices also increased rapidly in Mexico and in Germany, while Brazil, Australia and Turkey experienced the steepest declines.

Since the 2007–09 Great Financial Crisis (GFC), prices have increased the most in India, Canada, Germany and the United States. In contrast, they have remained significantly below their post-crisis levels in Italy and Russia.

Real residential property prices in other advanced economies

Year-on-year changes

Graph 4

In aggregate for the group of advanced economies, real residential property prices continued to rise steadily in the first quarter of 2019, by 1.5% year on year. They rose most rapidly in the euro area (+2.5%), reflecting rapid increases in Spain (+6%), Germany (+4%) and to a lesser extent France (+2%). But real prices continued to fall in Italy (−2%) (Graph 3).

Real prices rose also in Japan and the United States (both by 2%), while they remained stable in the United Kingdom. They started to fall in Canada (−2%) and continued their marked decline in Australia (−9%), representing a significant correction after the boom observed in the aftermath of the GFC (+23% from 2010 to end-2017). (Graph 4).
3. Emerging market economies

Year-on-year changes

Graph 5: (interactive graph).
Source: BIS selected residential property prices series based on quarterly average data.
Real residential property prices increased by 2.6% year on year in emerging market economies in the first quarter of 2019. They were up by 3.9% in emerging Asia, led by a 6% price surge in China. Prices also grew in Korea and India (by 2% and 1%, respectively) while they remained almost flat in Indonesia (Graph 5).

In contrast, real prices remained more stable in Latin America in aggregate (+0.6%). They moved in opposite directions in the two biggest jurisdictions covered, rising by 5% in Mexico while continuing to fall in Brazil (–3%).

Turning to central and eastern Europe, aggregate real prices fell by 1.1% on average. They continued to drop in Turkey (–14%). In contrast, they started to recover in Russia (+2%), following the long decline in 2012–18 (Graph 6).
